WSP Canada Inc. prepared this report solely for the use of the intended recipient, **City of Vaughan**, in accordance with the professional services agreement. The intended recipient is solely responsible for the disclosure of any information contained in this report. The content and opinions contained in the present report are based on the observations and/or information available to WSP Canada Inc. at the time of preparation. If a third party makes use of, relies on, or makes decisions in accordance with this report, said third party is solely responsible for such use, reliance or decisions. WSP Canada Inc. does not accept responsibility for damages, if any, suffered by any third party as a result of decisions made or actions taken by said third party based on this report. This limitations statement is considered an integral part of this report.

The original of this digital file will be conserved by WSP Canada Inc. for a period of not less than 10 years. As the digital file transmitted to the intended recipient is no longer under the control of WSP Canada Inc., its integrity cannot be assured. As such, WSP Canada Inc. does not guarantee any modifications made to this digital file subsequent to its transmission to the intended recipient.

## 1 Introduction

WSP Canada Inc. (WSP) was retained by the City of Vaughan to conduct a Contamination Overview Study (COS) as a part of Phase 3 and 4 of the Schedule 'C' Municipal Class Environmental Assessment (Class EA) for the extensions of Interchange Way from 218, west of Edgeley Boulevard to Creditstone Road, and Millway Avenue from Highway 7 to Interchange Way (the "Site") in Vaughan, Ontario. Phases 1 and 2 of the MCEA will be completed as a part of the Vaughan Metropolitan Centre (VMC) Transportation Masterplan (TMP) Update.

The City of Vaughan ('the City') is updating the TMP to confirm transportation needs, supportive policies and a phasing strategy to 2041 with a focus on street connectivity, accessibility and support for multi-modal mobility. The planning and design of the previously proposed extensions of Millway Avenue and Interchange Way will be advanced through the Project.

For the purposes of this study, a 250-m evaluation zone was added around the Site. This study was completed in accordance with Section 2 "Contamination Overview Study" of the MTO document entitled "Environmental Guide for Contaminated Property Identification and Management" (October 2006).

The objective of the COS was to identify actual and potential sources of environmental liabilities, associated with the current and historical operations of the properties present within 250 metres from the Site boundary (hereinafter referred to as the "Study Area"). It is understood that this COS is required for due diligence purposes, to evaluate options for management of excess soils to be generated during extension of Millway Avenue and Interchange Way. The Study Area extends from 50 m west of Commerce Street to 235 m east of Creditstone Road and from the north of Highway 407 to Apple Mill Road. The location of the Site and the Study Area is shown on **Figure 1** appended.

Vaughan Metropolitan Centre (VMC) Schedule 'C' Class Environmental Assessment (EA) Studies for the Extensions of Interchange Way and Millway Avenue

This COS was completed alongside a hydrogeological investigation by WSP for this project, with a hydrogeological report issued under a separate cover.

On May 2025, City of Vaughan provided WSP with updated design drawings. The updated design drawings had minor change in alignment located along Interchange Way (east of intersection of Interchange Way and Jane Street (shown in **Figure 4**)). WSP reviewed the drawings and found that the minor change in design does not impact the overall findings for this COS report.

## 2 Scope of Investigation

The objectives of the COS were:

- To obtain and review records and site information for properties present within the Study Area to evaluate the potential for contaminating activities to have occurred; and
- To determine the need for carrying out a Phase Two Environmental Site Assessment (ESA) and, if necessary, provide the basis for conducting a Phase Two ESA or risk assessment.

The general objectives were met through the evaluation of the information gathered from the review of records and completing a site reconnaissance. Specific objectives for these components and the tasks completed to achieve these objectives are described below.

The scope of the COS work included the following tasks:

- Review of historical environmental reports related to the Study Area;
- Review of historical aerial photographs available from the Regional Municipality of York website and/or National Air Photo Library for the Study Area. Aerial photographs were used to assist in the determination of the first developed use in the Study Area, identify structures and buildings, and provide information with respect to land use over time;
- Review of topographic, physiographic, and geological maps for the Study Area.

  These sources were reviewed to obtain information regarding the stratigraphy of the underlying soil and to assist in identifying areas of potential environmental

- concern, such as above ground tanks (ASTs), pipelines and cemeteries and the potential for the migration of subsurface contaminants;
- Review of available information available from the Technical Standards and Safety Authority (TSSA) for selected properties in the Study Area;
- Review of database information from EcoLog Environmental Risk Information
   Services (ERIS) Ltd. The comprehensive database provides information with respect
   to above and underground storage tanks, waste disposal sites, polychlorinated
   biphenyl storage, compliance, convictions and spills, incidents recorded in the
   National Pollutant Release Inventory, the Inventory of Coal Gasification Plants,
   notices and instruments including RSCs, and landfill information;
- Review of the water well records available through the Ontario Ministry of the Environment, Conservation and Parks (MECP);
- Review of available historical fire insurance plans (FIPs), to confirm the development history of the Study Area. This information was used to assess the historical occupants in the Study Area, the historical presence of underground storage tanks and general development;
- Conduct a windshield site reconnaissance and visually inspect the Study Area to
  assess current conditions of the Study Area and to evaluate the potential for impacts
  to soil and ground water. Photographs were taken to support pertinent
  observations; and
- Prepare a COS report documenting the findings, conclusions and recommendations.

## 3 Review of Records

#### 3.1 General

#### 3.1.1 COS Study Area Determination

As described in Section 1, the Study Area extends from 40 m west of Commerce Street to 235 m east of Creditstone Road and from the north of Highway 407 to Apple Mill Road, Vaughan, Ontario, as shown on **Figure 1**. The land use beyond the Study Area were observed to be a mix of commercial and industrial properties, similar to land uses present within the Study Area. Therefore, the Study Area was not expanded past the 250 m radius.

#### 3.1.2 Fire Insurance Plans

Based on the available historical information for the Site and the Study Area (see Section 3.3.1), WSP did not complete a search for historical fire insurance plans. Based on the age of urban development of the Study Area (post 1950s), it is unlikely that fire insurance plans are available for the Site and the Study Area.

#### 3.1.3 Previous Environmental Reports

WSP requested relevant environmental information from the City of Vaughan for this project. The purpose of this review was to collect information on past activities that could have contributed to contamination in the Study Area. Below is a summary of the previous environmental reports for the Study Area:

## <u>Phase One ESA, Block 2, Interchange Way, Vaughan, Ontario (Golder, April 2017 revised in</u> December 2019)

Golder Associates Ltd. (Golder) conducted a Phase One ESA at the property located at Block 2 Interchange Way in Vaughan, Ontario, for a private developer. This property is present in the southeast quadrant of the intersection of Exchange Avenue and Interchange Way (see **Figure 1**). The Phase One ESA was carried out in general accordance with Ontario Regulation (O. Reg.) 153/04.

The site reconnaissance was conducted on November 29, 2016, with a supplementary visit carried out on November 1, 2019. At the time of the Phase One ESA in 2017 and 2019, the site was vacant. The proposed site use is residential, the site historically was used for agricultural purposes.

No Potentially Contaminating Activities (PCAs) were identified on the Phase One Property; several PCAs were identified within the Study Area. Based on results of the Phase One ESA, no Areas of Potential Environmental Concern (APEC) were identified for the Phase One Property. A Phase Two ESA was not recommended to be completed to support submission of a Record of Site Condition (RSC) for the Site.

# Phase One ESA, Proposed Linear Park Block, Described as Part of Lot 4, Concession 5, Designated as Part 6, Part 4, Part of Part 5, Part of Part 8, Interchange Way, Vaughan, Ontario (Golder, May 2018a)

Golder conducted a Phase One ESA for a proposed linear park block, described as Part of Lot 4, Concession 5, designated as Part 6, Part 4, Part of Part 5, Part of Part 8, located east of the Toronto Transit Commission ("TTC") Right of Way and east of Block 2, Interchange Way, located immediately south of Interchange Way and 207 m east of Exchange Avenue Vaughan, Ontario. The Phase One ESA was carried out in accordance with O. Reg. 153/04.

The site reconnaissance was conducted on April 27, 2018. At the time of the site visit the property was vacant land.

The Phase One ESA identified one-site five (5) PCAs contributing to five (5) APECs, located at the north, central and south portions of the Phase One Property. The APECs include:

- APEC 1: #52. Storage, Maintenance, Fuelling and Repair of Equipment, Vehicles, and Material Used to Maintain Transportation Systems – the north end of the Phase One Property was used as a temporary staging area for TTC construction activities between 2013 and 2017;
- APEC 2: #30. Importation of Fill Material of Unknown Quality a stockpile of material of unknown origin and quality was observed in the north of the Phase One Property;
- APEC 3: #22. Fertilizer Manufacturing, Processing and Bulk Storage approximately 3000 kilograms in 120 x 25 kg bags of fertilizer may have been stored on the Phase One Property;
- APEC 4: #N/A. Other two 200 L drums of mineral oil, and furnace oil or grease, formerly present on the Phase One Property; and,
- APEC 5: #40. Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents)
   Manufacturing, Processing, Bulk Storage and Large-Scale Applications located at a former orchard, on the south boundary of the Phase One property.

Additional eight (8) PCAs were identified in the Phase One Study Area but were unlikely to result in on-Site APECs. A Phase Two ESA was recommended to support the submission of an RSC.

# Phase One ESA, Former TTC Access Easement, Part of Lot 4, Concession 5, designated as Part 18 and Part of Part 19 on Registered Plan 65R-37648, Interchange Way, Vaughan, Ontario (Golder, May 2018b)

Golder conducted a Phase One ESA for a parcel of undeveloped land located immediately south of Interchange Way and 175 m east of Exchange Avenue in Vaughan, Ontario. The Phase One ESA was carried out in accordance with O. Reg. 153/04. The site reconnaissance was conducted on April 27, 2018. At the time of the site visit, the property was undeveloped land.

Based on evaluation of PCAs, one (1) APEC was identified on the Phase One Property:

- APEC 1: #52. Storage, Maintenance, Fuelling and Repair of Equipment, Vehicles, and Material Used to Maintain Transportation Systems – former TTC staging area (used for construction activities between 2013 and 2017).

Golder recommended to carry out a Phase Two ESA to support the submission of an RSC.

Phase Two ESA, Former TTC Access Easement, Part of Lot 4, Concession 5, designated as Part 18 and Part of Part 19 on Registered Plan 65R-37648, Interchange Way, Vaughan, Ontario (Golder, August 2018)

Following the completion of a Phase One ESA at the property in May 2019, Golder conducted a Phase Two ESA for a parcel of undeveloped land to investigate the APEC 1 (#52) associated with the former TTC staging area identified on site.

Two test pits were excavated to a maximum depth of 1.2 mbgs in the APEC. Soil samples were collected from each test pit to assess shallow soil conditions and submitted for laboratory analysis of metals, hydride forming metals, mercury, hexavalent chromium, hot water-soluble boron and petroleum hydrocarbons.

The reported concentration of the contaminants of potential concern in the soil samples analyzed were below the applicable site condition standards. Golder concluded that no further contaminant investigations, risk assessment, or remediation would be required prior to submission of an RSC.

Phase Two ESA, Proposed Linear Park Block, Described as Part of Lot 4, Concession 5,

Designated as Part 4, Part of Part 5, Part 6, Part of Part 8 on Draft Plan, Interchange Way,

Vaughan, Ontario (Golder, August 2018 revised in November 2019)

Following the completion of a Phase One ESA at the property, Golder conducted a Phase Two ESA for a parcel of undeveloped land to assess the five (5) APECs identified on site. A total of six (6) test pits were excavated across the Site to a maximum depth of 1.1 mbgs. Soil samples were collected from each test pit to assess shallow soil conditions and select samples were submitted for laboratory analysis of relevant contaminants of concern for each APEC, including metals, hydride forming metals, mercury, hexavalent chromium, hot water-soluble boron, petroleum hydrocarbons, organochlorine pesticides, nitrate and/or phosphate. A sample was also collected from a stockpile of material of unknown origin and quality in the north of the Phase Two Property. This sample was analyzed for concentrations of metals, other regulated parameters and petroleum hydrocarbons. The Phase Two ESA showed that reported contaminants of concern in the soil samples were below the applicable site condition standards. Golder concluded that no further investigations, risk assessment, or remediation were required prior to submission of an RSC.

# <u>Phase One ESA Update, Proposed Linear Park Block, Described as Part of Lot 4, Concession 5, Designated as Part 6, Part 4, Part of Part 5, Part of Part 8, Interchange Way, Vaughan, Ontario (Golder, November 2019)</u>

A Phase One ESA was carried out by Golder for the property located immediately south of Interchange Way and 207 m east of Exchange Avenue, Vaughan, Ontario in November 2019. Subsequently, Golder carried out a Phase Two ESA for this property in August 2018. The Phase Two ESA investigated the identified APECs through several soil investigations and determined that concentrations of contaminants of concern in the soil samples were below the applicable site condition standards. Golder prepared and submitted an RSC for the Site to the MECP. The initial RSC submission was not accepted by the MECP and Golder prepared a new RSC application. However, due to the Phase One ESA completed more than 18 months ago, a Phase One ESA Update was carried out in accordance with O. Reg. 153/04.

The Phase One update included a site visit on November 1, 2019 to confirm the current site conditions. It was determined that no new PCAs have been identified at the Phase One Property. At the time of the site visit, the Phase One Property consisted of a vacant parcel of underdeveloped land, overgrown with low vegetation. No changes were noted to adjacent land uses, and no obvious PCAs which could contribute to previously identified APECs were noted in the Phase One Study Area. Golder confirmed no further investigations, risk assessment, or remediation are required prior to the submission of an RSC for the property.

#### 3.2 Environmental Source Information

#### 3.2.1 ERIS Environmental and Historical Information

The EcoLog ERIS (ERIS) system provides information from federal, provincial and private source databases relating to a defined search area. Each database is divided into records that present information such as company names, addresses, descriptions, status and other pertinent information. Records that fall within a defined kilometre radius of the search area are extracted from the database for review. A detailed description of the ERIS database is provided in **Appendix A**.

One standard ERIS report was prepared for the Study Area. The search results of the ERIS database identified thirteen (13) records for the Site and seven hundred and thirteen (713) records with known locations within the Study Area. These records are summarized in **Table 1**.

#### Table 1 Ecolog ERIS Records Review Summary

ERIS DATABASE SEARCHED	RESULTS
Automobile Wrecking & Supplies (AUWR)	The ERIS report identified five (5) records within the Study Area:  - Medagh Industrial Recycling Ltd., located at 108 Maplecrete Road (2 records), approximately 170 m north from the Site (east portion of the Study Area) was listed for "Scrap Metals"  - Tal Metal Recycling Inc., located at 11 Creditstone Road, approximately 191 m southeast from the Site (east portion of the Study Area) was listed for "Scrap Metals"  - AA Transmission Kingdom., located at 101 Freshway Drive, approximately 219 m northeast from the Site (east portion of the Study Area) was listed for "Automobile Wrecking and Recycling"  - FT Auto Parts, located at 101 Freshway Drive, approximately 219 m northeast from the Site (east portion of the Study Area) was listed for "Automobile Parts & Supplies-Used and Rebuilt"
Delisted Fuel Tanks (DTNK)	The ERIS report identified fourteen (14) records within the Study Area:  - Canada Hydrant Service, located at 77 Maplecrete Road (2 records), approximately 96 m north of the Site (east portion of the Study Area), was listed for expired FS propane refill centre and FS propane tank, with a record date of up to March 2012.  - 1674770 Ontario Ltd. O/A Gas STN, located at 7800 Jane Street, approximately 204 m northeast of the Site (north portion of the Study Area), was listed for expired FS facility for cylinder exchange, with a record date of up to March 2012.  - MAD Rentals Ltd., located at 71 Peelar Road (3 records), approximately 171 m south of the Site (east portion of the Study Area), was listed for FS expired facility for fuels safety private fuel outlet, with a record date of up to March 2012.  - Active Excavating & Contracting Ltd., located at 150 Creditstone Road (2 records), approximately 218 m north of the Site (east portion of the Study Area), was listed for two records for expired FS facility for fuels safety private fuel outlet and FS piping, with a record date of up to March 2012.  - King Koating Construction Inc., located at 41 Peelar Road (2 records), approximately 182 m south of the Site (east portion of the Study Area), was listed for two records for expired FS facility for FS propane refill center and FS propane tank, with a record date of up to March 2012.  - PT Industrial Electric, located at 33 Peelar Road, approximately 177 m south of the Site (east portion of the Study Area), was listed for two records for expired FS facility for fuels safety private fuel outlet and FS piping, with a record of date up to March 2012.  - A & G Garage, located at 131 Freshway Drive (2 records), approximately 153 m northeast of the Site (east portion of the Study Area), was listed for two records for expired FS facility for fuels safety private fuel outlet and FS piping, with a record of date up to March 2012.  - 1076710 Ontario Inc. Paul Gillespie, located 37 Creditstone Road Unit 7, approximately 128 m southe
List of Expired Fuels Safety Facilities (EXP)	The ERIS report identified four (4) record within the Study Area.  - MAD Rentals Ltd., located at 71 Peelar Road (2 records), approximately 171 m south of the Site (south portion of the Study Area), was listed for expired FS Liquid Fuel tank in 1990.  - Active Excavating and Contracting Ltd., located at 150 Creditstone Road, approximately 218 m north of the Site (east portion of the Study Area), was listed for expired FS Liquid Fuel tank in 1990.  - A & G Garage, located at 131 Freshway Drive, approximately 153 m northeast of the Site (east portion of the Study Area), was listed for expired FS Liquid Fuel tank in 2009. The records also indicated that an underground tank decommissioned – removed underground diesel tank in August 15/03

### Fuel Storage Tank (FST)

The ERIS report identified one (1) record on the Site:

- Toromont Industries Ltd., located at 3131 Highway 7, in the north portion of the Study Area, was listed for a FS liquid fuel tank single wall horizontal UST, installed in 2001.

The ERIS report identified fourteen (14) records within the Study Area.

- CBM located at 31 Maplecrete Road, approximately 88 m south of the Site (east portion of the Study Area), was listed for an active FS liquid fuel tank single wall UST, installed in 1988.
- 2152249 Ontario Inc., located at 7800 Jane Street (4 records), approximately 204 m northeast of the Site (north portion of the Study Area), was listed for one active FS liquid fuel tank single wall fiberglass UST installed in 1991 and FS gasoline station self serve.
- MAD Rentals Ltd., located at 71 Peelar Road (4 records), approximately 171 m south of the Site (east portion of the Study Area), was listed for one active diesel FS liquid fuel tank single wall UST installed in 1977
- Elmford Construction Company Ltd., located at 43 Peelar Road (2 records), approximately 186 m south of the Site (east portion of the Study Area), was listed for one active gasoline FS liquid fuel tank single wall UST installed in 1987.
- Active Excavating and Contracting Ltd., located at 150 Creditstone Road, approximately 218 m north of the Site (east portion of the Study Area), was listed for one diesel FS liquid fuel tank single wall UST installed in 1979.
- McCleave Leasing Div of McCleave Truck Sales, located at 150 Creditstone Road, approximately 218 m north of the Site (east portion of the Study Area), was listed for one active diesel FS liquid fuel tank single wall UST installed in 1982.
- ARG Group Inc., located at 111 Creditstone Road, approximately 124 m northeast of the Site (east portion of the Study Area), was listed for one diesel FS liquid fuel tank single wall UST installed in 1991.

#### Private and Retail Fuel Storage Tanks (PRT)

The ERIS report identified thirteen (13) records within the Study Area.

- A record was listed at Canada Hydrant Service, located at 77 Maplecrete Road, approximately 96 m north of the Site (east portion of the Study Area).
- A 1000 L retail fuel storage tank was listed at Canada Building Materials, located at 1 Maplecrete Road, approximately 88 m south of the Site (east portion of the Study Area), expired in 1993. Also, a 22730 L private fuel storage tank was listed.
- A retail fuel storage tank was listed at Lucy Salazar located at 7800 Jane Street approximately 204 m northeast of the Site (north portion of the Study Area), expired in 1995.
- One private and one retail, 45460 L and 36368 L fuel storage tank was listed at MAD Rentals, located at 71 Peelar Road (2 records), approximately 171 m south of the Site (east portion of the Study Area).
- A private, 45460 L fuel storage tank was listed at Elmford Construction Company, located at 43 Peelar Road, approximately 186 m south of the Site (east portion of the Study Area).
- A retail, 22730 L fuel storage tank was listed at McCleave Leasing Division, located at 150 Creditstone Road, approximately 218 m north of the Site (east portion of the Study Area).
- A private, 9000 L fuel storage tank was listed at Active Excavating & Contracting Ltd, located at 150 Creditstone Road, approximately 218 m north of the Site (the east portion of the Study Area).
- A retail, 500 L fuel storage tank was listed at PT Industrial Electric, located at 33 Peelar Road Unit 3, approximately 177 m south of the Site (east portion of the Study Area), expired in 1993.
- A private, 9092 L fuel storage tank was listed at ARG Construction Enterprise Inc., located at 111 Creditstone Road, approximately 124 m northeast of the Site (east portion of the Study Area).
- A private, 22730 L fuel storage tank was listed at A & G Garage, located at 131 Freshway Drive, approximately 153 m northeast of the Site (east portion of the Study Area).
- A retail, fuel storage tank was listed at 1076710 Ontario Inc., located at 37 Creditstone Road Unit 7, approximately 128 m southeast of the Site (east portion of the Study Area), expired in 1995.
- A retail fuel storage tank was listed at Canada Oxygen Ltd., located at 11 Creditstone Road, approximately 191 m southeast of the Site (east portion of the Study Area), expired in 1994.

Retail Fuel Storage	The ERIS report identified three (3) record within the Study Area.
Tanks (RST)	- A diesel fuel storage tank record was listed for FOBS Petroleum, located at 7581 Jane Street, approximately 91 m north of the Site (east portion of the Study Area).
	- An oil fuel storage tank record was listed for Universal Bio Gas Solution, located at 7581 Jane Street, approximately 91 m north of the Site (east portion of the Study Area).
	- A propane fuel storage tank record was listed for Canadian Rental Centres, located at 91B Maplecrete Road, approximately 144 m north of the Site (east portion of the Study Area).
Fuel Storage Tank –	The ERIS report identified two (2) records on the Site:
Historic (FSTH)	- Toromont Industries Ltd., located at 3131 Highway 7 (2 records), in the north portion of the Study Area, was listed for two records for active diesel liquid fuel single wall AST installed in 2001.
	The ERIS report identified twelve (12) records within the Study Area.
	- CBM located at 1 Maplecrete Road (2 records), approximately 88 m south of the Site (east portion of the Study Area), was listed for two records for an active diesel liquid fuel single wall AST, installed in 1988.
	- 1403785 Ontario Ltd. O/A Gas Stn, located at 7800 Jane Street, approximately 204 m northeast of the Site (north portion of the Study Area), was listed for gasoline liquid fuel single wall UST, installed in 1991.
	- Murtaza Alibhai O/A Gas Stn, located at 7800 Jane Street, approximately 204 m northeast of the Site (north portion of the Study Area), was listed for active liquid fuel single wall AST, installed in 1991.
	- MAD Rentals Ltd., located at 71 Peelar Road (2 records), approximately 171 m south of the Site (east portion of the Study Area), was listed for two records for active liquid fuel single wall UST, installed in 1990.
	- Elmford Construction Company Ltd., located at 43 Peelar Road (2 records), approximately 186 m south of the Site (east portion of the Study Area), was listed for two records for active diesel liquid fuel single wall UST, installed in 1987.
	- McCleave Leasing Div of McCleave Truck Sales, located at 150 Creditstone Road (2 records), approximately 218 m north of the Site (east portion of the Study Area), was listed for two records for active diesel liquid fuel single wall AST, installed in 1991.
	- ARG Group Inc., located at 111 Creditstone Road (2 records), approximately 124 m northeast of the Site (east portion of the Study Area), was listed for two records for active gasoline liquid fuel single wall UST, installed in 1991.
Variances for	The ERIS report identified one (1) record on the Site:
Abandonment of Underground Storage Tanks (VAR)	- Toromont Industries Ltd., located at 3131 Highway 7 (north portion of the Study Area), was listed for two records for abandoned UST, in 2000.
Fuel Oil Spills and	The ERIS report identified three (3) records within the Study Area:
Leaks (INC)	- Shell Canada Gas Station located at 7800 Jane Street, approximately 204 m northeast of the Site (north portion of the Study Area), was listed for small Liquid petroleum gasoline spill when customer pulled out nozzle at gas station in April 10 2015.
	- 2152249 Ontario Inc., located at 7800 Jane Street, approximately 204 m northeast of the Site (north portion of the Study Area), was listed for FS incident at the gas station on April 6, 2015.
	- Canadian Curtis Refrigeration, located at 3200 Highway 7 Unit 3, approximately 178 m west of the Site (north portion of the Study Area), was listed for natural gas FS vapour release on February 11, 2016.

Ontario Regulation 347 Waste Generators Summary (GEN) The ERIS report identified sixty-seven (67) records on the Site:

- Toromont, located at 3131 Highway 7 West (13 records), in the north portion of the Study Area, was listed for thirteen records for the generation, use, and/or storage of miscellaneous wastes and organic chemicals, acid solutions-containing heavy metals, waste crankcase oils and lubricants, detergents and soaps, waste oils/sludges (petroleum based), amines, aliphatic and aromatic solvents and residues, light fuels, waste compressed gases including cylinders, waste from the use of pigments, coatings and paints, alkaline wastes, petroleum distillates, and oil skimmings and sludges from 1999 to 2021.
- Coffey Geotechnics Inc., located at 3131 Highway 7 West, in the north portion of the Study Area, was listed for the generation, use, and/or storage of oil skimmings and sludges in 2010.
- Starview Equip. Repair Ltd., located at 53 Maplecrete Road, Unit 1A (3 records), in the east portion of the Study Area, was listed for three records for the generation, use, and/or storage of waste oils and lubricants from 1986 to 1998.
- Gianeff Excavating Contractors, located at 53 Maplecrete Road, Unit C, in the east portion of the Study Area, was listed for the generation, use, and/or storage of undefined substances from 1986 to 1994.
- David Hart Industries Inc., located at 53B Maplecrete Road, in the east portion of the Study Area, was listed for the generation, use, and/or storage of petroleum distillates and waste oils and lubricants from 1992 to 1997.
- Canadian Pipeline Cleaning Inc., located at 53B Maplecrete Road (2 records), in the east portion of the Study Area, was listed for two records for the generation, use, and/or storage of petroleum distillates, polymeric wastes and waste oils and lubricants from 1998 to 2004.
- Rayhaz Express Inc., located at 53B Maplecrete Road (3 records), in the east portion of the Study Area, was listed for three records for the generation, use, and/or storage of waste oils and lubricants from 2007 to 2010.
- Blue Star Construction Corp., located at 35 Maplecrete Road (10 records), in the east portion of the Study Area, was listed for ten records for the generation, use, and/or storage of waste oils and lubricants, petroleum distillates, waste crankcase oils and lubricants from 2010 to 2021.
- Permashell Corporation Ltd., located at 33 Maplecrete Road (5 records), in the east portion of the Study Area, was listed for five records for the generation, use, and/or storage of paint/pigment/coating residues from 1986 to 2001.
- Ucel Inc., located at 33 Maplecrete Road (3 records), in the east portion of the Study Area, was listed for three records for the generation, use, and/or storage of waste compressed gases, petroleum distillates, acid waste, waste oils and lubricants in 2015 and 2016.
- Metro Hoisting and Erecting Ltd., located at 66 Creditstone Road, in the east portion of the Study Area, was listed for the generation, use, and/or storage of petroleum distillates from 2002 to 2004.
- Madagh Industrial Recycling Ltd., located at 66 Creditstone Road, in the east portion of the Study Area, was listed for the generation, use, and/or storage of trucks in 2004.
- Mobile Climate Control Industries Inc., located at 7540 Jane Street (12 records), in the east portion of the Study Area, was listed for the manufacturing of waste oils and lubricants, waste compressed gases, acid waste-heavy metals, alkaline wastes-heavy metals, paint/pigment/coating residues, aromatic solvents, aliphatic solvents and oil skimmings and sludges in 2007 to 2021.
- ND Graphics Inc., located at 55 Interchange Way (10 records), in the west portion of the Study Area, was listed for ten records for the generation, use, and/or storage of petroleum distillates, photo processing wastes, wastes from use of pigments, coatings and paints, waste compressed gases including cylinders, waste crankcase oils and lubricants, petroleum distillates from 2009 to 2021
- 2748355 Canada Inc., located at 55 Interchange Way, in the west portion of the Study Area, was listed for the generation, use, and/or storage of inert inorganic wastes in 2013.

The ERIS report identified three hundred and sixty-one (361) records within the Study Area:

- Sport City Promotions, located at 7581 Jane Street (2 records), approximately 245 m north of the Site (east portion of the Study Area), was listed for the generation of petroleum distillates from 1997 to 2004.
- BOT Construction Limited, located at Jane Street and Peelar Road (2 records), approximately 12 m south of the Site (east portion of the Study Area), was listed for the generation of petroleum distillates and waste oils and lubricants from 1993 to 1998.

- Maksteel Concord, located at 215 Doughton Road (2 records), approximately 212 m north of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of waste oils and lubricants, petroleum distillates, oil skimmings and sludges from 2000 to 2001.
- Norbel Metal Service Ltd., located at 215 Doughton Road (2 records), approximately 212 m north of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of petroleum distillates, waste oils and lubricants from 1986 to 1998.
- Direct Steel Inc., located at 215 Doughton Road (2 records), approximately 212 m north of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of petroleum distillates, waste oils and lubricants from 1992 to 1999.
- Mak Steel, located at 215 Doughton Road, approximately 212 m north of the Site (east of the Study Area), was listed for the generation, use, and/or storage of petroleum distillates, waste oils and lubricants from 1998 to 2001.
- Proactive Metal, located at 215 Doughton Road, approximately 212 m north of Site (east portion of the Study Area), was listed for the generation, use, and/or storage of petroleum distillates, oil skimmings and sludges and waste oils and lubricants from 2001 to 2005.
- Four Season 1st Choice Landscape and Construction, located at 215 Doughton Road, approximately 212 m north of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of waste oils and lubricants, oil skimmings and sludges, organic laboratory chemicals, waste compressed gases, polymeric resins, light fuels, other polymeric wastes, emulsified oils, and paint/pigment/coating residues in 2015.
- HI-WAY Hydraulics Limited, located at 112 Maplecrete Road Unit B (9 records), approximately 226 m north of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of petroleum distillates, and waste oils and lubricants from 1986 to 2012.
- Medagh Industrial Supplies Ltd., located at 108 Maplecrete Road (10 records), approximately 170 m north of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of oil skimmings and sludges, waste oils and lubricants, and waste crankcase oils and lubricants from 2002 to 2018.
- Unique Concord Holdings Corporation, located at 7551 Jane Street (11 records), approximately 65 m north of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of waste crankcase oils and lubricants, brine (chlor-alkali sludges), aliphatic solvents and residues, aliphatic solvents, paint/pigment/coating residues, waste oils and lubricants from 1999 to 2021.
- Truetech Medical Inc., located at 146 Peelar Road (3 records), approximately 104 m south of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of skimming and sludges, waste oils and lubricants from 1986 to 1998.
- AMCO Precision Inc., located at 146 Peelar Road (3 records), approximately 104 m south of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of emulsified oils from 2014 to 2016.
- Select Flooring and Wood Products, located at 126A Peelar Road, Unit 1, approximately 110 m south of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of paint/pigment/coating residues in 2000 and 2001.
- Irpinia Kitchen Cabinets, located at 114 Peelar Road, approximately 85 m south of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of paint/pigment/coating residues from 1997 to 2001.
- Oxford Picture Frame Limited, located at 114 Peelar Road, approximately 85 m south of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of household furniture manufacturing in 2003 and 2004.
- Con-tractor Ltd., located at 11 Maplecrete Road, approximately 204 m southeast of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of waste oils and lubricants in 2004 to 2006.
- City Paving 89 Inc., located at 91 Maplecrete Road, approximately 144 m north of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of light fuels in 2005.
- Concrete Art Features Ltd., located at 91 Maplecrete Road, Unit B, approximately 144 m north of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of acid waste in 2006.

- 207875 Ontario Limited, located at 91B Maplecrete Road (8 records), approximately 144 m north of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of waste oils and lubricants, oil skimmings and sludges, waste oils and sludges (petroleum based), and waste crankcase oils and lubricants from 2012 to 2021.
- David Hart Industries Inc., located at 77 Maplecrete Road (2 records), approximately 96 m north of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of petroleum distillates, and waste oils and lubricants in 1988 to 1998.
- Ontario Power Contracting Limited, located at 77 Maplecrete Road (2 records), approximately 96 m north of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of waste oils and lubricants from 1997 to 2001.
- Vaughan Paving Ltd., located at 69 Maplecrete Road (2 records), approximately 63 m north of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of waste oils and lubricants from 1994 to 1999.
- Concord Truck Center Ltd., located at 69 Maplecrete Road, approximately 63 m north of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of aliphatic solvents, petroleum distillates and waste oils and lubricants from 1998 to 2001.
- Roni Excavating Limited, located at 69 Maplecrete Road, approximately 63 m north of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of waste oils and lubricants from 1999 to 2004.
- 1243116 Ontario Ltd., located at 69 Maplecrete Road, approximately 63 m north of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of motor vehicle substances in 2004.
- 1522854 Ontario Incorporated, located at 69 Maplecrete Road (6 records), approximately 63 m north of the Site (east portion of the Study Area), was listed for six records for the generation, use, and/or storage of waste oils and lubricants, waste crankcase oils and lubricants from 2013 to 2021.
- Trader Machinery Inc., located at 63 Maplecrete Road, approximately 53 m north of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of waste oils and lubricants from 2003 to 2009.
- Infinity Asset Solutions Inc., located at 63 Maplecrete Road (7 records), approximately 53 m north of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of waste oils and lubricants, waste crankcase oils and lubricants from 2008 to 2021.
- Bauer Foundations Canada Inc., located at 3150 Highway 7 West, approximately 96 m northeast of the Site (north portion of the Study Area), was listed for the generation, use, and/or storage of undefined substances in 2012.
- Carllion Canada Inc., located at 3150 Highway 7 West, approximately 96 m northeast of the of Site (north portion of the Study Area), was listed for the generation, use, and/or storage of paint/pigment/coating residues, oil skimmings and sludges, inorganic laboratory chemicals, waste oils and lubricants, organic laboratory chemicals and detergents/soaps in 2016
- Toronto Transit Commission, located at 3150 Highway 7 (3 records), approximately 96 m northeast of the Site (north portion of the Study Area), was listed for the generation, use, and/or storage of inert organic wastes, alphatic solvents and residues, and waste oils/sludges (petroleum based) from 2018 to 2021.
- Mircom Technologies Ltd., located at 25 Interchange Way (11 records), approximately 98 m north of the Site (west portion of the Study Area), was listed for the generation, use, and/or storage of aliphatic solvents, waste oils and lubricants from 2001 to 2019.
- Norak Steel Constuction Ltd., located at 44 Creditstone Road (15 records), approximately 92 m south of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of waste oils and lubricants, aromatic solvents, paint/pigment/coating residues from 1989 to 2010.
- Shell Canada Products, located at 7800 Jane Street (5 records), approximately 204 m northeast of the Site (north portion of the Study Area), was listed for the generation, use, and/or storage of light fuels from 2006 to 2018.
- Imperial Air Compressor, located at 91 Peelar Road, Unit 3 (2 records), approximately 193 m north of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of automotive repair substances in 2011 to 2012.

