

Drainage Improvements

OCTOBER 2026 | NEWSLETTER #1

Dear resident,

In response to resident concerns about stormwater drainage in your neighbourhood, the City of Vaughan is planning infrastructure improvements to mitigate future pooling and flooding.

Resilient Consulting has been retained to assess the area in the vicinity of Lloyd Street and Davidson Drive and identify potential drainage improvements. The assessment of roadway conditions, drainage patterns and storm sewer capacity is underway and anticipated to be completed by the end of October. In the meantime, site and roadway conditions will continue to be monitored for pooling and flooding.

Visit vaughan.ca/Development-Engineering and follow the link under *additional resources* for more updates.
