

Welcome to the

Purpleville Park

Public Open House | Nov. 18, 2025

About the project

A new neighbourhood park is coming to your community!

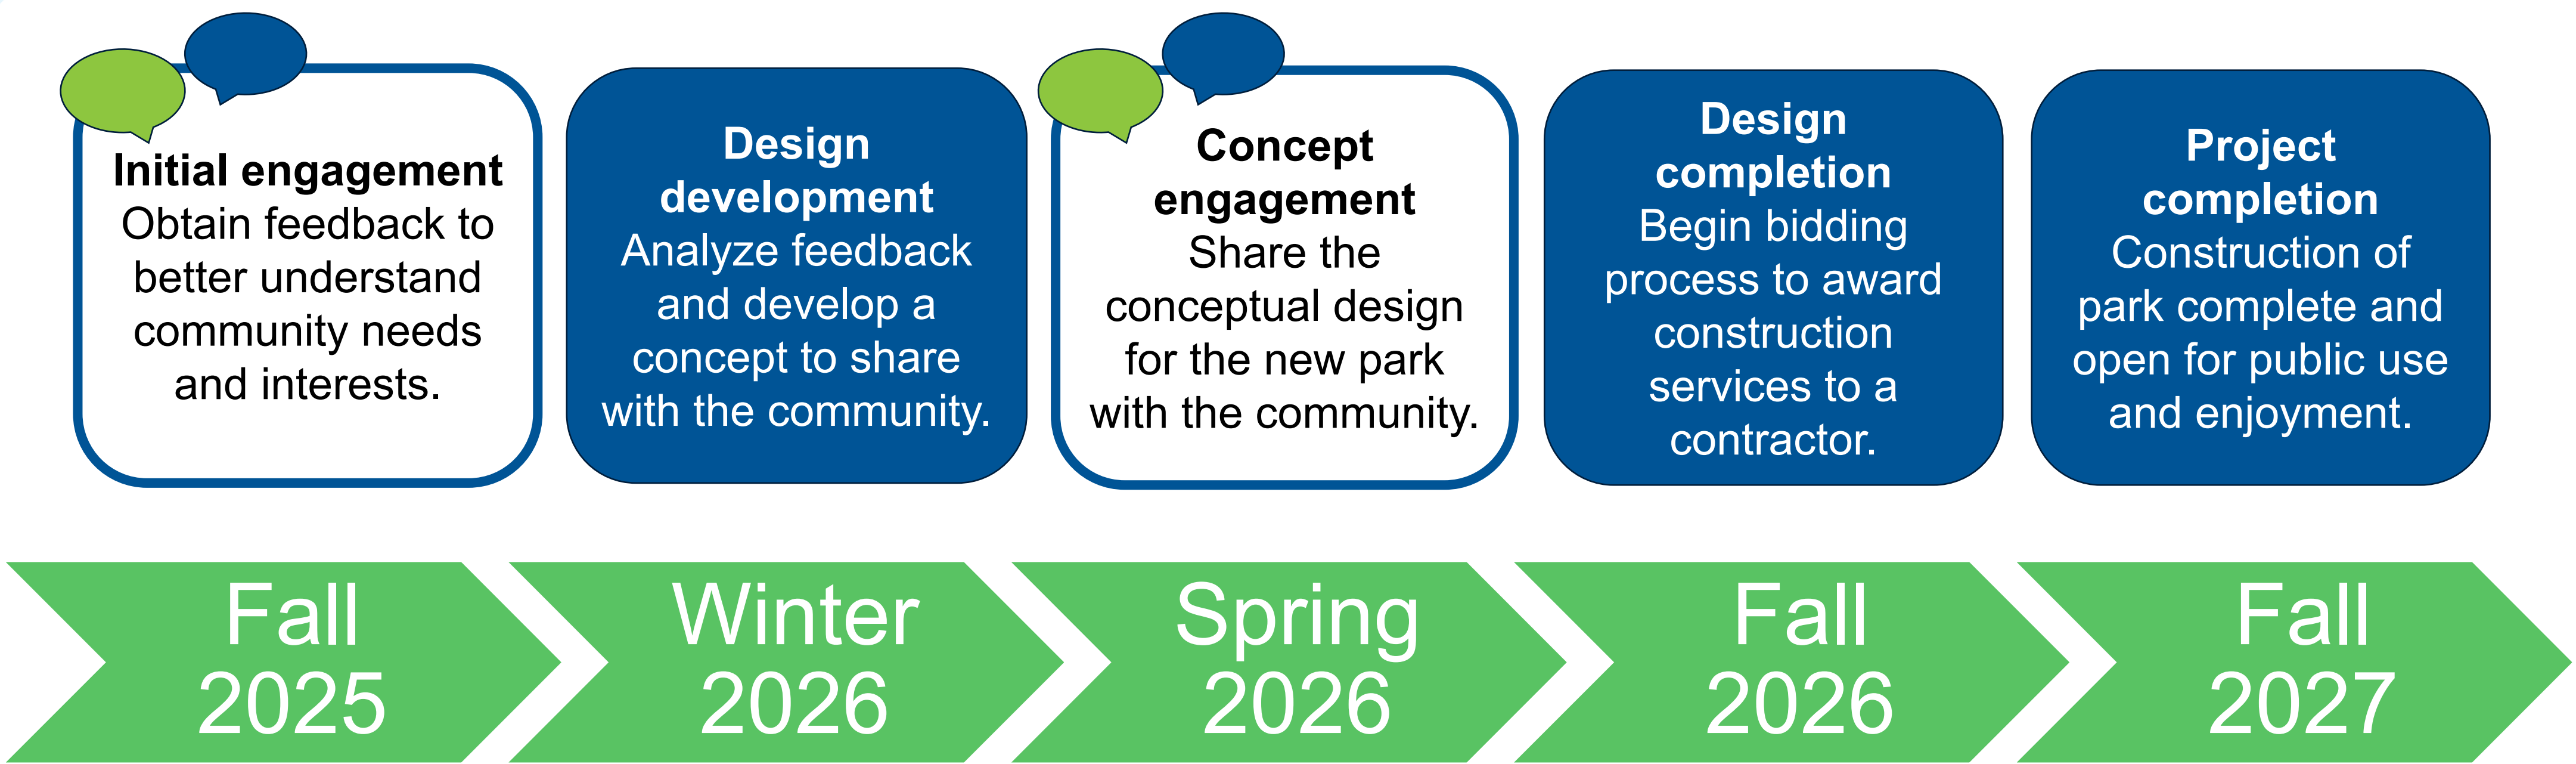

The City of Vaughan is ready to begin planning for Purpleville Park, a new neighbourhood park that will serve the local community in the Teston Road and Pine Valley Drive area, and we want your input!

Purpleville Park will be located at 140 Brant Dr., between Greville Street to the east and Ballantyne Boulevard to the west.

About neighbourhood parks:

- 1-5 hectares (2.5-12 acres) in size
- Serves residents within a 10-minute walking distance from the park

Engagement and design timeline

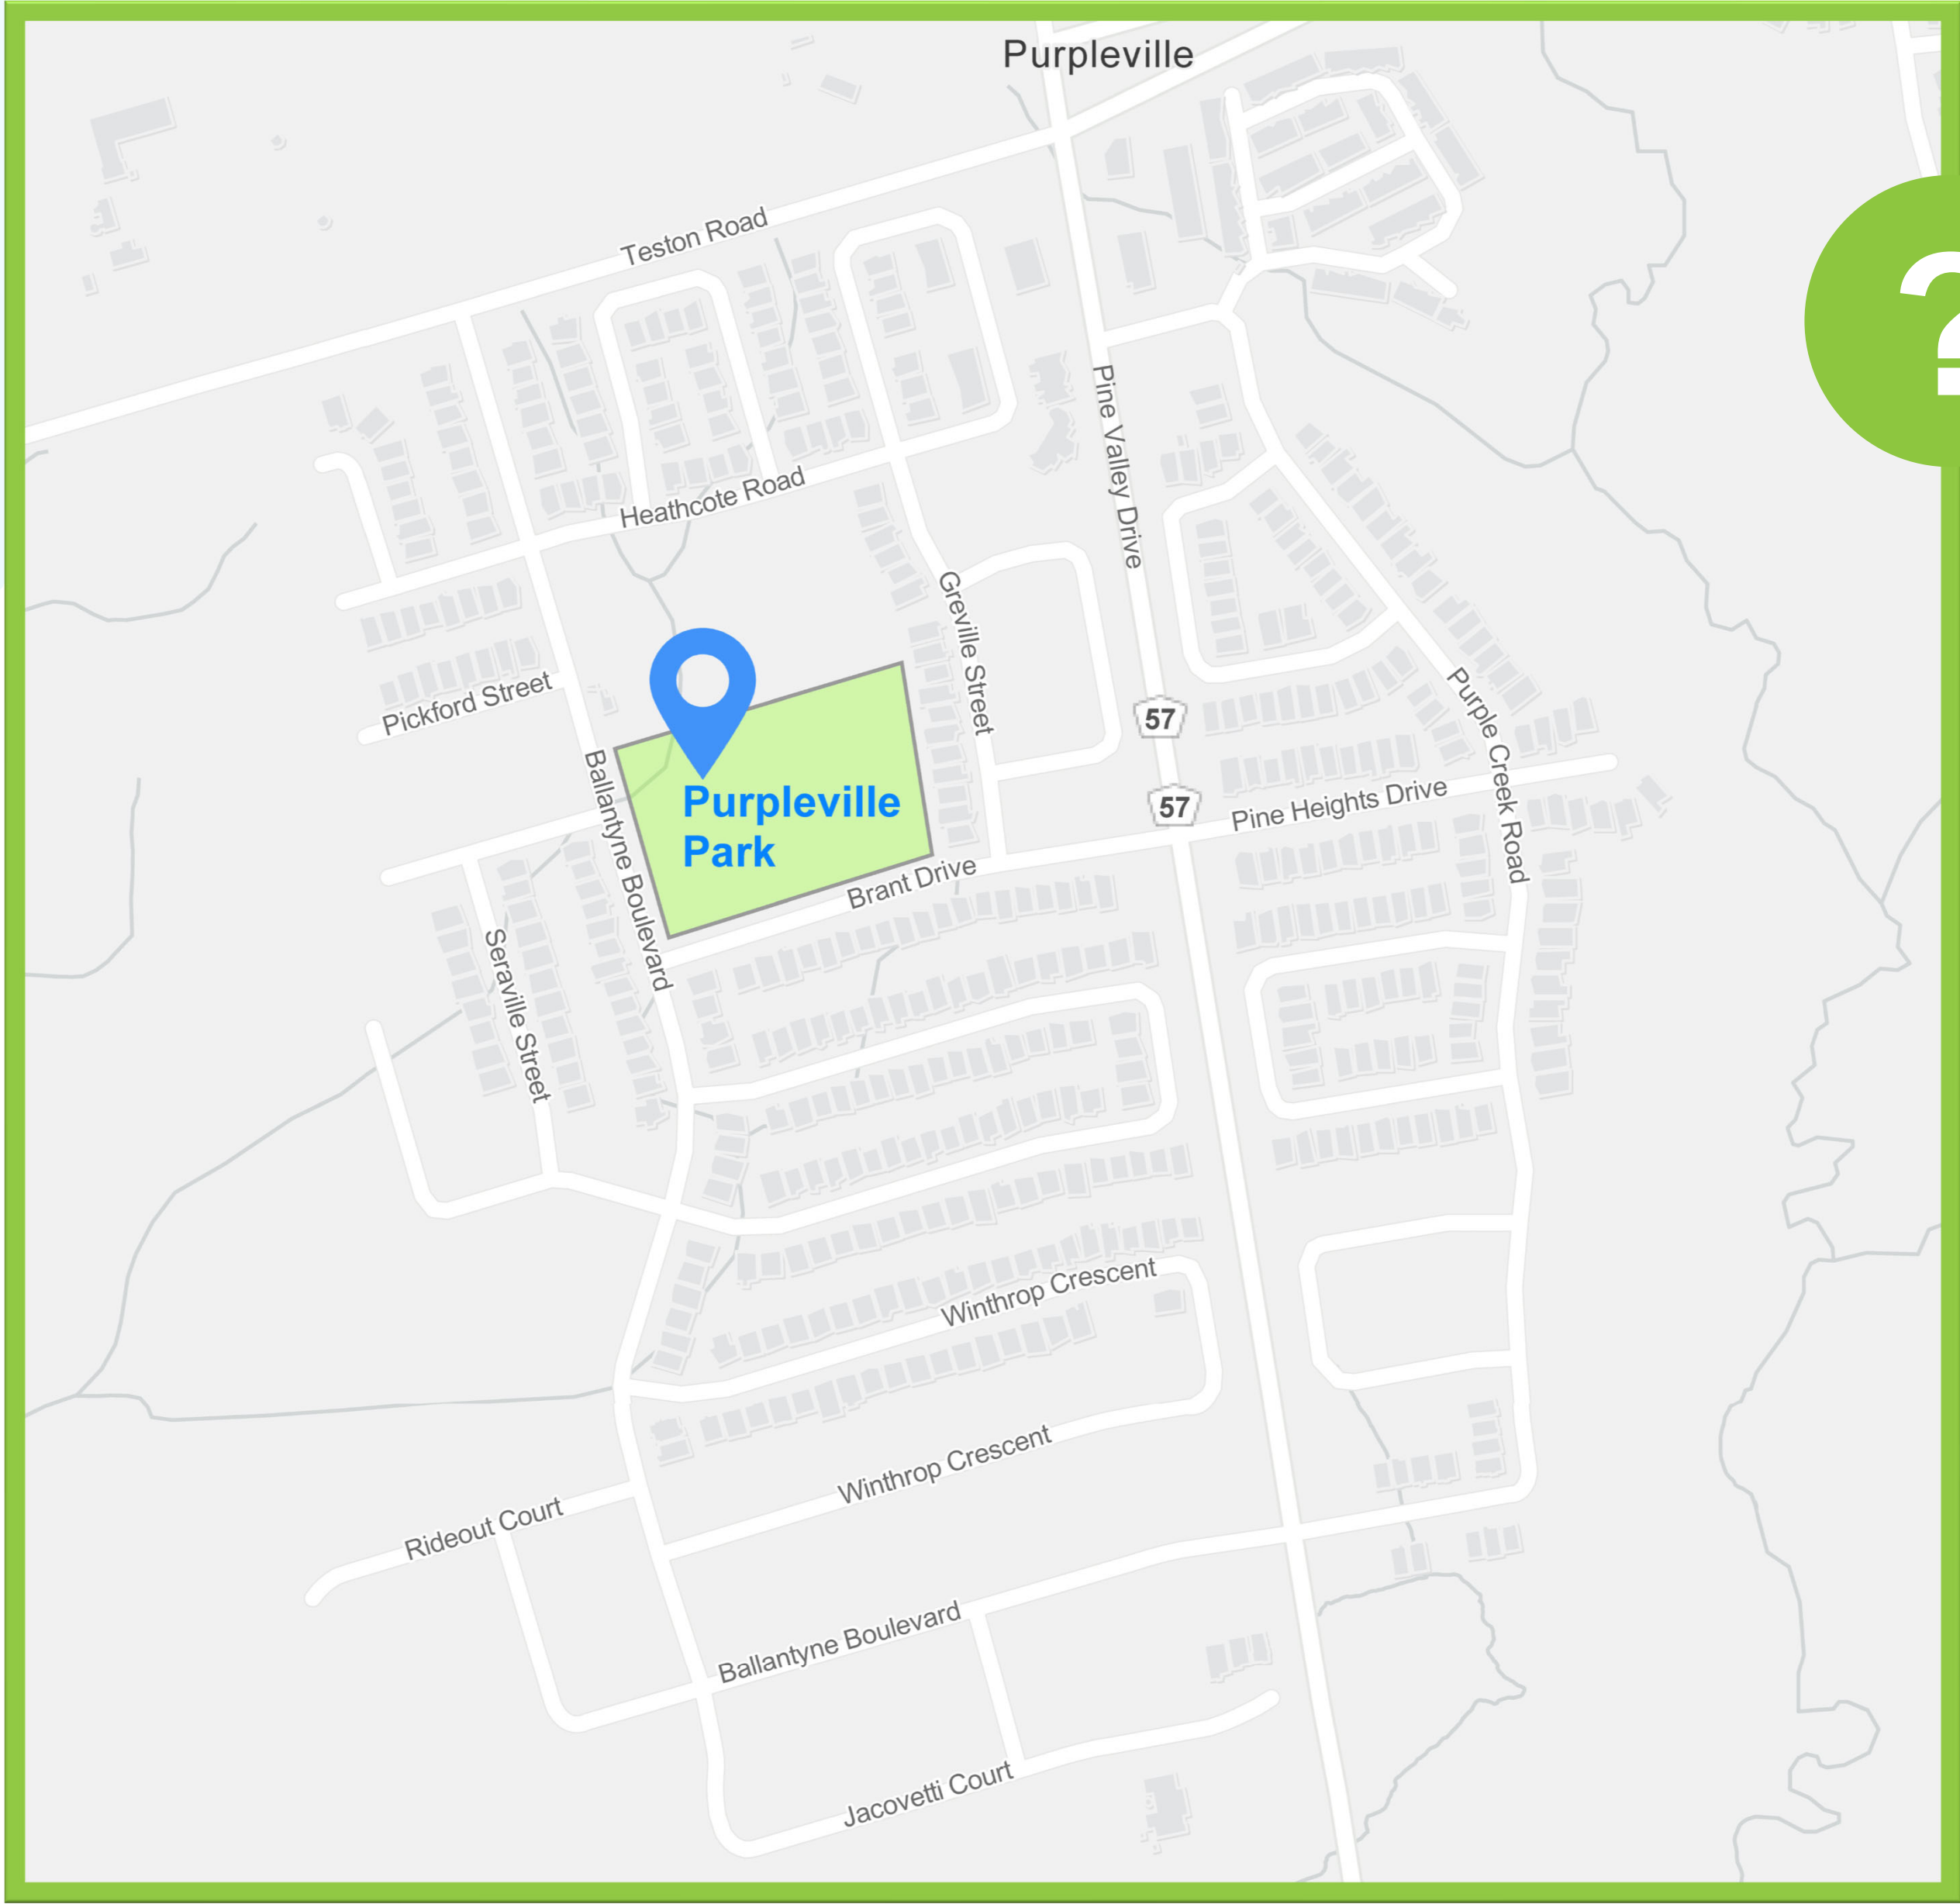

Please note this project timeline may be subject to change.

Getting to know you!

Q1: Where do you live?

Place a DOT ● sticker on the map below to show us where you live.

Q2: Including yourself, what age groups apply to the people in your household?

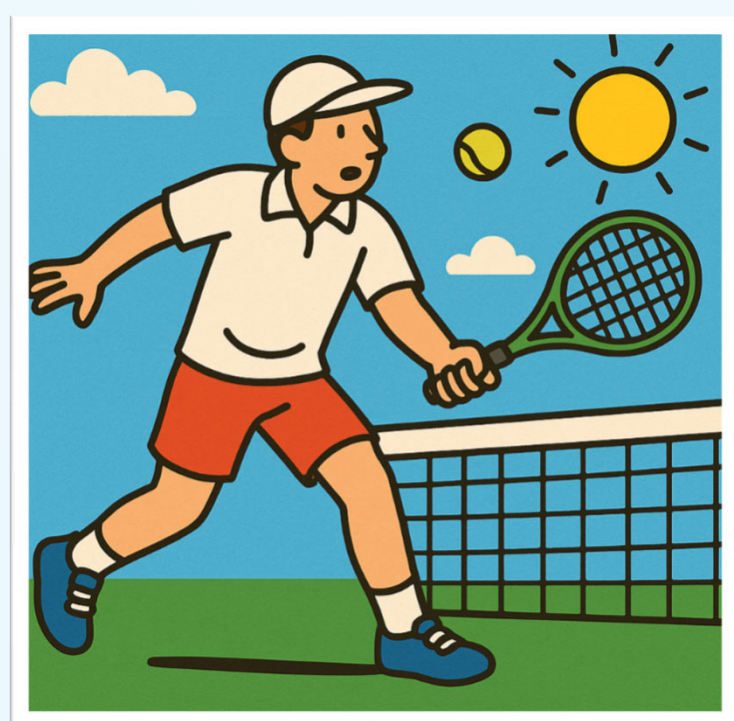

Place a DOT ● sticker inside each box that applies. Note: If you have two members in the same age group, you only need to add one sticker.