- ATA Woodworking Ltd., located at 91 Peelar Road, approximately 193 m north of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of aromatic solvents, waste oils and lubricants and oil skimmings and sludges in 2014.
- HiTech Structure Inc., located at 79 Peelar Road (10 records), approximately 192 m south of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of waste oils and lubricants and waste crankcase oils and lubricants from 2010 to 2021.
- MAD Rentals Limited, located at 71 Peelar Road (2 records), approximately 171 m south of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of waste oils and lubricants from 1988 to 2004.
- Elmford Construction Co. Ltd., located at 71 Peelar Road (3 records), approximately 171 m south of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of waste oils and lubricants from 1999 to 2001.
- Formcrete 1994 Ltd., located at 71 Peelar Road, approximately 171 m south of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of waste oils and lubricants in 2002 to 2004
- Angel Tours and Entertainment Inc., located at 71 Peelar Road, approximately 171 m south of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of waste oils/sludges (petroleum based) and waste crankcase oils and lubricants in 2018.
- Ikea, located at 200 Interchange Way (11 records), approximately 78 m south of the Site (west portion of the Study Area), was listed for the generation, use, and/or storage of alkaline wastes-heavy metals, paint/pigment/coating residues from 2004 to 2020.
- AMC Entertainment International Inc., located at 30 Interchange Way (3 records), approximately 89 m north of the Site (west portion of the Study Area), was listed for the generation, use, and/or storage of aliphatic solvents from 2009 to 2012.
- Canadian Theatre Installation Group, located at 30 Interchange Way, approximately 89 m north of the Site (west portion of the Study Area), was listed for the generation, use, and/or storage of waste compressed gases, paint/pigment/coating residues, waste oils and lubricants, organic laboratory chemicals, oil skimmings and sludges and petroleum distillates in 2014.
- Arborea Wood Products Inc., located at 43 Peelar Road, Unit 2, approximately 186 m south of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of waste oils and lubricants in 1999 to 2001.
- Aluma Systems Canada Inc, located at 43 Peelar Road, Unit 1, approximately 186 m south of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of petroleum distillates in 2001.
- Modu-Scaf Inc., located at 43 Peelar Road, Unit 1, approximately 186 m south of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of petroleum distillates in 2002 to 2004.
- Hydra Nor International Ltd., located at 43 Peelar Road Unit 1 (13 records), approximately 186 m south of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of waste oils and lubricants, petroleum distillates and alkaline wastes from 2013 to 2016.
- Cleargreen Forestry Products Inc., located 43 Peelar Road Unit 2 (2 records), approximately 186 m south of the Site (east portion of the Study Area), was listed the generation, use, and/or storage of forest nurseries and gathering of forest products in 2012.
- McCleave Leasing, located at 150 Creditstone Road (2 records), approximately 218 m north of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of petroleum distillates and waste oils and lubricants from 1989 to 1997.
- Total Meter Service Inc., located at 150 Creditstone Road, approximately 218 m north of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of petroleum distillates, light fuels, oil skimming and sludges and waste oils and lubricants from 1993 to 2008.
- Active Excavating, located at 150 Creditstone Road (3 records), approximately 218 m north of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of waste oils and lubricants from 1994 to 2004.

- Diker Investments Inc., located at 150 Creditstone Road, approximately 218 m north of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of light fuels and oil skimmings and sludges in 2005.
- Total Meter Service Inc., located at 150 Creditstone Road (2 records), approximately 218 m north of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of petroleum distillates, light fuels, oil skimmings and sludges and waste oils and lubricants in 2009 to 2010.
- Dicrete Construction Ltd., located at 138 Creditstone Road, approximately 162 m north of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of waste oils and lubricants from 2002 to 2004.
- Lancorp Construction Co. Ltd., located at 138 Creditstone Road (12 records), approximately 162 m north of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of waste oils and lubricants and waste crankcase oils and lubricants from 2003 to 2021.
- Canadian Concrete Forming Ltd., located at 100 Creditstone Road (6 records), approximately 92 m north of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of waste oils and lubricants, and waste crankcase oils and lubricants from 2005 to 2020.
- Star Concrete Pumping Inc., located at 100 Creditstone Road (9 records), approximately 92 m north of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of waste oils and lubricants from 2007 to 2016.
- Petro Canada, located at 120 Creditstone Blvd. (2 records), approximately 104 m north of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of light fuels from 2010 to 2011
- Suncor Energy, located at 120 Creditstone Road (8 records), approximately 104 m north of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of light fuels from 2012 to 2021.
- Stinson Equipment Ltd., located at 130 Creditstone Road (8 records), approximately 144 m north of Site (east portion of the Study Area), was listed for the generation, use, and/or storage of graphic art wastes, alkaline wastes-heavy metals, aromatic solvents, detergents/soaps, acid waste-heavy metals, light fuels from 2005 to 2016.
- 107 King Koating Roofing Inc., located at 41 Peelar Road (2 records), approximately 182 m south of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of waste oils and lubricants in 2012 to 2014.
- Pro Caissons Ltd., located at 95 Creditstone Road (2 records), approximately 167 m northeast of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of waste oils and lubricants from 1992 to 1998.
- Second Skin Garment Company, located at 60 Creditstone Road, approximately 48 m south of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of alkaline wastes and detergent soaps in 2009.
- RI-GO Lift Truck Ltd., located at 33 Peelar Road (3 records), approximately 177 m south of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of petroleum distillates, oil skimmings and sludges, waste oils and lubricants from 1986 to 1998.
- E.R.P Savini Construction Company Ltd., located at 22 Creditstone Road (6 records), approximately 150 m south of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of waste oils and lubricants and light fuels from 1997 to 2014.
- A.R.G Group Inc., located at 111 Creditstone Road (15 records), approximately 124 m northeast of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of waste oils and lubricants, light fuels and waste crankcase oils and lubricants from 2012 to 2021.
- Industrial Composites Inc., located at 85 Creditstone Road, approximately 70 m northeast of the Sie (east portion of the Study Area), was listed for the generation, use, and/or storage of undefined substances in 2003 and 2004.
- Marino S Auto Repair Ltd., located at 85 Creditstone Road (8 records), approximately 70 m northeast of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of oil skimmings and sludges, waste oils/sludges (petroleum based) from 2012 to 2021.

- J.R. Contracting Property Service Ltd., located at 144 Freshway Drive, approximately 228 m northeast of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of waste oils and lubricants from 1998 to 2001.
- QMB Barrier Systems, located at 144 Freshway Drive Unit 2 (12 records), approximately 228 m northeast of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of waste oils and lubricants, waste crankcase oils and lubricants from 2006 to 2021.
- Froma-Con Construction, located at 149 Freshway Road (4 records), approximately 179 m northeast of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of organic laboratory chemicals, paint/pigment/coating residues, polymeric wastes, inorganic laboratory chemicals, halogenated solvents, aromatic solvents, waste oils and lubricants and graphic art wastes from 2016 to 2018.
- BE-RAM MFG LTD., located at 71 Creditstone Road (2 records), approximately 52 m east of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of petroleum distillates from 1986 to 1998.
- Trans Power Utility Contractors Inc., located at 71 Creditstone Road (2 records), approximately 52 m east of the of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of waste oils and lubricants from 1996 to 2004.
- Dicrete Construction Ltd., located at 71 Creditstone Road (12 records), approximately 52 m east of the Site (east portion of the Study Area), was listed the generation, use, and/or storage of waste oils and lubricants, waste crankcase oils and lubricants and waste oils/sludges (petroleum based) from 2009 to 2021.
- York Disposal Services Ltd., located at 131 Freshway Drive (5 records), approximately 153 m northeast of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of waste oils and lubricants and petroleum distillates from 1986 to 2004.
- Ford On-Site Services Ltd., located at 131 Freshway Drive (7 records), approximately 153 m northeast of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of oil skimmings and sludges, pathological wastes from 2013 to 2021.
- BIK Hydraulics & Welding Co. Ltd., located at 37 Credistone Road Unit 6 (2 records), approximately 128 m southeast of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of aliphatic solvents from 1993 to 2001.
- Clintar Groundskeeping Services, located at 23 Creditstone Road Unit 3 (2 records), approximately 158 m southeast of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of waste oils and lubricants from 2002 to 2004.
- Gateway Landscaping and Snow Removal Ltd., located at 23 Creditstone Road Unit 3 (2 records), approximately 158 m southeast of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of waste oils and lubricants from 2003 to 2009.
- Longyear Canada Inc., located at 11 Creditstone Road (3 records), approximately 191 m southeast of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of petroleum distillates, light fuels, waste oils and lubricants from 1986 to 1998.
- Jon-Ed Limited, located at 11 Creditstone Road Unit 13 (2 records), approximately 191 m southeast of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of waste oils and lubricants from 1992 to 1996.
- Pumpcrete Rental Corp., located at 11 Creditstone Road Unit 2 (2 records), approximately 191 m southeast of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of waste oils and lubricants from 1986 to 1998.
- Jovis Construction Limited, located at 11 Creditstone Road Unit 4-5-6 (3 records), approximately 191 m southeast of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of petroleum distillates from 1988 to 1998.
- Anpro Excavating Contractors Ltd., located at 11 Creditstone Road Unit 3 (3 records), approximately 191 m southeast of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of waste oils and lubricants from 1988 to 1998.
- Linde Canada Limited, located at 11 Creditstone Road Unit 1, approximately 191 m southeast of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of waste compressed gases from 2007 to 2008.

	- Maksteel Ltd., located at 215 Doughton Road (2 records), approximately 212 m north of the Site, was listed for manufacturing of miscellaneous fabricated metal products, established in 1988.
	- Graceland Furniture Ltd., located at 7581 Jane Street Unit 9, approximately 91 m north of the Site, was listed for manufacturing of upholstered household furniture.
	- Specialty Dental Products Ltd., located at 7581 Jane Street Unit 5-6 (2 records), approximately 91 m north of the Site, was listed for manufacturing of medical equipment and supplies, established in 1990.
	The ERIS report identified sixty-eight (68) records within the Study Area.
	- Accolade Reaction Promotion, located at 55 Interchange Way Unit 4, was listed for management consulting services and wholesale distributor, established in 1994.
	- Mobile Climate Control, located at 7540 Jane Street, was listed for manufacturing of motor vehicle electrical and electronic equipment established in 1983.
	- Dynahyd Roll Off Systems Ltd., located at 33 Maplecrete Road, was listed for manufacturing of material handling equipment, ornamental and architectural metal product, and commercial and service industry machinery, established in 1962.
	- Now & Associates, located at 35 Maplecrete Road, was established in 1972.
Directory (SCT)	- Toromont Industries Ltd., located at 3131 Highway 7 (3 records), was listed for manufacturing of automotive parts and accessories, engine and power transmission.
Scott's Manufacturin	The ERIS report identified one-hundred and seven (7) records within the Site:
,	- Mobile Climate Control Industries Inc., located at 7540 Jane Street, was listed six (6) times for manufacturing of motor vehicle parts with release of chromium from 2013 to 2015.
Release Inventory (NPRI)	- Toromont Industries Ltd., located at 3131 Highway 7, was listed seven (7) times under automotive repair and maintenance activities for release of particulate matter from 2005 to 2010.
National Pollutant	The ERIS report identified 13 records within the Site:
	- Tom Miletich, located at 101 Freshway Drive Unit 70, approximately 219 m northeast of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of undefined substances in 2011.
	- Malfara & Sons Excavating & Control Ltd., located at 101 Freshway Drive Unit 73, approximately 219 m northeast of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of waste oils and lubricants from 2003 to 2006.
	- Magine Contractors Inc., located at 101B Freshway Drive Unit 28, approximately 219 m northeast of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of waste oils and lubricants from 1995 to 1998.
	- Gordpatrick, located at 101 Freshway Drive Unit 74 (2 records), approximately 219 m northeast of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of waste oils and lubricants and petroleum distillates from 1992 to 1998.
	- Palmisano Construction Co. Ltd., located at 101 Freshway Drive Unit 74 (2 records), approximately 219 m northeast of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of waste oils and lubricants and petroleum distillates from 1986 to 1996.
	- Malfara & Sons Excavating Limited, located at 101 Freshway Drive Unit 73 (4 records), approximately 219 m northeast of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of waste oils and lubricants from 1988 to 2001.
	- Amni Construction Inc., located at 101 Freshway Drive Unit 18 (16 records), approximately 219 m northeast of the of Site (east portion of the Study Area), was listed the generation, use, and/or storage of waste oils and lubricants, waste crankcase oils and lubricants from 2011 to 2021.
	Absolute Interior Inc., located at 11 Creditstone Road Unit 1, approximately 191 m southeast of the Site (east portion of the Study Area), was listed for the generation, use, and/or storage of aliphatic wastes in 2014.

- Direct Steel Inc., located at 215 Doughton Road, approximately 212 m north of the Site, was listed for manufacturing of steel foundries in 1988.
- Proactive Metal Ltd., located at 215 Doughton Road, approximately 212 m north of the Site, was listed for SCT and established in 1988.
- Surlite Glass Ltd., located at 215 Doughton Road, approximately 212 m north of the Site, was listed in manufacturing of glass products, ornamental and architectural metal, lumber distributor and metal service center, established in 1994.
- Optech Inc., located at 300 Interchange Way (2 records), approximately 70 m south of the Site, was listed for manufacturing of navigational and guidance instruments, radio and television equipment, mining and oil and gas field machinery, established in 1974.
- Highway Hydraulics Ltd., located at 112 Maplecrete Road, approximately 226 m north of the Site, was listed for fluid power cylinders and actuators, established in 1982.
- Franmar Starters & Alternators Ltd., located at 112 Maplecrete Road Unit B (2 records), approximately 226 m north of the Site, was listed for manufacturing of motor vehicle electrical and electronic equipment, established in 1985.
- Rapid Pallet Limited, located at 146 Peelar Road, approximately 104 m south of the Site, was listed for manufacturing of wood container and pallet.
- Amco Precision Inc., located at 146 Peelar Road, approximately 104 m south of the Site, was listed for machine shop, established in 1986.
- Altwood Garage Doors Ltd., located at 126A Peelar Road, approximately 110 m south of the Site, was listed for millwork, established in 1983.
- Markwood Garage Door Inc., located at 126A Peelar Road, approximately 110 m south of the Site, was listed for manufacturing of wood and metal window and door, established in 1997.
- Irpinia Kitchens, located at 114 Peelar Road (3 records), approximately 85 m south of the Site, was listed for manufacturing of wood kitchen cabinet and countertop, and institutional furniture, established in 1985.
- Real Steel Industries Inc., located at 63 Maplecrete Road, approximately 53 m north of the Site, was listed for manufacturing of fabricated metal products, established in 1992.
- Trader Machinery Inc., located at 63 Maplecrete Road, approximately 53 m north of the Site, was listed for industrial machinery, equipment and supplies wholesale, established in 1993.
- Mircom Technologies Ltd., located at 25 Interchange Way (2 records), approximately 98 m north of the Site, was listed for manufacturing of communication equipment, established in 1960.
- Dynahyd Equipment Limited, locatd at 31 Maplecrete Road (2 records), approximately 31 m south of the Site, was listed for manufacturing of industrial and commercial machinery and equipment, established in 1962.
- Norak Steel Construction Ltd., located at 44 Creditstone Road (2 records), approximately 92 m south of the Site, was listed for manufacturing of plate work and fabricated structural product, established in 1964
- Canadian Curtis Refrigeration, located at 3200 Highway 7, approximately 178 m west of the Site, was listed as industrial machinery, equipment and supplies distributor, established in 1934.
- Urban Construction Equipment Ltd., located at 122 Creditstone Road (4 records), approximately 117 m north of the Site, was listed for overhead travelling cranes, hoists and monorail systems, established in 1955.
- Comus Precast Ltd., located at 90 Creditstone Road, approximately 53 m north of the Site, was listed for concrete product manufacturing.
- DCS Comus International, located at 90 Creditstone Road (2 records), approximately 53 m north of the Site, was listed for SCT, established in 2000.
- Hydra Nor International Ltd., located at 43 Peelar Road Unit 1 (2 records), approximately 186 m south of the Site, was listed twice as equipment and supplies distributor, and manufacturing of general purpose machinery, established in 1988.
- Williams Equipment Inc., located at 43 Peelar Road Unit 1, approximately 186 m south of the Site, was listed for manufacturing of material handling equipment, pump and compressor, industrial machinery equipment and supplies and motor vehicle body, established in 1987.

iue		
	- Total Meter Services Inc., located at 150 Creditstone Road, approximately 218 m north of the Site, was listed for manufacturing of measuring, medical and controlling devices, material handling equand industrial machinery, equipment and wholesale distributor, established in 1983.	ipment
	- Contractors Equipment Service, located at 100 Creditstone Road, approximately 92 m north of the Site, was listed for commercial and industrial machinery and equipment and machine shop, estab 1971.	olished in
	- Stinson Equipment Limited, located at 130 Creditstone Road, approximately 144 m north of the Site, was listed for manufacturing of motor home, travel trailer and camper, fabricated metal and sig manufacturing, established in 1963.	jn
	- Steimle Steel Corporation, located at 41 Peelar Road, approximately 182 m south of the Site, was listed for industrial process furnaces and ovens, sheet metal work and general industrial and machi equipment, established in 1979.	inery
Scott's Manufacturing	- Industrial Composites Inc., located at 85 Creditstone Road (2 records), approximately 70 m northeast of the Site, was listed for plastic product manufacturing, established in 1988.	
Directory (SCT)	- Nature's Call Ltd., located at 131 Freshway Drive, approximately 153 m northeast to the Site, was listed for commercial and industrial machinery and equipment, waste treatment and disposal and w management services, established in 1989.	/aste
	- Henry Rotberge Steel Construction Ltd., located at 55 Creditstone Road (3 records), approximately 99 m east of the Site, was listed for fabricated structural metal, established in 1955.	
	- Kingstream Inc., located at 27 Creditstone Road Unit 4, approximately 128 m south of the Site, was listed for manufacturing of transportation equipment, established in 1992.	
	- Flat Marble and Granite Ltd., located at 37 Creditstone Road Unit 9, approximately 128 m southeast of the Site, was listed for manufacturing of non-metallic mineral product, established in 1999.	
	- Spectrum Signs and Graphics, located at 37 Creditstone Road Unit 1A, approximately 128 m southeast of the Site, was listed for printing, coating, engraving, heat treating and allied activities, estable 2003.	lished in
	- Excaliber Metal Precision Inc., located at 11 Creditstone Road Unit 5-6, approximately 191 m southeast of the Site, was listed for machine shops, and industrial mold manufacturing, established in 196	87.
	- Kear Farbrication Inc., located at 11 Creditstone Road Unit 429, approximately 191 m southeast of the Site, was listed for manufacturing of material handling equipment and other industrial machine established in 1998.	ery,
	- Alex Steel Company Ltd., located at 101 Freshway Drive Unit 4, approximately 232 m northeast of the Site, was listed for iron and steel mills and ferro-alloy manufacturing, established in 1985.	
	- Pribusin Inc., located at 101 Freshway Drive Unit 57, approximately 219 m northeast of the Site, was listed for manufacturing of measuring, medical and controlling devices, and radio and television broadcasting and wireless communication equipment, established in 1980.	
	- Sam's Woodworking & Turning, located at 101 Freshway Drive Unit 69D, approximately 219 m northeast of the Site, was listed for millwork, office and store fixtures, established in 1987.	
	- Donpar Roofing Ltd., located at 101 Freshway Drive Unit 64, approximately 219 m northeast of the Site, was listed for roofing services, established in 1982.	
	- Bosna Carpentry Custom Desing, located at 101 Freshway Drive Unit B68, approximately 219 m northeast of the Site, was listed for wood household furniture, established in 1975.	
	- A.I.D 2000 Inc., located at 101 Freshway Drive (2 records), approximately 219 m northeast of the Site, was listed for manufacturing of office and household furniture, established in 1983.	
	- MHI Inc., located at 101 Freshway Drive Unit 58-59, approximately 219 m northeast of the Site, was listed for manufacturing of wood window and doors, established in 2000.	
	- Aero-Hill Engine Rebuilders Inc., located at 101 Freshway Drive Unit 14, approximately 219 m north of the Site, was listed for manufacturing of motor vehicle engine parts, established in 1986.	
	- United Railing Ltd., located at 101 Freshway Drive Unit 24B, approximately 219 m northeast of the Site, was listed for manufacturing of ornamental and architectural metal products, established in 19	968.
	- E.R.T., located at 101 Freshway Drive Unit 25, approximately 219 m northeast of the Site, was listed for manufacturing of fabricated metal products and ornamental and architectural metal products, established in 1999.	,

nue	
	- Aero-Hill Engine Rebuilders, located at 101 Freshway Drive Unit 14 (2 records), approximately 219 m northeast of the Site, was listed for manufacturing of motor vehicle engine parts, established in 1986.
	- United Railing & Iron Works, located at 101 Freshway Drive Unit 24, approximately 219 m northeast of the Site, was listed for manufacturing of ornamental and architectural metal products, established in 1968.
Ontario Spills (SPL)	The ERIS report identified four (4) records at the Site:
	- One record was identified at the 3131 Highway 7, on the north portion of the Study Area. The record identified motor oil dumped to ground which was contained and cleaned but possible impact to soil in 2002.
	- One record was identified at the Highway 7 and Millway Avenue (3 records), in the north portion of the Study Area. The record identified truck diesel fluid spill into catch basin with possible impact to environment in 2002.
	The ERIS report identified fourty seven (47) records within the Study Area.
	- One record identified black liquid wastewater discharge to watercourse in 1990 with confirmed impact to environment at the Black Creek running through Jane and Doughton Road (22 records), approximately 202 m east of the Site, on the north portion of the Study Area.
	- One record was identified at the sanitary sewer system at 7581 Jane Street, approximately 91 m north of the Site, in the east portion of the Study Area for wastewater discharge to watercourse in 1994, with possible impact to environment.
	- One record was identified at the Black Creek near Peelar Road and Jane Street, 12 m south of the Site, in the east portion of the Study Area. Record identified 25 L of oil dumped in the creek with possible environmental impact in 1990.
	- One record was identified at Jane Street and Highway 7 (9 records), approximately 206 m east of the Site, in the north portion of the Study Area. The record identified waste oil spill to settling pond in 1988.
	- One record was identified at the stormsewer outfall at Black Creek near Peelar Road (2 records), approximately 151 m south of the Site, in the east portion of the Study Area. The record identified a spill of purple coloured fluid into storm sewer outfall with possible impact to environment in 1999.
	- One record was identified at 77 Maplecreek Road, approximately 96 m north of the Site, in the east portion of the Study Area. The record identified of overflowing septic with possible impact to environment in 2005.
	- One record was identified at 53A Maplecrete Road, approximately 24 m north of the Site, in the east portion of the Study Area. The record identified diesel spill with possible impact to environment in 1999.
	- One record was identified at 3150 Highway 7, approximately 96 m northeast of the Site, in the north portion of the Study Area. The record identified a spill from oil separator with confirmed impact to soil in 2012.
	- One record was identified at Shell Canada gas station located at 7800 Jane Street (2 records), approximately 204 m northeast of the Site, in the north portion of the Study Area. The record identified a pipe/hose leak that caused gasoline spill to asphalt in 1988, no impact to environment was identified.
	- One record was identified at 200 Interchange Way, approximately 78 m south of the Site, in the west portion of the Study Area. The record identified a spill of 5 L of truck diesel spill to parking lot in 2020.
	- One record was identified at 150 Creditstone Road, approximately 218 m north of the Site, in the east portion of the Study Area. The record identified a spill fuel oil spill to parking lot which was contained and cleaned with possible impact to environment in 2002.
	- One record was identified at 71 Creditstone Service Station, approximately 52 m east of the Site, in the east portion of the Study Area. The record identified a Spill from septic overflow to storm sewer in 1992 with not anticipated impact to environment.

	- One record was identified at 11 Creditstone Road, approximately 191 m southeast of the Site, in the east portion of the Study Area. The record identified a 155 L of diesel spilled to asphalt and sewer in 1990 with possible impact to environment.
	- One record was identified at 101 Freshway Drive (3 records), approximately 219 m northeast of the Site, in the east portion of the Study Area. The record identified a Motor oil spill to sewer in 1996 with possible impact to environment.
Pesticide Register	The ERIS report identified ten (10) records within the Study Area.
(PES)	- H & S Building Suppliest Ltd., located at 96 Maplecrete Road Unit 4-5 (3 records), approximately 70 m south of the Site, was identified as a limited vendor legacy license
	- MP Landscaping Inc., located at 90-C Creditstone Road, approximately 53 m north of the Site, was listed for operator
	- Clintar Groundskeeping Services, located at 23 Creditstone Road Unit 3 (5 records), approximately 158 m southeast of the Site, was identified as a pesticide legacy license, operator.
	- Service Master Lawn Care, located at 101 Freshway Drive Unit 74, approximately 219 m northeast of the Site, was identified as a pesticide legacy license, operator.
Expired Fuels Safety	The ERIS report identified four (4) records within the Study Area.
Facilities (EXP)	- 71 Peelar Road (MAD Rentals Ltd., 1990) – 2 records.
	- 150 Creditstone Road (Active Excavating and Contracting Ltd., 1990).
	- 131 Freshway Drive (A & G Garage, 2003).
Pipeline Incidents	The ERIS report identified two (2) records within the Study Area.
(PINC)	- One record was identified at Garry Felbel, at 139 Creditstone Road, located approximately 199 m northeast of the Site (east portion of the Study Are)a, for natural gas pipeline damage on October 2015
	- One record was identified at Enbridge Gas Inc., located at 95 Creditstone Road, located approximately 85 m northeast of the Site (east portion of the Study Area), for natural gas pipeline damage on April 2021
Environmental	The ERIS report identified ten (10) records within the Study Area.
Activity and Sector Registry (EASR)	- Water Taking Construction Dewatering EASRs were registered at the following properties within the Study Area:
Registry (LASIV)	o 300 Interchange Way (Earth Boring Co. Limited, 2020)- 2 records.
	o 3201 Highway 7 (ICONA Developments Inc., 2017).
	o 30 Interchange Way (Menkes VMC Residential Inc., 2019).
	- Waste Management System EASRs were registered at the following properties within the Study Area:
	o 69 Maplecrete Road (1522854 Ontario Incorporated, 2013).
	o 95 Creditstone Road (Toronto Mini Bins Inc., 2016).
	- Automotive Refinishing Facility EASRs were registered at the following properties within the Study Area:
	o 95 Creditstone Road (Seven View Plymouth Chrysler Ltd., 2019).
	o 101A Freshway Drive (Sham's Auto Collision Inc., 2012).

nue	
	- Standby Power System EASRs were registered at the following properties within the Study Area:
	o 101 Exchange Avenue (The Toronto and Region Conservation Authority, 2015 )- 2 records.
Environmental	The ERIS report identified five (5) records within the Site:
Registry (EBR)	- Toromont Industries Ltd., located at 3131 Highway 7 West (3 records), was listed for an approval for discharge into the natural environment other than water (IA01E1188) in 2002.
	- Mobile Climate Control Industries Inc., located at 7540 Jane Street (2 records), was listed for an Air Environmental Compliance Approval (#012-0938) in 2017.
	The ERIS report identified seven (7) records within the Study Area:
	- Norak Steel Construction Limited, located at 44 Creditstone Road, was listed for an approval for discharge into the natural environment other than water (010-5300) in 2010.
	- Cleargreen Forestry Products Inc., located at 43 Peelar Road, Unit 2, was listed for Environmental Compliance Approval for air (011-5065) in 2011.
	- DYNA Metro Inc., located at 37 Creditstone Road, Unit 6, was listed for Environmental Compliance Approval for air (011-8779) in 2014.
	- Precision Automotive Group Limited, located at 101A Freshway Drive, Suite 74, was listed for an approval for discharge into the natural environment other than water (IA04E1417) in 2006.
	- Mile Kelava, located at 101 Freshway Drive, Unit 46, was listed for an approval for discharge into the natural environment other than water (010-0464) in 2008.
	- JPI Auto Clinic Inc., located at 101 Freshway Drive, Suite 9, was listed for an approval for discharge into the natural environment other than water (IA05E0625) in 2005.
	- Benban Auto Collision Inc., located at 101A Freshway Drive, Suite 10, was listed for an approval for discharge into the natural environment other than water (IA04E1197) in 2006.
Environmental	The ERIS identified five (5) records for the Site and eighteen (18) records within the Study Area.
Compliance Approval (ECA)	ECA – Air approvals were identified at the following addressed within the Site:
	- 3131 Highway 7 West (Toromont Industries Ltd., 2002) – 3 records.
	- 7540 Jane Street (Mobile Climate Control Industries Inc., 2017) – 2 records.
	ECA – Air approvals were identified at the following addressed within the Study Area:
	- 44 Creditstone Road (Norak Steel Construction Limited, 2010).
	- 37 Creditstone Road (DYNA Metro Inc., 2014) – 2 records.
	- 101A Freshway Drive (Precision Automotive Group Limited, 2005).
	- 101 Freshway Drive (JPI Auto Clinic Inc., 2005).
	- 101 Freshway Drive (Mile Kelava, 2008).
	- 30-120 Interchange Way (2748355 Canada Inc. & bcIMC Realty Corp., 2008).

ECA – waste management system approvals were identified at the following addressed within the Study Area:

- 126A Peelar Road (Urgiles Haulage Services Inc., 2009).
- 111 Maplecrete Drive (2259453 Ontario Inc, 2011).
- 43 Peelar Road (Arborea Tree Service & Forestry Ltd., 2000).
- 43 Peelar Road (Cleargreen Forestry Products Inc. 2011).
- 100 Creditstone Road (Canadian Concrete Forming Limited, 2010).
- 131 Freshway Drive (Ford On-Site Services Ltd., 2003) 2 records.
- 101 Freshway Drive (S & A Bio Solution Limited, 2011).

ECA – municipal and private sewage approvals were identified at the following addressed within the Study Area:

- 3075 Highway 7, Block 3 (QC/VII Inc., 2000).
- Interchange Way and Exchange Avenue (RP B3N Holdings Inc., 2021).
- Interchange Way and Exchange Avenue (Mobilio Developments, 2020).

## Certificates of Approval (CA)

The ERIS identified five (5) records for the Site and twenty (20) records within the Study Area.

CAs for industrial air were identified at the following properties within the Site:

- 3131 Highway 7 West (Toromont Industries Limited, 1995, 2002, 2003, 2005) 4 records.
- 7540 Jane Street (Mobile Climate Control Industries Inc, 2010).

CAs for industrial air were identified at the following properties within the Study Area:

- Pt. Lot 5/ Conc.5, Highway 7 (Toromont Industries Limited, 1995) 2 records.
- 112 Maplecrete Road (Bilt Rite Disposal Equipment Inc., 1986).
- 3201 Highway No. 7 (1406284 Ontario Inc., 2006).
- 44 Creditstone Road (Norak Street Construction Limited, 2010).
- 101 Freshway Drive (Wood Waster Inc., 1989).
- 101 Freshway Drive (Precision Automotive Group Limited, 2005).
- 101 Freshway Drive (JPI Auto Clinic Inc., 2005).
- 101 Freshway Drive (Mile Kelava, 2008).
- 30-120 Interchange Way (2748355 Canada Inc. & BcIMC Realty Corp., 2008).

Responses were received from the TSSA on September 15 and 16, 2021. The response indicated the following:

- 33 Peelar Road had a record of one expired fuel tank;
- 41 Peelar Road had a record of two active fuel tanks and two expired fuel tanks;
- 43 Peelar Road had a records of three active fuel tanks;
- 71 Peelar Road had record of three active fuel tanks and three expired fuel tanks;
- 131 Freshwater Drive has a record of two expired fuel tank and one expired private fuel outlet;
- 3131 Highway 7 had two records of active fuel tank and one active private fuel outlet;
- 7800 Jane Street had five records of expired fuel tanks;
- 77 Maplecrete Road had two records of expired fuel tanks;
- 91B Maplecrete Road had one record of active fuel tank;
- 11 Creditstone Road had one record of active fuel tank;
- 37 Creditstone Road Unit 7 had one record of expired fuel tank;
- 111 Creditstone Road had two records of active fuel tanks;
- 150 Creditstone Road had two records of active fuel tanks and two records of expired fuel tanks.

A copy of the TSSA requests and responses are provided in Appendix B.

#### 3.3 Physical Setting Sources

#### 3.3.1 Aerial Photographs

Aerial photographs available from the Regional Municipality of York website were reviewed for the years 1954, 1966, 1970, 1978, 1988, 1999, 2007, 2017 and 2020. The aerial photographs (**Figures C1** to **C9**) can be found in **Appendix C**. Aerial photographs were reviewed to evaluate development progress and potential environmental liabilities associated with the Site and surrounding Study Area.

A summary of the aerial photograph information is provided in Table 2 below:

Table 2 Aerial Photograph Interpretation

YEAR	ACTIVITIES ON SITE	ADJACENT PROPERTIS	POSSIBLE CONTAMINANTS
1954	-The Site consists of agricultural lands.	- Lands in the Study Area are interpreted to be agricultural.  - Highway 7 and Jane Street are present in the Study Area. Highway 400 exists west of the Study Area.  - A large orchard is present north of Highway 7 between Highway 440 and Jane Street. Another small orchard appears to be present west of Jane Street, in southern portion of the Study Area.  -Small structures are present east and west of Jane Street and appear to be residential and/or farm properties.	Potential for environmental impacts associated with agricultural operations and orchards in Study Area.  Contaminants of concern include metals and pesticides
1966	<ul> <li>The Site consists mainly of agricultural land uses.</li> <li>New developments appear to be present at the Site in northwest quadrant of the</li> </ul>	-The Study Area consists mainly of agricultural land uses.	Potential environmental impacts associated with agricultural operations and industrial development.

YEAR	ACTIVITIES ON SITE	ADJACENT PROPERTIS	POSSIBLE CONTAMINANTS
	intersection of Peelar Road and Maplecrete Road.	- Commercial and industrial buildings appear to be present in the east portion of the Study Area Doughton Road, Creditstone Road,	Contaminant of concern include: metals and inorganics, volatile organic compounds (VOCs), polycyclic aromatic
		Freshway Drive, Peelar Road, and Maplecrete Road are visible on the aerial photo.	hydrocarbons (PAHs), petroleum hydrocarbons (PHCs)
1970	- The Site consists mainly of agricultural land uses.	-The Study Area consists mainly of agricultural land uses.	Same as above.
	-New developments are visible west of Creditstone Road	-New commercial and industrial developments are present at the east portion of the Study Area.	
1978	<ul> <li>The Site is now a mix of agricultural and industrial lands</li> <li>New developments are now built in the northern portion of the Site</li> </ul>	-The Study Area is now a mix of agricultural and industrial land uses -Increase in commercial and industrial developments in the northern portion of the Study Area.	Same as above.
1988	- Similar to 1978 aerial	- Similar to 1978 aerial  - An orchard north of Highway 7 has a smaller footprint and Edgleley Boulevard has been built	Same as above.
1999	- Industrial/commercial building west of interchange Way is now built -increase in road development	-the following roads are now present: Interchange Way road (west and north portion only), Commerce Street, Exchange Way and Millway Avenue -increase in commercial and industrial development in the north, east and west portion of the Study Area.	Same as above.
2007	- New developments in the western portion of the Site have been built	-New commercial and industrial developments in the eastern, central and western portions of the Study Area.	Same as above.

YEAR	ACTIVITIES ON SITE	ADJACENT PROPERTIS	POSSIBLE CONTAMINANTS

2020	-Similar to 2017 aerial	- Similar to 2017 aerial	Same as above.

#### 3.3.2 Topography, Hydrology, Geology and Physiography

#### Topography

Topography of the Study Area exhibits low relief with a gradual slope to the southwest. Ground surface elevations across the Study Area generally range between 205 meters above the sea level (masl) in the east and 190 masl in the southwest (MNRF, 2022a). Ground surface reaches a topographic high of 215 masl in the east along the Highway 407 (**Figure 1**). Drainage in the area is interpreted to generally be directed to storm sewers and drainage ditches in the Study Area.

#### Hydrology

Black Creek enters the Study Area in the northeast and flows north-to-south through the Study Area. Black Creek has a warm thermal regime and continues to flow south and into the Humber River approximately 12 km southwest of the Site. The Study Area is present within the Humber – Don River watershed (TRCA, 2008 and 2009).

The principle direction of regional groundwater flow is inferred to be southwest towards the Humber River located approximately 12 km southwest of the Study Area.

#### Surficial Geology

Surficial geology in the Study Area is primarily sandy silt to silty sand-textured till, interpreted to be Newmarket Till (OGS, 2010). Alluvial deposits of sand and gravel with minor content of clay and silt sand and gravel are present along the Black Creek in the central portion of the Study Area.

#### **Bedrock Geology**

The bedrock consists of Ordovician aged shale interbedded with limestone of the Georgian Bay Formation (OGS, 2011). The bedrock is expected at the depth greater than 103 meters below the ground surface (mbgs), based on the review of the MECP water well records (see **Appendix D**).

#### Physiography

The Study Area is located within the Peel Plain physiographic region (Chapman and Putnam, 1984; OGS, 2007). The Peel Plain is characterized as a level to undulating bevelled till plain. The soils within the Peel Plain are generally comprised of glacial till covered in places by thin deposits of glacio-lacustrine based clay and silt soils, deposited between 12,000 and 13,000 years ago at the bottom of glacial Lake Peel.

#### 3.3.3 Water Bodies and Areas of Natural Significance

Black Creek enters the Study Area in the northeast and flows north-to-south through the Study Area. Black Creek has a warm thermal regime and continues to flow south and into the Humber River, located approximately 12 km southwest of the Site. The Study Area is present within the Humber – Don River watershed (MECP, 2021a).

There are multiple unevaluated ponds within the Study Area, but there are no Areas of Natural or Scientific Interest or Provincially Significant Wetlands (MNRF, 2022b) in the Study Area (see **Figure 1**).

#### 3.3.4 Well Records

Water well records were obtained from the MECP for the Site and properties within a 250 m radius (i.e., the Study Area). A total of one-hundred and seventy-two (172) water well records were identified within the Study Area. Eighty-one (81) were identified as test holes/monitoring wells, five (5) were identified for industrial/livestock/domestic/commercial water supply, forty-four (44) were identified as abandoned, twenty-two (22) were identified for dewatering use, and twenty (20) wells were installed for unknown purposes.

Based on the identified records, the general stratigraphy within the Study Area consists of clay/sand/silt matrix found beneath the topsoil extending from 0.3 mbgs to the depth greater than 80.5 mbgs. Bedrock was not identified in the water well records. Based on review of the identified records, the static water levels vary between 1.4 mbgs and 23.5 mbgs in the Study Area.

### 4 Site Reconnaissance

On September 24, 2021, between the hours of 9:00 AM and 5:00 PM, WSP staff visited the Study Area and conducted the Site reconnaissance. The purpose of the inspection was to document land uses and business operations that may represent a potential source of site contamination within the Study Area (e.g., gas station, auto repair facilities, and industrial operations). The Site and Study Area was assessed in a systematic manner by walking the Site and Study Area and recording visual and olfactory observations. It should be noted that the inspection did not include any building inspections or comprehensive exterior inspections of any properties present in the Study Area. Therefore, any inferences regarding the presence or absence of site contamination is strictly based on visual observations made from the roadside in the publicly accessible areas. The weather at the time of the Site reconnaissance was cloudy and the air temperature was approximately 20°C. Photographs from the Site reconnaissance are included in **Appendix E**.

#### 4.1 General Site Conditions

The northern and eastern portion of the Site was observed to consist of industrial and commercial land uses. The western portion of the Site mainly consists of Interchange Way Road and surrounding industrial and commercial lands.

Land uses present on the Site at the time of the site visit were as follows:

- 7551 Jane Street was occupied by Elite Edges Skating School (Photographs 1);
- 53 Maplecrete Road was occupied by Maplecrete Truck and Auto Collision (Photograph 2);

- 35 Maplecrete Road was occupied by Blue Star Construction (Photograph 3);
- 90 Creditstone Road was occupied by Thomasos Spring Service Ltd. (Photograph 4);
- 7540 Jane Street was occupied by Mobile Climate Control Corporation (Photograph
   5); and
- 3131 Highway 7 was occupied by Toromont Cat (**Photograph 6**).

#### 4.2 Adjacent Lands

Lands in the Study Area are shown on **Figure 1**. Adjacent properties were viewed from publicly accessible boundaries, to assess the potential for use to adversely affect the Site. Adjacent properties were observed to be predominantly to be a mix of commercial and industrial land uses.

#### 4.3 Observed Operations and Structures

Industrial and commercial land use present in the Study Area are as follows:

#### Western portion of the Study Area

- A pond located behind the property at 150 Interchange Way (Photograph 7);
- 120 Interchange Way was a condominium under construction (Photograph 8);
- 150 Interchange Way was occupied by Courtyard by Marriott hotel (Photograph 9);

#### Eastern portion of the Study Area

- 101 Freshway Drive, Unit 71 was occupied by Mikas Auto. One above ground storage tank was found at the back of the unit (**Photograph 10**);

- 101 Freshway Drive, Unit 3 was occupied by Geo Motors. One above ground storage tank was found at the back of the unit (**Photograph 11**);
- 101 Freshway Drive was a commercial plaza occupied by several units: Tint Guys Auto Accessories was present at Unit 50, T-Bird Muffler & Auto was present at Unit 52 and Aero-Hill Engine Rebuilders was present at Unit 14 (**Photograph 12-14, 16-18**);

#### Northern Portion of the Study Area

- 133 Maplecrete Road was occupied by Goldfinger's Auto Collision (Photograph 15);
- 3150 Highway 7 was occupied by Vaughan Metropolitan Centre (**Photograph 16**);
- 3200 Highway 7 was occupied by Smart Centres (Photograph 17);
- 7800 Jane Street was a construction site (**Photograph 18**);

#### Southern Portion of the Study Area

- 44 Creditstone Road was occupied by Norak Steel Construction Limited (Photograph 19);
- 200 Interchange Way was occupied by Ikea (Photograph 20).

Based on the observations made during the time of the site reconnaissance, several PCAs were identified on the Site and in the Study Area. These PCAs are described in **Table 3**.

#### 4.3.1 Monitoring and Supply Wells

The Study Area is municipally serviced for drinking water, based on presence of multiple hydrants in then Study Area. Multiple monitoring wells were observed during the site visit at properties located at 7551 Jane Street and at 7800 Jane Street.

#### 4.3.2 Fill Placement

Based on the results of the site visit on September 24, 2021, properties at 120 Interchange Way (western portion of the Study Area) and 7800 Jane Street (northern portion of the Study Area) are currently construction sites. It is possible that fill material of unknown quality was imported to these locations.

#### 4.3.3 Waste Water and Sewage Disposal

The Site and adjacent lands are municipally serviced for wastewater and sewage disposal. Storm water catch basins were observed to be present throughout the Site and the Study Area.

## 5 Review and Evaluation of Information

During the Phase One ESA, thirty-seven (37) PCAs were identified to be present on the Subject Property and within the Study Area, summarized in **Table 3** and shown on **Figure 1**.

Table 3 Summary of Potentially Contaminating Activities within the Phase One Study Area

				l	
PCA	DESCRIPTION OF PCA	LOCATION OF PCA	DATA SOURCE	PCA RESULTED IN APEC	RATIONALE
39. Paints Manufacturing, Processing and Bulk Storage	ND Graphics Inc., was listed for the generation, use, and/or storage of petroleum distillates, photoprocessing wastes, wastes from use of pigments, coatings and paints, waste compressed gases including cylinders, waste crankcase oils and lubricants, petroleum distillates from 2009 to 2021	55 Interchange Way	ERIS (GEN)	No	Based on details provided in the ERIS report ("Wholesaler – Distributor"), wastes are expected to be contained within this facility.
19. Electronic and Computer Equipment Manufacturing	Mobile Climate Control Industries Inc. was listed for the manufacturing of waste oils and lubricants, waste compressed gases, acid waste-heavy metals, alkaline wastes-heavy metals, paint/pigment/coating residues, aromatic solvents, aliphatic solvents and oil skimmings and sludges in 2007 to 2021. It was also listed for manufacturing of motor vehicle parts with release of chromium from 2013 to 2015.	7540 Jane Street	ERIS (GEN)	Yes-APEC 1A	The registered manufacturing facility, operation of this facility for several years and release of chromium from 2013 to 2015 in proximity to the Site leads to an APEC.
39. Paints Manufacturing, Processing and Bulk Storage	Manufacturing of waste oils and lubricants, waste compressed gases, acid waste-heavy metals, alkaline wastes-heavy metals, paint/pigment/coating residues, aromatic solvents, aliphatic solvents and oil skimmings and sludges in 2007 to 2021 (Mobile Climate Control Industries Inc).	7540 Jane Street	ERIS (GEN)	Yes-APEC 1B	The registered manufacturing facility and operation of this facility for several years in proximity to the Site leads to an APEC.
57. Vehicles and Associated Parts Manufacturing	Manufacturing of motor vehicle electrical and electronic equipment established in 1983 (Mobile Climate Control Industries Inc.).	7540 Jane Street	ERIS (NPRI)	Yes-APEC 1C	The registered manufacturing facility and operation of this facility for several years in proximity to the Site leads to an APEC
28. Gasoline and Associated Products Storage in Fixed Tanks	Active FS liquid fuel tank single wall UST, listed in 1988 (CBM).	31 Maplecrete Road	ERIS (PRT, FSTH, FST)	Yes-APEC 2	Based on details provided in the ERIS report ("fuel storage tank", "private storage tank" and "historic" fuel storage tank with a single wall) and distance from Subject Property, the PCA results in an APEC.
34. Metal Fabrication	manufacturing of industrial and commercial machinery and equipment, established in	31 Maplecrete Road	ERIS (SCT)	No	Based on details provided in the ERIS report ("material handling equipment) and due to the age of manufacturing

PCA	DESCRIPTION OF PCA	LOCATION OF PCA	DATA SOURCE	PCA RESULTED IN APEC	RATIONALE
	1962 (Dynahyd Equipment Limited).				(1962), this PCA does not lead to an APEC.
52. Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	Urban Construction Equipment Ltd. was listed for the generation, use and/or storage of petroleum distillates in 2014. Ucel Inc., was listed for the generation, use, and/or storage of waste compressed gases, petroleum distillates, acid waste, waste oils and lubricants in 2015, 2016 and 2018.	33 Maplecrete Road	ERIS (GEN)	Yes-APEC 3	Based on details provided in the ERIS report ("All other Building Equipment Contractors"), years of operations (2014-2016 and 2018) distance from the Site, the PCA results in an APEC.
34. Metal Fabrication	Manufacturing of material handling equipment, ornamental and architectural metal product, and commercial and service industry machinery, established in 1962 (Dynahyd Roll Off Systems Ltd.).	33 Maplecrete Road	ERIS (SCT)	No	Based on details provided in the ERIS report ("material handling equipment") and due to the age of manufacturing (1962), this PCA does not lead to an APEC.
34. Metal Fabrication	Blue Star Construction Corporation was listed for the generation, use, and/or storage of waste oils and lubricants, petroleum distillates, waste crankcase oils and lubricants from 2010 to 2021.	35 Maplecrete Road	ERIS (GEN)	Yes-APEC 4A	Based on details provided in the ERIS report ("site preparation contractors") and distance from the Site, the PCA results in an APEC.
52. Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	Generation, use, and/or storage of waste oils and lubricants, petroleum distillates, waste crankcase oils and lubricants from 2010 to 2021 (Blue Star Construction Corp)	35 Maplecrete Road	ERIS (GEN)	Yes-APEC 4B	Based on details provided in the ERIS report ("site preparation contractors") and distance from the Site, the PCA results in an APEC.
52. Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	Metro Hoisting and Erecting Ltd. was listed for the generation, use, and/or storage of petroleum distillates from 2002 to 2004.  Suncor was listed as a petroleum product wholesaler-distributor of light fuels  Madagh Industrial Recycling Ltd. was listed for freight trucking long distances and generation, use, and/or storage of trucks in 2004.	66 Creditstone Road	ERIS (GEN)	Yes-APEC 5	Based on details provided in the ERIS report ("general freight trucking long distance truck-load"), age of operation (2004) and distance from the Site, the PCA results in an APEC.

