Insulator Replacement and Tower Maintenance Work

September 2019

Hydro One will be performing maintenance work on two hydro towers respectively located adjacent to Bindertwine Park in Kleinburg and to Findley Park in Woodbridge. By conducting regular maintenance, we can continue to deliver a safe and reliable supply of energy to homes and businesses across Ontario.

What work will be completed?

Hydro One will be replacing priority insulators that have reached their end-of-life. In order to complete this maintenance work, a helicopter will be used to assist crews, as the site is not accessible with our typical heavy vehicle equipment.

When will work be completed?

It is anticipated that crews will be onsite intermittently for two days from September 10th to 27th.

What can I expect?

During the duration of the work, residents may notice an increase in noise, heavy equipment and activity.

Bindertwine Park

Residents and park users can expect to see a helicopter staging area located adjacent to the baseball diamond, and find temporary restrictions to pedestrian pathways and parking near the end of the lot. Hydro One crews will be onsite to control pedestrian traffic.

Findley Park

Residents and park users can expect temporary restrictions to informal pathways.

We understand this work may be disruptive to the community and thank you for your patience. For more information, please contact:
