

Drainage improvements on FenYROSE Crescent

AUGUST 2026 | NEWSLETTER #2

Dear resident,

The City of Vaughan is improving the drainage at FenYROSE Crescent and Golf Avenue to mitigate flooding in the area.

Improvements will include:

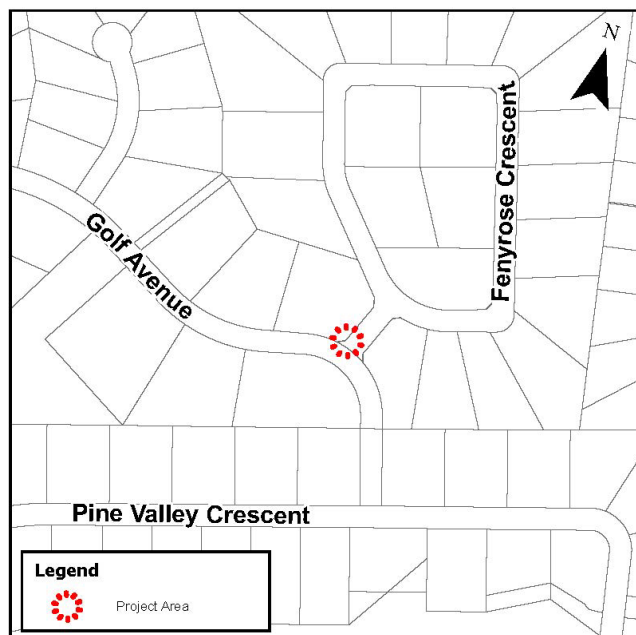

- the installation of a new double catch basin and improved asphalt grading at the corner of FenYROSE Crescent and Golf Avenue.
- the installation of a new oil grit separator to improve the quality of stormwater discharged into the water stream.

Construction is anticipated to begin later this month and be completed by the end of October, site and weather conditions allowing.

For your safety, please follow all posted construction signage and directions from on-site personnel while travelling through the area.