PCA	DESCRIPTION OF PCA	LOCATION OF PCA	DATA SOURCE	PCA RESULTED IN APEC	RATIONALE
52. Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	BOT Construction Limited was listed for the generation of petroleum distillates and waste oils and lubricants from 1993 to 1998.	Jane Street and Peelar Road	ERIS (GEN)	No	Based on the age of the records (1993-1998) provided in the ERIS report, the PCA does not lead to an APEC.
34. Metal Fabrication	Manufacturing of fabricated metal products, established in 1992; 1993 2003, 2004 (Real Steel Industries Inc. and Trader Machinery Inc. and).  Infinity Assessment Solutions was listed for generation of waste oils & lubricants, waste crankcase and lubricants in 2009, 2015, 2016, 2018, 2020 and 2021.	63 Maplecrete Road	ERIS (SCT, GEN)	No	Based on the age of the records (1992 to 2004) for manufacturing facilities provided in the ERIS report, the PCA does not lead to an APEC.
11. Commercial Trucking and Container Terminals	Generation, use, and/or storage of aliphatic solvents, petroleum distillates and waste oils and lubricants from 1998 to 2001 (Concord Truck Center Ltd).	69 Maplecrete Road	ERIS (GEN)	No	Based on the age of the records (1998-2001) provided in the ERIS report, the PCA does not lead to an APEC.
52. Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	Vaughan Paving Ltd., Roni Excavating Limited, 1522854 Ontario Incorporated and Motor Vehicle Towing was listed for generation, use, and/or storage of waste oils and lubricants from 1994 to 1999.	69 Maplecrete Road	ERIS (GEN)	Yes-APEC 6	Based on details of the business ("motor vehicle towing" and "general freight trucking") and age of the business operation (2004, 2013-20016, 2020 and 2021) provided in the ERIS report and distance from the Site, the PCA results in an APEC.
	Roni Excavating Limited was listed for generation of waste oils & lubricants in 1999-2004.  1243115 Ontario Ltd. (motor vehicle towing) was listed for generation of waste in 2004, 2013-2016, 2020 and 2021				
58. Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners	Listed for waste management system approvals (1522854 Ontario Incorporated) in 2013.	69 Maplecrete Road	ERIS (EASR)	No	Based on the details of the business ('motor vehicle towing" and "general freight trucking") and age of the records "2013") provided in the ERIS report (2013), the PCA does not lead to an APEC.
A. Spill	The record identified leak of motor oil to ground which was contained and cleaned but possible impact to soil in 2002.	3131 Highway 7	ERIS (SPL)	No	Based on the age of the record (2002) and details provided in the records (contained and cleaned), the PCA does not lead to an APEC.

PCA	DESCRIPTION OF PCA	LOCATION OF PCA	DATA SOURCE	PCA RESULTED IN APEC	RATIONALE
28. Gasoline and Associated Products Storage in Fixed Tanks	listed for a FS liquid fuel tank single wall horizontal UST, listed for 2001 (Toromont Industries Ltd).	3131 Highway 7	ERIS (FSTH), TSSA records	Yes-APEC 7A	Based on active TSSA records for this property, the PCA results in an APEC.
33. Metal treatment, coating, plating and finishing	manufacturing of automotive parts and accessories, engine and power transmission (Toromont CAT - Reman).	3131 Highway 7	ERIS (SCT)	Yes-APEC 7B	Based on distance from the Site, the PCA results in an APEC.
52. Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	Toromont Industries Ltd., was listed for manufacturing of automotive parts and accessories, engine and power transmission.  generation, use, and/or storage of miscellaneous wastes and organic chemicals, acid solutionscontaining heavy metals, waste crankcase oils and lubricants, detergents and soaps, waste oils/sludges (petroleum based), amines, aliphatic and aromatic solvents and residues, light fuels, waste compressed gases including cylinders, waste from the use of pigments, coatings and paints, alkaline wastes, petroleum distillates, and oil skimmings and sludges from 1999 to 2021 (Toromont Industries Ltd).	3131 Highway 7	ERIS (SCT, NPRI, GEN)	Yes-APEC 7C	Based on distance from the Site, the PCA results in an APEC.
32. Iron and Steel Manufacturing and Processing	manufacturing of plate work and fabricated structural product, established in 1964 (Norak Steel Construction Ltd.).	44 Creditstone Road	ERIS (SCT, GEN)	No	Based on the age of records listed in the ERIS report (1964), the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
39. Paints Manufacturing, Processing and Bulk Storage	generation, use, and/or storage of waste oils and lubricants, aromatic solvents, paint/pigment/coating residues from 1989 to 2016, 2018 (Norak Steel Construction Ltd).	44 Creditstone Road	ERIS (GEN)	Yes-APEC 8	Based on the distance from the Subject Property, the PCA results in an APEC.
12. Concrete, Cement and Lime Manufacturing	concrete product manufacturing in 2000 (Comus Precast Ltd.).	90 Creditstone Road	ERIS (SCT)	No	Based on age of the records listed in the ERIS report (2000), the PCA results does not lead to an APEC.
40. Pesticides (including Herbicides, Fungicides and Anti- Fouling Agents) Manufacturing, Processing, Bulk Storage and Large- Scale Applications	listed for operator (MP Landscaping Inc).	90 Creditstone Road	ERIS (PES)	Yes-APEC 9	Based on distance from the Site, the PCA results in an APEC.

PCA	DESCRIPTION OF PCA	LOCATION OF PCA	DATA SOURCE	PCA RESULTED IN APEC	RATIONALE
8. Chemical Manufacturing, Processing and Bulk Storage	commercial and industrial machinery and equipment and machine shop, established in 1971 (Contractors Equipment Service).		ERIS (SCT)	No	Based on age of the records listed in the ERIS report (1971) and due to distance from the Site, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
12. Concrete, Cement and Lime Manufacturing	generation, use, and/or storage of waste oils and lubricants from 2007 to 2016 (Star Concrete Pumping Inc).	100 Creditstone Road	ERIS (GEN)	Yes-APEC 10	Based on distance from the Site, the PCA results in an APEC.
43. Plastics (including Fibreglass) Manufacturing and Processing	plastic product manufacturing, established in 1988 (Industrial Composites Inc).	85 Creditstone Road	ERIS (SCT)	No	Based on age of the records listed in the ERIS report (1988), the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
52. Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	Generation of waste oils/sludges (petroleum based) and oil skimmings & sludges in 2012-2016, 2018. 2020 and 2021 (Marino S. Auto Repair Ltd.)  Generation of waste crankcase oils and lubricants in 2018, 2020 and 2021 (A.R.G. Group Inc.).	85 Creditstone Road	ERIS (GEN)	Yes-APEC 11	Based on the distance from the Site, the PCA results in an APEC.
40. Pesticides (including Herbicides, Fungicides and Anti- Fouling Agents) Manufacturing, Processing, Bulk Storage and Large- Scale Applications	identified as a limited vendor legacy license (H & S Building Suppliest Ltd).	96 Maplecrete Road	ERIS (PES)	Yes-APEC 12	Based on distance from the Site, the PCA results in an APEC.
52. Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	generation, use, and/or storage of waste crankcase oils and lubricants, brine (chloralkali sludges), aliphatic solvents and residues, aliphatic solvents, paint/pigment/coating residues, waste oils and lubricants from 1999 to 2021 (Unique Concord Holdings Corporation).	7551 Jane Street	ERIS (GEN)	Yes-APEC 13	Based on distance from the Site, the PCA results in an APEC.
8. Chemical Manufacturing, Processing and Bulk Storage	generation, use, and/or storage of petroleum distillates from 1986 to 1998 (BE-RAM MFG LTD)	71 Creditstone Road	ERIS (GEN)	No	Based on the age of the records listed in the ERIS report (1986-1998), the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
52. Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to	generation, use, and/or storage of waste oils and lubricants, waste crankcase oils and lubricants and waste oils/sludges (petroleum	71 Creditstone Road	ERIS (GEN)	Yes-APEC 14	Based on age of records listed in the ERIS report (2009-2021), upgradient location of groundwater and due to the distance from the Site, the PCA leads to an APEC.

PCA	DESCRIPTION OF PCA	LOCATION OF PCA	DATA SOURCE	PCA RESULTED IN APEC	RATIONALE
maintain transportation systems	based) from 2009 to 2021 (Dicrete Construction Ltd)				
52. Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	generation, use, and/or storage of light fuels from 2012 to 2021 (Petro- Canada, Suncor Energy)	120 Creditstone Road	ERIS (GEN)	Yes -APEC 15	Based on age of the records in the ERIS report (2012-2021) and due to the distance from the Site, the PCA leads to an APEC at the Site.
41. Petroleum-derived Gas Refining, Manufacturing, Processing and Bulk Storage	Listed for waste management system approvals in 2016 (Toronto Mini Bins Inc).	95 Creditstone Road	ERIS (EASR)	No	Due to the nature of the waste management business (Toronto Mini Bins Inc.) and date of the listing, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
52. Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	EASR for automotive refinishing facility  Currently operating as automobile repair shop based on site visit	95 Creditstone Road	ERIS (EASR), Site Visit	Yes – APEC 16	Based on the distance from the Site and upgradient groundwater flow direction, the PCA results in an APEC.
19. Electronic and Computer Equipment Manufacturing	Record for laser-based instrument manufacturing in 1974.	300 Interchange Way	ERIS (SCT)	No	Based on age of ERIS records (1974), the PCA is unlikely to impact environmental quality of soil and/or groundwater at the Site.
28. Gasoline and Associated Products Storage in Fixed Tanks	Record for PRT and propane refill centre and tank in 1993 (Canada Hydrant Service).	77 Maplecrete Road	ERIS (PRT, DTNK), TSSA records	No	Based on the distance from the Site and cross-gradient flow of groundwater, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
28. Gasoline and Associated Products Storage in Fixed Tanks	A propane fuel storage tank record was listed for Canadian Rental Centres	91 Maplecrete Road	ERIS (RST), TSSA records	No	Based on the distance from the Site and cross-gradient flow of groundwater, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
28. Gasoline and Associated Products Storage in Fixed Tanks	records for active gasoline liquid fuel single wall UST, installed in 1991 (ARG Group Inc).	111 Creditstone Road	ERIS (PRT, FSTH, FST), TSSA records	No	Based on the distance from the and cross-gradient flow of groundwater, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
52. Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	generation, use, and/or storage of waste oils and lubricants, light fuels and waste crankcase oils and lubricants from 2012 to 2021 (A.R.G Group Inc).	111 Creditstone Road	ERIS (GEN)	No	Based on the distance from the Site and cross-gradient flow of groundwater, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
49. Salvage Yard, including automobile wrecking	listed for "Scrap Metals" (Medagh Industrial Recycling Ltd).	108 Maplecrete Road	ERIS (SCT)	No	Based on the distance from the Site, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
11. Commercial Trucking and Container Terminals	record for CA (Bilt Rite Disposal Equipment Inc.) – refuse containers	112 Maplecrete Road	ERIS (CA)	No	Based on the distance from the Site, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.

PCA	DESCRIPTION OF PCA	LOCATION OF PCA	DATA SOURCE	PCA RESULTED IN APEC	RATIONALE
52. Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	generation, use, and/or storage of petroleum distillates, and waste oils and lubricants from 1986 to 2012 (HI-WAY Hydraulics Limited).	112 Maplecrete Road	ERIS (GEN)	No	Based on the distance from the Site, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
57. Vehicles and Associated Parts Manufacturing	manufacturing of motor vehicle electrical and electronic equipment, established in 1985 (Franmar Starters & Alternators).	112 Maplecrete Road	ERIS (SCT)	No	Based on the distance from the Site, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
33. Metal Treatment, Coating, Plating and Finishing	industrial machinery, equipment and supplies distributor, established in 1934 (Canadian Curtis Refrigation).	3200 Highway 7	ERIS (SCT)	No	Based on the distance from the Site and cross-gradient flow of groundwater, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
A. Spill	Small Liquid petroleum gasoline spill when customer pulled out nozzle at gas station in April 10 2015. Listed for FS incident at the gas station on April 6, 2015.	7800 Jane Street	ERIS (INC, SPL)	No	Based on the distance from the Site and cross-gradient flow of groundwater, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
52. Storage, maintenance, fuelling and repair of equipment, vehicles, and materials used to maintain transportation systems	Listed for expired FS facility for cylinder exchange (1674770 Ontario Ltd).	7800 Jane Street	ERIS (DTNK)	No	Based on the distance from the Site, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
28. Gasoline and Associated Products Storage in Fixed Tanks	Listed for expired FS facility for cylinder exchange (1674770 Ontario Ltd).	7800 Jane Street	ERIS (FSTH, DTNK, FST), TSSA records	No	Based on the distance from Site, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
12. Concrete, Cement and Lime Manufacturing	generation, use, and/or storage of waste oils and lubricants from 1986 to 1998 (Pumpcrete Rental Corp).	11 Creditstone Road	ERIS (GEN)	No	Based on the distance from the Site, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
28. Gasoline and Associated Products Storage in Fixed Tanks	A retail fuel storage tank was listed at Canada Oxygen Ltd, expired in 1994.	11 Creditstone Road	ERIS (PRT), TSSA records37	No	Based on the distance from the Site, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
34. Metal Fabrication	machine shops, and industrial mold manufacturing, established in 1987 (Excaliber Metal Precision Inc.).	11 Creditstone Road	ERIS (SCT)	No	Based on the distance from the Site, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.

PCA	DESCRIPTION OF PCA	LOCATION OF PCA	DATA SOURCE	PCA RESULTED IN APEC	RATIONALE
40. Pesticides (including Herbicides, Fungicides and Anti- Fouling Agents) Manufacturing, Processing, Bulk Storage and Large- Scale Applications	listed for operator (Clintar Groundskeeping Services).		ERIS (PES)	No	Based on the distance from the Site, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
49. Salvage Yard, including automobile wrecking	listed for "Scrap Metals" (Tal Metal Recycling Inc).	11 Creditstone Road	ERIS (AUWR)	No	Based on the distance from the Site, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
52. Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	generation, use, and/or storage of petroleum distillates from 1988 to 1998 (Jovis Construction Limited).	11 Creditstone Road	ERIS (GEN)	No	Based on the distance from the Site, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
28. Gasoline and Associated Products Storage in Fixed Tanks	listed for FS expired facility for fuels safety private fuel outlet (MAD Rentals Ltd).	71 Peelar Road	ERIS (PRT, FSTH, DTNK, FST), TSSA records	No	Based on the distance from the Site and cross-gradient flow of groundwater, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
28. Gasoline and Associated Products Storage in Fixed Tanks	expired FS facility for fuels safety private fuel outlet and FS piping (Active Excavating & Contracting Ltd and McCleave Leasing Div of McCleave Trunk Sales).	150 Creditstone Road	ERIS (PRT, DTNK, FSTH, EXP, FST), TSSA records	No	Based on the distance from the Site and cross-gradient flow of groundwater, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
42. Pharmaceutical Manufacturing and Processing	manufacturing of measuring, medical and controlling devices, material handling equipment and industrial machinery, equipment and wholesale distributor, established in 1983 (Total Meter Services Inc.).	150 Creditstone Road	ERIS (SCT)	No	Based on the distance from the Site and cross-gradient flow of groundwater, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
52. Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	generation, use, and/or storage of petroleum distillates and waste oils and lubricants from 1989 to 1997 (McCleave Leasing) and petroleum distillates and waste oils in 2009 (Total Meter Services Inc.).	150 Creditstone Road	ERIS (GEN)	No	Based on the distance from the Site and cross-gradient flow of groundwater, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
28. Gasoline and Associated Products Storage in Fixed Tanks	FS facility for FS propane refill center and FS propane tank (King Koating Construction Inc).	41 Peelar Road	ERIS (DTNK), TSSA records	No	Based on the distance from the Site and cross-gradient flow of groundwater, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
33. Metal Treatment, Coating, Plating and Finishing	for industrial process furnaces and ovens, sheet metal work and general industrial and machinery equipment, established in	41 Peelar Road	ERIS (SCT)	No	Based on the distance from the Site and cross-gradient flow of groundwater, the PCA is unlikely to

PCA	DESCRIPTION OF PCA	LOCATION OF PCA	DATA SOURCE	PCA RESULTED IN APEC	RATIONALE
	1979 (Steimle Steel Corporation).				impact the environmental quality of soil and/or groundwater at the Site.
28. Gasoline and Associated Products Storage in Fixed Tanks	FS facility for FS propane cylinder handling facility (PT Industrial Electric).	33 Peelar Road	ERIS (PRT, DTNK), TSSA records	No	Based on the distance from the Site, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
52. Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	Currently operating as an automobile repair shop, based on site visit (Fine Line Auto Center).	33 Peelar Road	Site Visit	No	Based on the distance from Site, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
28. Gasoline and Associated Products Storage in Fixed Tanks	FS facility for fuels safety private fuel outlet and FS piping (A & G Garage),	131 Freshway Drive	ERIS (PRT, DTNK, EXP, FST), TSSA records	No	Based on the distance from the Site and cross-gradient flow of groundwater, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
28. Gasoline and Associated Products Storage in Fixed Tanks	FS facility for FS propane cylinder handling facility (1076710 Ontario Inc),	37 Creditstone Road	ERIS (PRT, DTNK), TSSA records	No	Based on the distance from the Site and cross-gradient flow of groundwater, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
39. Paints Manufacturing, Processing and Bulk Storage	printing, coating, engraving, heat treating and allied activities, established in 2003.	37 Creditstone Road	ERIS (SCT)	No	Based on the distance from the Site and cross-gradient flow of groundwater, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
52. Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	generation, use, and/or storage of aliphatic solvents from 1993 to 2001 (BIK Hydraulics & Welding Co. Ltd),	37 Creditstone Road	ERIS (GEN)	No	Based on the distance from the Site and cross-gradient flow of groundwater, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
28. Gasoline and Associated Products Storage in Fixed Tanks	one active gasoline FS liquid fuel tank single wall UST installed in 1987 (Elmford Construction Company Ltd).	43 Peelar Road	ERIS (PRT, FST, FSTH), TSSA records	No	Based on the distance from the Site and cross-gradient flow of groundwater, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
57. Vehicles and Associated Parts Manufacturing	manufacturing of material handling equipment, pump and compressor, industrial machinery equipment and supplies and motor vehicle body, established in 1987 (Williams Equipment Inc.).	43 Peelar Road	ERIS (SCT)	No	Based on the distance from the Site and cross-gradient flow of groundwater, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
28. Gasoline and Associated Products Storage in Fixed Tanks	A diesel fuel storage tank record was listed for FOBS Petroleum for Universal Bio Gas Solutions (no details on the date).	7581 Jane Street	ERIS (RST)	No	It is interpreted that this is all old record and the PCA does not lead to an APEC.

