

NEWSLETTER No. 3:

MAJOR MACKENZIE DRIVE - WATERMAIN REPLACEMENT

March 27, 2019

Further to our last newsletter that was issued in May of last year we are providing an update on the construction status and schedule for the completion of the remaining work.

PROJECT STATUS

We are pleased to advise that the new watermain and water services have been installed and are in full service on Major Mackenzie Drive. Unfortunately, the watermain construction extended beyond the anticipated November 2018 completion and it was not possible to complete the permanent restoration of the roadways, driveways and boulevards that were impacted by construction. Therefore, it was necessary to defer this work to the spring.

SCHEDULE FOR COMPLETION OF PERMANENT RESTORATION WORK

Our Contractor will be remobilizing during the week of April 8th (weather permitting) to complete the permanent restoration work to the impacted roadways, sidewalks, curb driveways and boulevards within the construction limits and we expect to have all remaining restoration work completed by May 31st of this year.

The restoration work will include the permanent pavement restoration including resurfacing of the sections of the eastbound curb lane on Major Mackenzie Drive and other locations in the roadway that were impacted by the Construction.

All disturbed boulevard areas and landscape work will be fully restored to original or better condition with topsoil and sod.

In addition, old hydrants and valves that have been abandoned will be removed.

The City appreciates your co-operation and patience as we work to complete the remaining construction and restoration work this spring.
