

Bruce Street watermain replacement

NOVEMBER 2025 | NEWSLETTER #3

Dear resident,

Work to replace the aging watermain on Bruce Street at Highway 7 is anticipated to be completed by the end of November 2025.

To safely and efficiently complete the work, there will be continued lane reductions on Bruce Street. Traffic control is in place to guide vehicles through the area.

As part of the work, curb boxes on Bruce Street will also be replaced.

If your curb box is located within your driveway, access will be temporarily impacted. You will be given 24-hours' notice of the replacement work and asked to remove all vehicles from the area. Your driveway will remain inaccessible until the work is completed—typically by the end of the day.

During your curb box replacement, water service to your home will be interrupted for approximately one hour.

What is a curb box?

Curb boxes are round metal plates located on the front lawn, driveway, or sidewalk of a property. They are owned and operated by the City and control the water running to a home or building from the City's watermain.