PCA	DESCRIPTION OF PCA	LOCATION OF PCA	DATA SOURCE	PCA RESULTED IN APEC	RATIONALE
42. Pharmaceutical Manufacturing and Processing	manufacturing of medical equipment and supplies, established in 1990 (Speciality Dental Products Ltd.).	7581 Jane Street	ERIS (SCT)	No	Based on the age of the records (1990) provided in the ERIS report, the PCA does not lead to an APEC.
A. Spill	The record identified a spill of 5 L of truck diesel spill to parking lot in 2020.	200 Interchange Way	ERIS (SPL)	No	Based on the distance from the Site and cross-gradient flow of groundwater, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
A. Spill	The record identified a spill from oil separator with confirmed impact to soil in 2012.	3150 Highway 7	ERIS (SPL)	No	Based on the distance from the Site and cross-gradient flow of groundwater, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
34. Metal Fabrication	manufacturing of miscellaneous fabricated metal products, established in 1988 (Proactive Metal Ltd.).	215 Doughton Road	ERIS (SCT)	No	Based on the distance from the Site and cross-gradient flow of groundwater, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
32. Iron and Steel Manufacturing and Processing	manufacturing of steel foundries in 1988 (Maksteel Ltd.; Direct Steel Inc.).	215 Doughton Road	ERIS (SCT)	No	Based on the distance from the Site and cross-gradient flow of groundwater, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
29. Glass Manufacturing	manufacturing of glass products, ornamental and architectural metal, lumber distributor and metal service center, established in 1994 (Surlite Glass Ltd.).	215 Doughton Road	ERIS (SCT)	No	Based on the distance from the Site and cross-gradient flow of groundwater, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
34. Metal Fabrication	Machine shops (Amco Precision Inc.)	146 Peelar Road	ERIS (SCT)	No	Based on the distance from the Site and cross-gradient flow of groundwater, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
59. Wood Treating and Preservative Facility and Bulk Storage of Treated and Preserved Wood Products	manufacturing of wood container and pallet (Rapid Pallet Limited).	146 Peelar Road	ERIS (SCT)	No	Based on the distance from the Site and cross-gradient flow of groundwater, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
59. Wood Treating and Preservative Facility and Bulk Storage of Treated and Preserved Wood Products	manufacturing of wood and metal window and door, established in 1997 (Markwood Garage Door Mfg. Inc.).	126 Peelar Road	ERIS (SCT)	No	Based on the distance from the Site cross-gradient flow of groundwater, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
58. Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners	Listed for waste management system approvals (Urgiles Haulage Services Inc).	126 Peelar Road	ERIS (ECA)	No	Based on the distance from the Site and cross-gradient flow of groundwater, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.

PCA	DESCRIPTION OF PCA	LOCATION OF PCA	DATA SOURCE	PCA RESULTED IN APEC	RATIONALE
39. Paints Manufacturing, Processing and Bulk Storage	manufacturing of wood kitchen cabinet and countertop, and institutional furniture, established in 1985 (Irpina Kitchens).	114 Peelar Road	ERIS (SCT)	No	Based on age of the records listed in the ERIS report (1985), the PCA results does not lead to an APEC.
19. Electronic and Computer Equipment Manufacturing	manufacturing of communication equipment, established in 1960 (Mircom/Gardia Toronto Inc.).	25 Interchange Way	ERIS (SCT)	No	Based on age of the records listed in the ERIS report (1960), the PCA results does not lead to an APEC.
34. Metal Fabrication	overhead travelling cranes, hoists and monorail systems, established in 1955 (Urban Construction Equip Ltd).	122 Creditstone Road	ERIS (SCT)	No	Based on age of the records listed in the ERIS report (1955) and due to the distance from the Site, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
34. Metal Fabrication	manufacturing of motor home, travel trailer and camper, fabricated metal and sign manufacturing, established in 1963 (Stinson Equipment Limited).	130 Creditstone Road	ERIS (SCT, GEN)	No	Based on age of the records listed in the ERIS report (1963) and due to the distance from the Site, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
32. Iron and Steel Manufacturing and Processing	listed for fabricated structural metal, established in 1976 (Henry Rotberg Steel Constr Ltd.).	55 Creditstone Road	ERIS (SCT)	No	Based on age of the records listed in the ERIS report (1976) and the distance from the Site, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
12. Concrete, Cement and Lime Manufacturing	concrete product manufacturing (Grami Construction Ltd.)	101 Freshway Drive	ERIS (SCT), Site Visit	No	Based on the distance from the Site, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
19. Electronic and Computer Equipment Manufacturing	manufacturing of measuring, medical and controlling devices, and radio and television broadcasting and wireless communication equipment, established in 1980 (Pribusin Inc).	101 Freshway Drive	ERIS (SCT), Site Visit	No	Based on the distance from the Site, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
28. Gasoline and Associated Products Storage in Fixed Tanks	Above tank storage tanks were observed during site visit.	101 Freshway Drive	Site Visit	No	Based on the distance from the Site, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
32. Iron and Steel Manufacturing and Processing	iron and steel mills and ferro-alloy manufacturing, established in 1985 (Alex Steel Company Ltd).	101 Freshway Drive	ERIS (SCT), Site Visit	No	Based on the distance from the Site, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
34. Metal Fabrication	manufacturing of ornamental and architectural metal products, established in 1968 (United Railing Ltd), manufacturing of fabricated metal products and ornamental and	101 Freshway Drive	ERIS (SCT), Site Visit	No	Based on the distance from the Site, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.

PCA	DESCRIPTION OF PCA	LOCATION OF PCA	DATA SOURCE	PCA RESULTED IN APEC	RATIONALE
	architectural metal products, established in 1999 (E.R.T)				
40. Pesticides (including Herbicides, Fungicides and Anti- Fouling Agents) Manufacturing, Processing, Bulk Storage and Large- Scale Applications	identified as a pesticide legacy license, operator (Service Master Lawn Care)	101 Freshway Drive	ERIS (PES)	No	Based on the distance from the Site, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
42. Pharmaceutical Manufacturing and Processing	S & A Bio Solutions Limited listed in ECA and CA	101 Freshway Drive	ERIS (CA, ECA), Site Visit	No	Based on the distance from the Site, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
49. Salvage Yard, including automobile wrecking	listed for "Automobile Parts & Supplies-Used and Rebuilt" (FT Auto Parts),	101 Freshway Drive	ERIS (AUWR)	No	Based on the distance from the Site, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
52. Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	listed for an approval for discharge into the natural environment other than water (IA05E0625) in 2005 (JPI Auto Clinic Inc), 1986 to 1996 (Palmisano Construction Co. Ltd), from 1995 to 1998 (Magine Contractors Inc), from 1988 to 2001 (Malfara & Sons Excavating & Control Ltd). Benbar Auto Collision Inc. in 2004, JPI Auto Clinic Inc. in 2005, from 2012 to 2021 (Marino S Auto Repair Ltd), from 2011 to 2021 (Amni Construction Inc).	101 Freshway Drive	ERIS (EBR, GEN), Site Visit	No	Based on the distance from the Site, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
57. Vehicles and Associated Parts Manufacturing	manufacturing of motor vehicle engine parts, established in 1986 (Aero- Hill Engine Rebuilders Inc)	101 Freshway Drive	ERIS (SCT), Site Visit	No	Based on the distance from the Site, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
59. Wood Treating and Preservative Facility and Bulk Storage of Treated and Preserved Wood Products	listed for millwork, office and store fixtures, established in manufacturing of office and household furniture, established in 1983 (A.I.D 2000 Inc), 1987 (Sam's Woodworking & Turning), manufacturing of wood window and doors, established in 2000 (MHI Inc)	101 Freshway Drive	ERIS (SCT), Site Visit	No	Based on the distance from the Site, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
40. Pesticides (including Herbicides, Fungicides and Anti- Fouling Agents) Manufacturing, Processing, Bulk	identified as a pesticide legacy license, operator (Clintar Groundskeeping Services).	23 Creditstone Road	ERIS (PES)	No	Based on the distance from the Site and cross-gradient flow of groundwater, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.

PCA	DESCRIPTION OF PCA	LOCATION OF PCA	DATA SOURCE	PCA RESULTED IN APEC	RATIONALE
Storage and Large- Scale Applications					
52. Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	Currently operating as automobile repair shop based on site visit	23 Creditstone Road	Site Visit	No	Based on the distance from the Site and cross-gradient flow of groundwater, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
39. Paints Manufacturing, Processing and Bulk Storage	generation, use, and/or storage of waste oils and lubricants from 1986 to 1998 (Starview Equip. Repair Ltd).	53 Maplecrete Road	ERIS (GEN)	No	Based on age of the records listed in the ERIS report (1986-1998), the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
52. Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	generation, use, and/or storage of waste oils and lubricants from 1986 to 1998 (Starview Equip. Repair Ltd) and from 2007 to 2010 (Rayhaz Express Inc); generation, use, and/or storage of undefined substances from 1986 to 1994 (Gianeff Excavating Contractors); generation, use, and/or storage of petroleum distillates and waste oils and lubricants from 1992 to 1997 (David Hart Industries Inc).	53 Maplecrete Road	ERIS (GEN)	No	Based on age of the records listed in the ERIS report (1986-2010), the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
52. Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	generation, use, and/or storage of waste oils and lubricants from 1988 to 1998 (Anpro Excavating Contractors Ltd)	12 Creditstone Road	ERIS (GEN)	No	Based on the distance from the Site and cross-gradient flow of groundwater, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
52. Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	Automotive repair and maintenance in 2011 and 2012 (Imperial Air Compressor)	91 Peelar Road	ERIS (GEN)	No	Based on the distance from the Site and cross-gradient flow of groundwater, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
52. Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	Waste oils and lubricants in 2011 – 2018, 2020 and 2021 (HiTech Structures Inc.)	79 Peelar Road	ERIS (GEN)	No	Based on the distance from the Site and cross-gradient flow of groundwater, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
52. Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to	generation, use, and/or storage of waste oils and lubricants and light fuels from 1997 to 2014 (E.R.P Savini Construction Company Ltd).	22 Creditstone Road	ERIS (GEN)	No	Based on the distance from the Site and cross-gradient flow of groundwater, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.

PCA	DESCRIPTION OF PCA	LOCATION OF PCA	DATA SOURCE	PCA RESULTED IN APEC	RATIONALE
maintain transportation systems					
58. Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners	Listed for waste management system approvals in 2011 (2259453 Ontario Inc.)	111 Maplecrete Road	ERIS (ECA)	No	Based on age of the records in the ERIS report (2011) and due to the distance from the Site, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.
52. Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	Currently operating as automobile repair shop based on site visit	133 Maplecrete Road	Site Visit	No	Based on the distance from the Site, the PCA is unlikely to impact the environmental quality of soil and/or groundwater at the Site.

#### 5.1 Areas of Potential Environmental Concern

WSP has identified seven APECs with the potential to impact soil and groundwater conditions at the Site. These APECs correspond to locations where potential contamination may be present and have been categorized by assessing the overall relative potential for contamination from the findings present in Section 3 of this report. The APEC locations are summarized below and included in **Table 4** and **Figure 3**.

Based on review of records and windshield reconnaissance, the following Areas of Potential Environmental Concern and Contaminants of Potential Contaminant Concern (COPC) were identified for the Site (see **Table 4**).

#### APEC 1 (7540 Jane Street): Manufacturing of Motor Vehicle Parts, Electronics and Coating

- PCA 19 Electronic and Computer Equipment Manufacturing;
- PCA 39 Paints Manufacturing, Processing and Bulk Storage;
- PCA 57 Vehicles and Associated Parts Manufacturing.

#### APEC 2 (31 Maplecrete Road): Active FS Liquid Fuel Tank

PCA 28 - Gasoline and Associated Products Storage in Fixed Tanks.

#### APEC 3 (33 Maplecrete Road): Fuelling and Repair of Equipment

 PCA 52 – Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems.

#### APEC 4 (35 Maplecrete Road): Use of Chemicals and Fuelling and Repair of Equipment

- PCA 34 Metal Fabrication;
- PCA 52 Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems.

APEC 5 (66 Creditstone Road): Use of Petroleum Products and Fuelling and Repair of Equipment

• PCA 52 – Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems.

#### APEC 6 (69 Maplecrete Road): Fuelling and Repair of Equipment

• PCA 52 – Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems.

### APEC 7 (3131 Highway 7): Fuel Storage, Metal Treatment and Fuelling and Repair of Equipment

- PCA 28 Gasoline and Associated Products Storage in Fixed Tanks;
- PCA 33 Metal treatment, coating, plating and finishing;
- PCA 52 Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems.

#### APEC 8 (95 Creditstone Road): Fuelling and Repair of Equipment

 PCA 52 – Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems.

#### APEC 9 (90 Creditstone Road): Storage of Pesticides

• PCA 40 – Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications.

#### APEC 10 (100 Creditstone Road): Generation and Use of Concrete

• PCA 12 – Concrete, Cement and Lime Manufacturing.

#### APEC 11 (85 Creditstone Road): Fuelling and Repair of Equipment

 PCA 52 – Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems.

#### APEC 12 (96 Maplecrete Road): Storage of Pesticides

• PCA 40 – Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications.

#### APEC 13 (7551 Jane Street): Fuelling and Repair of Equipment

• PCA 52 – Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems.

#### APEC 14 (71 Creditstone Road): Fuelling and Repair of Equipment

• PCA 52 – Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems.

#### APEC 15 (120 Creditstone Road): Fuelling and Repair of Equipment

• PCA 52 – Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems.

# 6 Conclusions and Recommendations

Based on review of records and windshield reconnaissance, the following Areas of Potential Environmental Concern and Contaminant of Potential Contaminant Concern (COPC) were identified for the Site (see **Table 4** and **Figure 3**).

Table 4 Summary of Areas of Potential Environmental Concern

APEC ID	LOCATION OF APEC ON THE SITE	POTENTIALLY CONTAMINATING ACTIVITIES	COPC	MEDIA POTENTIALLY IMPACTED
APEC 1A	7540 Jane Street	19. Electronic and Computer Equipment Manufacturing	Metals, arsenic, VOCs	Soil and Groundwater
APEC 1B	7540 Jane Street	39. Paints Manufacturing, Processing and Bulk Storage	Metals, antimony, chromium VI, mercury, selenium, VOCs, PAHs	Soil and Groundwater
APEC 1C	7540 Jane Street	57. Vehicles and Associated Parts Manufacturing	Metals, chromium VI, VOCs, PHCs	Soil and Groundwater
APEC 2	31 Maplecrete Road	28. Gasoline and Associated Products Storage in Fixed Tanks	PHCs, BTEX	Soil and Groundwater

APEC ID	LOCATION OF APEC ON THE SITE	POTENTIALLY CONTAMINATING ACTIVITIES	COPC	MEDIA POTENTIALLY IMPACTED
APEC 3	33 Maplecrete Road	52. Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	Metals, PHCs, BTEX	Soil and Groundwater
APEC 4A	35 Maplecrete Road	34. Metal Fabrication	Metals, VOCs	Soil and Groundwater
APEC 4B	35 Maplecrete Road	52. Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	Metals, PHCs, BTEX	Soil and Groundwater
APEC 5	66 Creditstone Road	52. Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	Metals, PHCs, BTEX	Soil and Groundwater

APEC ID	LOCATION OF APEC ON THE SITE	POTENTIALLY CONTAMINATING ACTIVITIES	COPC	MEDIA POTENTIALLY IMPACTED
APEC 6	69 Maplecrete Road	52. Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	Metals, PHCs, BTEX	Soil and Groundwater
APEC 7A	3131 Highway 7	28. Gasoline and Associated Products Storage in Fixed Tanks	PHCs, BTEX	Soil and Groundwater
APEC 7B	3131 Highway 7	33. Metal treatment, coating, plating and finishing	Metals, cyanide, antimony, chromium VI, mercury, selenium, low pH	Soil and Groundwater
APEC 7C	3131 Highway 7	52. Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	Metals, PHCs, BTEX	Soil and Groundwater
APEC 8	95 Creditstone Road	52. Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	Metals, PHCs, BTEX	Soil and Groundwater

APEC ID	LOCATION OF APEC ON THE SITE	POTENTIALLY CONTAMINATING ACTIVITIES	COPC	MEDIA POTENTIALLY IMPACTED
APEC 9	90 Creditstone Road	40. Pesticides (including Herbicides, Fungicides and Anti- Fouling Agents) Manufacturing, Processing, Bulk Storage and Large- Scale Applications	Metals, antimony, chromium, mercury, selenium, VOCs, PAHs, PCBs	Soil and Groundwater
APEC 10	100 Creditstone Road	12. Concrete, Cement and Lime Manufacturing	pH, calcium, radioactive potassium, uranium and thorium	Soil and Groundwater
APEC 11	85 Creditstone Road	52. Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	Metals, PHCs, BTEX	Soil and Groundwater
APEC 12	96 Maplecrete Road	40. Pesticides (including Herbicides, Fungicides and Anti- Fouling Agents) Manufacturing, Processing, Bulk Storage and Large- Scale Applications	Metals, antimony, chromium VI, mercury, selenium, VOCs, PAHs, PCBs	Soil and Groundwater

APEC ID	LOCATION OF APEC ON THE SITE	POTENTIALLY CONTAMINATING ACTIVITIES	COPC	MEDIA POTENTIALLY IMPACTED
APEC 13	7551 Jane Street	52. Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	Metals, PHCs, BTEX	Soil and Groundwater
APEC 14	71 Creditstone Road	52. Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	Metals, PHCs, BTEX	Soil and Groundwater
APEC 15	120 Creditstone Road	52. Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	Metals, PHCs, BTEX	Soil and Groundwater

Note: COPC = Contaminant of Potential Contaminant Concern

Based on the above information, WSP recommends that a Phase Two ESA be completed for the Site, to characterize soil and groundwater conditions that may impact soil management and disposal, dewatering and other aspects related to extensions of Interchange Way and Millway Avenue for the Vaughan Metropolitan Centre.

Vaughan Metropolitan Centre (VMC) Schedule 'C' Class Environmental Assessment (EA) Studies for the Extensions of Interchange Way and Millway Avenue

On May 2025, City of Vaughan provided WSP with updated design drawings. The updated design drawings had minor change in alignment located along Interchange Way (east of intersection of Interchange Way and Jane Street (shown in **Figure 4**)). WSP reviewed the drawings and found that the minor change in design does not impact the overall findings for this COS report.

## 7 Assessor Qualifications

The records review, site reconnaissance, and reporting was completed by **Ms. Samara Kadhim, M.Sc.**, who is an Environmental Scientist with WSP Canada Inc. Samara has over six (6) years of experience in environmental site assessments. She has conducted Contamination Overview Studies, Phase I and II Environmental Site Assessments for industrial, commercial and residential properties under the supervision of a Qualified Person (QP<sub>ESA</sub>). In completing this work, she has contributed to identifying, defining and quantifying potential environmental liabilities to satisfy due diligence and regulatory obligations. Samara also has experience in field investigation techniques including test pitting, borehole drilling, and monitoring and sampling of soil and groundwater.

The Contamination Overview Study was managed, and COS report was reviewed by Ms. Natalia Codoban, M.Eng., P.Eng., Senior Hydrogeologist / Environmental Engineer with WSP Canada Inc. Ms. Codoban has an academic background in Earth / Environmental Sciences and Geology and Environmental Engineering. She is a licensed professional engineer and a QP<sub>ESA</sub> under O. Reg. 153/04 for completion of ESA. She has over 17 years of experience in managing environmental and hydrogeological investigations for private, governmental and municipal clients, including Phase One and Two ESAs, COSs, contaminated site assessments (brownfields), environmental investigations, groundwater assessments and hydrogeological projects.

# 8 Standard Limitations

WSP Canada Inc. prepared this report solely for the use of the intended recipient, **the City of Vaughan**, in accordance with the professional services agreement between the parties. In the event a contract has not been executed, the parties agree that the WSP General Terms for Consultant shall govern their business relationship which was provided to you prior to the preparation of this report.

The report is intended to be used in its entirety. No excerpts may be taken to be representative of the findings in the assessment.

The conclusions presented in this report are based on work performed by trained, professional and technical staff, in accordance with their reasonable interpretation of current and accepted engineering and scientific practices at the time the work was performed.

The content and opinions contained in the present report are based on the observations and/or information available to WSP at the time of preparation, using investigation techniques and engineering analysis methods consistent with those ordinarily exercised by WSP and other engineering/scientific practitioners working under similar conditions, and subject to the same time, financial and physical constraints applicable to this project.

WSP disclaims any obligation to update this report if, after the date of this report, any conditions appear to differ significantly from those presented in this report; however, WSP reserves the right to amend or supplement this report based on additional information, documentation or evidence.

WSP makes no other representations whatsoever concerning the legal significance of its findings.

The intended recipient is solely responsible for the disclosure of any information contained in this report. If a third party makes use of, relies on, or makes decisions in accordance with this report, said third party is solely responsible for such use, reliance or decisions. WSP does not accept responsibility for damages, if any, suffered by any third party as a result of decisions made or actions taken by said third party based on this report.

WSP has provided services to the intended recipient in accordance with the professional services agreement between the parties and in a manner consistent with that degree of care, skill and diligence normally provided by members of the same profession performing the same or comparable services in respect of projects of a similar nature in similar circumstances. It is understood and agreed by WSP and the recipient of this report that WSP provides no warranty, express or implied, of any kind. Without limiting the generality of the foregoing, it is agreed and understood by WSP and the recipient of this report that WSP makes no representation or warranty whatsoever as to the sufficiency of its scope of work for the purpose sought by the recipient of this report.

In preparing this report, WSP has relied in good faith on information provided by others, as noted in the report. WSP has reasonably assumed that the information provided is correct and WSP is not responsible for the accuracy or completeness of such information.

Benchmark and elevations used in this report are primarily to establish relative elevation differences between the specific testing and/or sampling locations and should not be used for other purposes, such as grading, excavating, construction, planning, development, etc.

WSP disclaims any responsibility for consequential financial effects on transactions or property values, or requirements for follow-up actions /or costs.

Design recommendations given in this report are applicable only to the project and areas as described in the text and then only if constructed in accordance with the details stated in this report. The comments made in this report on potential construction issues and possible methods are intended only for the guidance of the designer. The number of

testing and/or sampling locations may not be sufficient to determine all the factors that may affect construction methods and costs. We accept no responsibility for any decisions made or actions taken as a result of this report unless we are specifically advised of and participate in such action, in which case our responsibility will be as agreed to at that time.

Overall conditions can only be extrapolated to an undefined limited area around these testing and sampling locations. The conditions that WSP interprets to exist between testing and sampling points may differ from those that actually exist. The accuracy of any extrapolation and interpretation beyond the sampling locations will depend on natural conditions, the history of Site development and changes through construction and other activities. In addition, analysis has been carried out for the identified chemical and physical parameters only, and it should not be inferred that other chemical species or physical conditions are not present. WSP cannot warrant against undiscovered environmental liabilities or adverse impacts off-Site.

The original of this digital file will be kept by WSP for a period of not less than 10 years. As the digital file transmitted to the intended recipient is no longer under the control of WSP, its integrity cannot be assured. As such, WSP does not guarantee any modifications made to this digital file subsequent to its transmission to the intended recipient.

This limitations statement is considered an integral part of this report.

#### Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

**Reliance on information in Report:** This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

**Trademark and Copyright:** You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

#### Description:

Two Vaughn companies have been convicted for offences committed under the Environmental Protection Act and fined a total of \$115,000. The Canadian National Railway Company (CNR) was convicted for failing to comply with a ministry order and GT Reload Corp. for illegal waste activities. 'The Province is always prepared to go to court to defend the natural environment from those who would treat it irresponsibly and cause harm', said Environment Minister Jim Bradley. GT Reload Corp. was responsible for site operations at a solid non-hazardous waste transfer site in Vaughan owned by CNR.. Ministry staff conducted an inspection at the site and had concerns about the quantity of waste stored inside and outside the waste transfer building. A ministry order was issued to the CNR to reduce the quantity of waste stored in the building, remove all wood waste stored outside of the building in order to reduce the risk of a fire, and apply for a ministry approval for a sewage works. The company failed to fully comply with the ministry order. GT Reload Corp. was found quilty in an ex parte trial for exceeding the limits of waste tonnage stored in the building and in rail cars used to transport waste for disposal, storing waste outdoors, and for failing to maintain a log book. CNR pleaded guilty to failing to reduce the quantity of waste stored in the waste transfer building, failing to remove all wood waste stored outside the building, and failing to submit an application for a ministry approval for the discharge of sewage to a water course. The Canadian National Railway Company was fined \$35,000 and GT Reload Corp. was fined \$80,000 for a total of \$115,000 plus victim fine surcharges of \$28,750. The companies were given 30 days to pay the fines.

Act: Act(s): First Matter: Second Matter: Ministry District:

Investigation 1: Investigation 2: Penalty Imposed: Description:

On January 22, 2010, First Waste Transload Inc. was fined \$18,000 plus victim fine surcharges for failing to comply with its Certificate of Approval for the operation of a waste disposal site. The Court heard that the company operates a waste disposal site on a Canadian National Railway (CN) property in Vaughan. Solid non-hazardous waste is brought to the site by truck and taken away for disposal in railcars. The company's Certificate of Approval includes a condition that limits the amount of waste stored on site, other than that in railcars. The condition also states that if waste cannot be transferred from the site, the site should stop accepting waste. On three occasions in 2008, the site was inspected by a Provincial Officer. During each inspection, the Officer determined that the amount of waste stored on the site was in excess of the limit set in the company's Certificate of Approval. The company was charged following an investigation by the ministry's Investigations and Enforcement Branch. The company was convicted in absentia, of three violations under the Environmental Protection Act relating to noncompliance with its Provisional Certificate of Approval. The company was fined \$18,000 plus victim fine surcharges, and given 30 days to pay.

# Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " \* " indicates that the database will no longer be updated. See the individual database description for more information.

#### Abandoned Aggregate Inventory:

Provincial

**AAGR** 

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.\*

Government Publication Date: Sept 2002\*

Aggregate Inventory:

Provincial AGR

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

Government Publication Date: Up to Sep 2020

#### **Abandoned Mine Information System:**

Provincial

AMIS

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Oct 2018

# Anderson's Waste Disposal Sites:

Private

ANDR

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

#### Aboveground Storage Tanks:

Provincial

AST

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

# **Automobile Wrecking & Supplies:**

Private

**AUWR** 

Order No: 20200605020

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Dec 31, 2020

**Borehole:** Provincial BORE

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval:

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011\*

Dry Cleaning Facilities: Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Government Publication Date: Jan 2004-Dec 2018

Commercial Fuel Oil Tanks:

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: May 31, 2021

#### **Chemical Manufacturers and Distributors:**

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2020

<u>Chemical Register:</u> Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

Government Publication Date: 1999-Dec 31, 2020

#### **Compressed Natural Gas Stations:**

Private CNC

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 -Apr 2021

#### **Inventory of Coal Gasification Plants and Coal Tar Sites:**

Provincial COAL

Order No: 20200605020

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.\*

Government Publication Date: Apr 1987 and Nov 1988\*

Compliance and Convictions:

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Jul 2021

Certificates of Property Use: Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994- Jul 31, 2021

<u>Drill Hole Database:</u> Provincial DRL

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Sep 2020

Delisted Fuel Tanks:

Provincial DTNK

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

Government Publication Date: May 31, 2021

#### **Environmental Activity and Sector Registry:**

Provincial EASR

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Oct 2011- Jun 30, 2021

Environmental Registry:

Provincial EBR

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994- Jul 31, 2021

#### **Environmental Compliance Approval:**

Provincial

FCA

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011- Jun 30, 2021

#### **Environmental Effects Monitoring:**

Federal

EEM

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007\*

ERIS Historical Searches:

Private EHS

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Jun 30, 2021

#### **Environmental Issues Inventory System:**

Federal

EIIS

Order No: 20200605020

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001\*

#### Emergency Management Historical Event:

Provincial List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many

of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Dec 31, 2016

#### **Environmental Penalty Annual Report:**

Provincial

**EPAR** 

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2020

#### List of Expired Fuels Safety Facilities:

Provincial

**EXP** 

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Federal Convictions: Federal **FCON** 

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007\*

#### Contaminated Sites on Federal Land:

Federal

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Apr 2021

#### Fisheries & Oceans Fuel Tanks:

Federal

**FOFT** 

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2019

#### Federal Identification Registry for Storage Tank Systems (FIRSTS):

Federal

**FRST** 

Order No: 20200605020

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: May 31, 2018

Fuel Storage Tank: Provincial **FST** 

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information. Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are

not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Fuel Storage Tank - Historic:

Provincial FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010\*

#### Ontario Regulation 347 Waste Generators Summary:

Provincial

GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Apr 30, 2021

# **Greenhouse Gas Emissions from Large Facilities:**

Federal

GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

Government Publication Date: 2013-Dec 2019

TSSA Historic Incidents:

Provincial HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009\*

#### Indian & Northern Affairs Fuel Tanks:

Federal

IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003\*

Fuel Oil Spills and Leaks:

Provincial

NC

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing in a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: May 31, 2021

#### **Landfill Inventory Management Ontario:**

Provincial

LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Feb 28, 2019

Canadian Mine Locations:

Private

MINE

Order No: 20200605020

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009\*

Mineral Occurrences:

Provincial MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Dec 2020

#### National Analysis of Trends in Emergencies System (NATES):

Federal

NATE

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994\*

#### Non-Compliance Reports:

Provincial

NCPL

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: Dec 31, 2019

#### National Defense & Canadian Forces Fuel Tanks:

Federal

NDFT

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001\*

#### National Defense & Canadian Forces Spills:

Federal

NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Apr 2018

#### National Defence & Canadian Forces Waste Disposal Sites:

Federal

NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007\*

#### National Energy Board Pipeline Incidents:

Federal

NEBI

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Mar 31, 2021

# National Energy Board Wells:

Federal

**NEBP** 

Order No: 20200605020

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release

Government Publication Date: 1920-Feb 2003\*

#### National Environmental Emergencies System (NEES):

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December

Government Publication Date: 1974-2003\*

National PCB Inventory: Federal NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008\*

#### National Pollutant Release Inventory:

Federal NPRI

Federal

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

Government Publication Date: 1993-May 2017

Oil and Gas Wells:

Private OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-Feb 28, 2021

Ontario Oil and Gas Wells:

Provincial OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Government Publication Date: 1800-Jun 2020

#### Inventory of PCB Storage Sites:

Provincial

**OPCB** 

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders: Provincial ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994-Jul 31, 2021

# Canadian Pulp and Paper:

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

# Parks Canada Fuel Storage Tanks:

Federal

PCFT

Order No: 20200605020

PAP

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005

Pesticide Register:

Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: Oct 2011- Jun 30, 2021

Provincial PINC Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

Government Publication Date: May 31, 2021

#### Private and Retail Fuel Storage Tanks:

Provincial

PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996\*

Permit to Take Water:

Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994- Jul 31, 2021

#### Ontario Regulation 347 Waste Receivers Summary:

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-1990, 1992-2018

Record of Site Condition:

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

Government Publication Date: 1997-Sept 2001, Oct 2004-Jul 2021

Retail Fuel Storage Tanks:

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Dec 31, 2020

#### Scott's Manufacturing Directory:

Private

SCT

Order No: 20200605020

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011\*

Ontario Spills:

Provincial SPL

List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Government Publication Date: 1988-Aug 2020

#### Wastewater Discharger Registration Database:

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

Government Publication Date: 1990-Dec 31, 2018

Private Anderson's Storage Tanks: **TANK** 

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953\*

#### Transport Canada Fuel Storage Tanks:

Federal **TCFT** 

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970 - Dec 2020

#### Variances for Abandonment of Underground Storage Tanks:

Provincial VAR

Provincial

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

Government Publication Date: May 31, 2021

#### Waste Disposal Sites - MOE CA Inventory:

Provincial WDS

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011- Jun 30, 2021

#### Waste Disposal Sites - MOE 1991 Historical Approval Inventory:

Provincial **WDSH** 

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990\*

#### Water Well Information System:

Provincial

**WWIS** 

Order No: 20200605020

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Apr 30, 2021

# **Definitions**

<u>Database Descriptions:</u> This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

<u>Detail Report</u>: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

<u>Distance:</u> The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

<u>Direction</u>: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

<u>Elevation:</u> The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

<u>Map Key:</u> The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

<u>Unplottables:</u> These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

Order No: 20200605020

RE: Information Request 99 -146 Peelar Road, Concord, ON **Subject:** 

Please refrain from sending documents to head office and only submit your requests electronically via email along with credit card payment. We are all working remotely and mailing in applications with cheques will lengthen the overall processing time.

#### NO RECORD FOUND

Hello,

Thank you for your request for confirmation of public information.

We confirm that there are no records in our database of any fuel storage tanks at the subject addresses.

For a further search in our archives please complete our release of public information form found at https://www.tssa.org/en/about-tssa/release-of-public-information.aspx? mid =392 and email the completed form to publicinformationservices@tssa.org along with a fee of \$56.50 (including HST) per location. The fee is payable with credit card (Visa or MasterCard).

Although TSSA believes the information provided pursuant to your request is accurate, please note that TSSA does not warrant this information in any way whatsoever.

Kind regards,

Mariah
