KEY MAP

MASTER PLAN CLASS EA

The City has retained The Municipal Infrastructure Group Ltd. to complete the Master Plan Class EA Study. The Study is being conducted in accordance with the Master Plan process as outlined in the *Municipal Engineers Association Municipal Class Environmental Assessment* document (October 2000, as amended in 2007). The Master Plan Class EA process includes public and review agency consultation, an assessment of the problem and opportunities, evaluation of alternative solutions, assessment of potential effects on the environment, and identification of reasonable measures to mitigate any adverse effects. The preferred solution(s) will be determined based on engineering requirements, environmental considerations, public input and information gathered during the study.

A first Public Consultation Centre (PCC) was held on Thursday, April 15, 2010. The Study Team will also present the project schedule and next steps in the Class EA process. The PCC will include opportunities for interactive discussions to engage participants and solicit their input. We encourage attendance and input at this PCC for incorporation into the planning and design of future services. The second PCC will be held as follows:
