

Municipal infrastructure improvements

SEPTEMBER 2025 | NEWSLETTER #2

Dear resident/business owner,

The City of Vaughan is improving stormwater management infrastructure at Site 23, located between Highway 400 and Four Valley Drive.

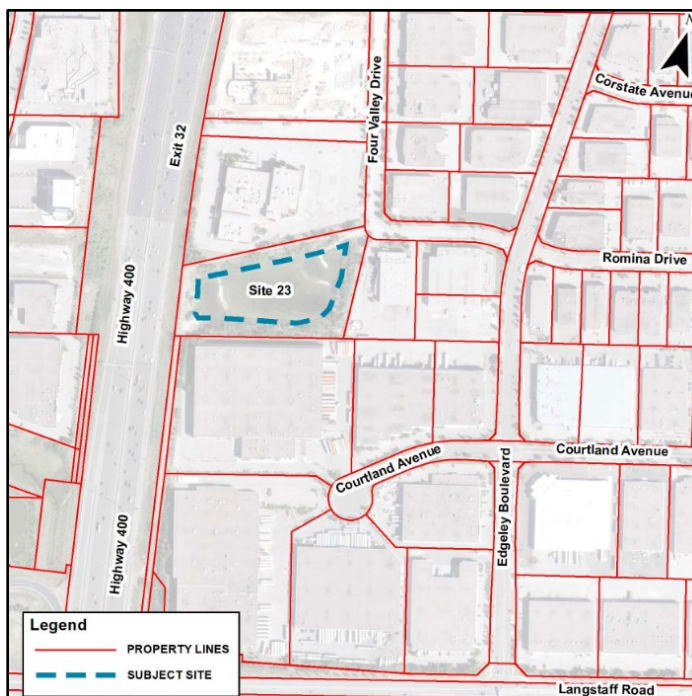

Work will include removing sediment from the stormwater management pond and upgrading maintenance access locations.

The City-retained contractor, Varcon Construction Corporation, is scheduled to begin construction by late fall 2025, with work anticipated to be completed by early 2027.

To safely complete the work, temporary traffic and pedestrian detours may be required in the area.

For more information about the project, visit vaughan.ca/InfrastructureProjects.
