

Stormwater pond, City of Vaughan

Learn how we're managing stormwater in the VMC

Attend an Open House on May 14

As the Vaughan Metropolitan Centre (VMC) continues to transform into a vibrant downtown core with plenty of transportation connections, housing options, retail, schools, public amenities including parks and so much more, we are putting plans in place to manage this growth.

The City of Vaughan is undertaking the VMC Stormwater Management and Drainage Enhancement Environmental Assessment Study to evaluate current and alternative stormwater controls within the area to ensure they can mitigate stormwater runoff with respect to flooding, water quality and more.

Over the years, you've had the opportunity to be part of the planning process. We're now hosting a final Open House to present our proposed plan for stormwater management facilities – drop by to learn more and speak to the project team!

Date: Thursday, May 14

Time: Drop in anytime from 5:30 p.m. to 7:30 p.m.

Location: David Braley Vaughan Metropolitan Centre of Community (200 Apple Mill Rd.), in the main lobby

Can't attend in person?

Materials from the meeting will be posted to vaughan.ca/VMCSWM on Thursday, May 14. Comments or questions can be submitted via email to vmc.swmstudy@vaughan.ca until **Friday, May 29**.
