## CONCORD GO CENTRE STORM DRAINAGE MASTER PLAN

### NOTICE OF STUDY COMMENCEMENT

#### The study

The City of Vaughan has initiated an Environmental Assessment to undertake the Concord GO Centre Storm Drainage Master Plan (“the study”). The study is a broad-level assessment detailing flooding and drainage deficiencies in the area and considers improvement alternatives to address them and reduce flooding. As part of the study, the alternative solutions will be evaluated to establish a preferred alternative solution to be implemented by the City moving forward. The study covers drainage areas mainly north of Highway 407 and south of Teston Road, as identified on the Study Area Overview Map below, and includes the Concord GO Secondary Plan Area, a major transit station area, and nearby drainage areas.

Study Area Overview Map

## The Process

The study will be conducted and completed in accordance with the requirements of the Municipal Engineers Association, "the Municipal Class Environmental Assessment (February 2024)", covering Phases 1 and 2 following Approach #2 of the Master Planning process. This approach involves undertaking the Concord GO Centre Storm Drainage Master Plan, with detailed assessment work, satisfying the requirements of Schedule 'B' projects.

## Public consultation

Engaging with residents and other stakeholders is an important part of this study. The City will work together with the community to share information, gather feedback and explore ways to improve drainage in the area.

Two in-person sessions will be held during the study to share findings, design options and recommendations for feedback. Details will be posted on the project webpage at [vaughan.ca/ConcordGO](http://vaughan.ca/ConcordGO) closer to the consultation dates.

Visit [vaughan.ca/ConcordGO](http://vaughan.ca/ConcordGO) for more information.