Preschool age (four years or under)
School age (five years to 12 years)
Teen (13 years to 19 years)
Young adult (20 years to 29 years)
Adult (30 years to 54 years)
Older adult (55 years or over)

Proposed amenities

Based on the guidelines and targets in the City’s **Active Together Master Plan**, Purpleville Park is planned to have junior and senior playgrounds, racquet sport courts, a wheeled sports zone (e.g. skateboarding), a mini soccer field and a gathering space with a shade structure.

Racquet sport courts

Junior and senior playgrounds

Wheeled sports zone

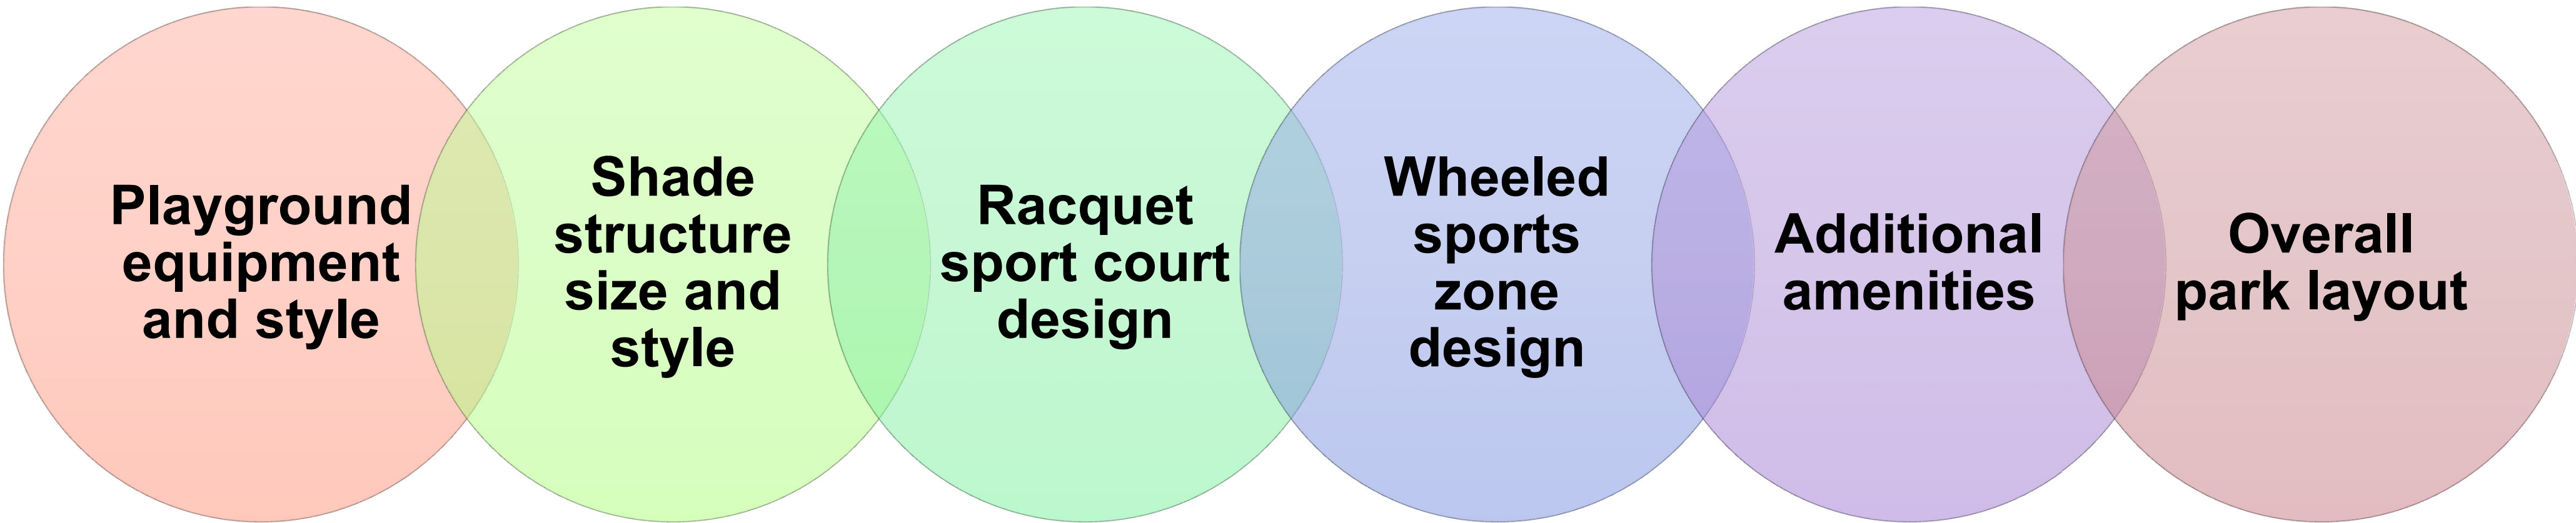

Mini soccer field (7 vs 7)

Shade structure

Through public engagement, the City would like to better understand your amenity and design preferences for:

Use of nearby parks

Q3: What existing parks do you visit and what do you travel there for?

Place a STICKY NOTE  below to share your feedback.

Playground equipment and style

Purpleville Park will include a playground designed for children of all ages, with both junior (ages two to five) and senior (ages five to 12) play equipment. Standard play experiences include sliding, climbing, balancing, swinging, spinning and group play. There is also an opportunity to include inclusive play experiences for children of all ages and abilities, such as educational play (equipment that encourages learning through puzzles, numbers, letters or problem-solving) and sensory play (equipment that stimulates a child's senses, like touch, sound or sight).

Q4: Which of the following play experiences would you like to have at the new playground?

Place a DOT ● below to let us know your top three preferences.

Sliding	Swinging	Climbing	Spinning	Balancing	Group play	Educational play	Sensory play

Playground equipment and style

The new playground can also be designed to look and feel a certain way, with some styles being better suited to specific play experiences. Three style options are being considered for Purpleville Park, which are described below:

Steel structure with connected slides, swings, play panels, climbers and more. This style of equipment offers the greatest value per dollar.

Steel frames with rope in different configurations. This style would offer slightly fewer pieces of equipment than traditional play.

Creative equipment built from natural materials like logs, rocks and plants to encourage exploration and connection with nature. This style would offer fewer pieces of equipment than traditional play and rope play.

Q5: Which playground style do you prefer for the new park?

Place a DOT ● below to let us know your preferred style.

Traditional play
Rope play
Natural play

Q6: Is there anything else you would like the City to consider when designing the junior and senior playgrounds?

Place a STICKY NOTE □ below to share your feedback.

Shade structure size and style

The new park will also have a gathering space with a shade structure and picnic table seating. The City is seeking the community’s input on whether one large structure or two smaller structures is preferred.

The single large shade structure would be approximately 50 square meters (538 square feet) in size and could accommodate larger groups or multiple smaller groups (eight to 12 people) at once.

The two smaller shade structures would be approximately 25 square meters (269 square feet) each and could accommodate smaller groups (four to six people), one at a time.

Q7: Would you prefer to have one large shade structure or two smaller shade structures?

Place a DOT ● below to let us know your preferred size.

Single large shade structure
(approx. eight to 12 people)

Two smaller shade structures
(approx. four to six people, each)

Shade structure size and style

The shade structure style could match that of the playground, or it could be different. Three style options (traditional, modern and natural) are described below:

A traditional shade structure will have the silhouette of a classic pavilion or gazebo.

A modern shade structure may feature a unique geometric roof design.

A natural shade structure is often made from timber and characterized by its ability to blend in with the natural landscape.

Q8: Which shade structure style do you prefer for the new park?

Place a DOT ● below to let us know your preferred style.

Traditional	Modern	Natural

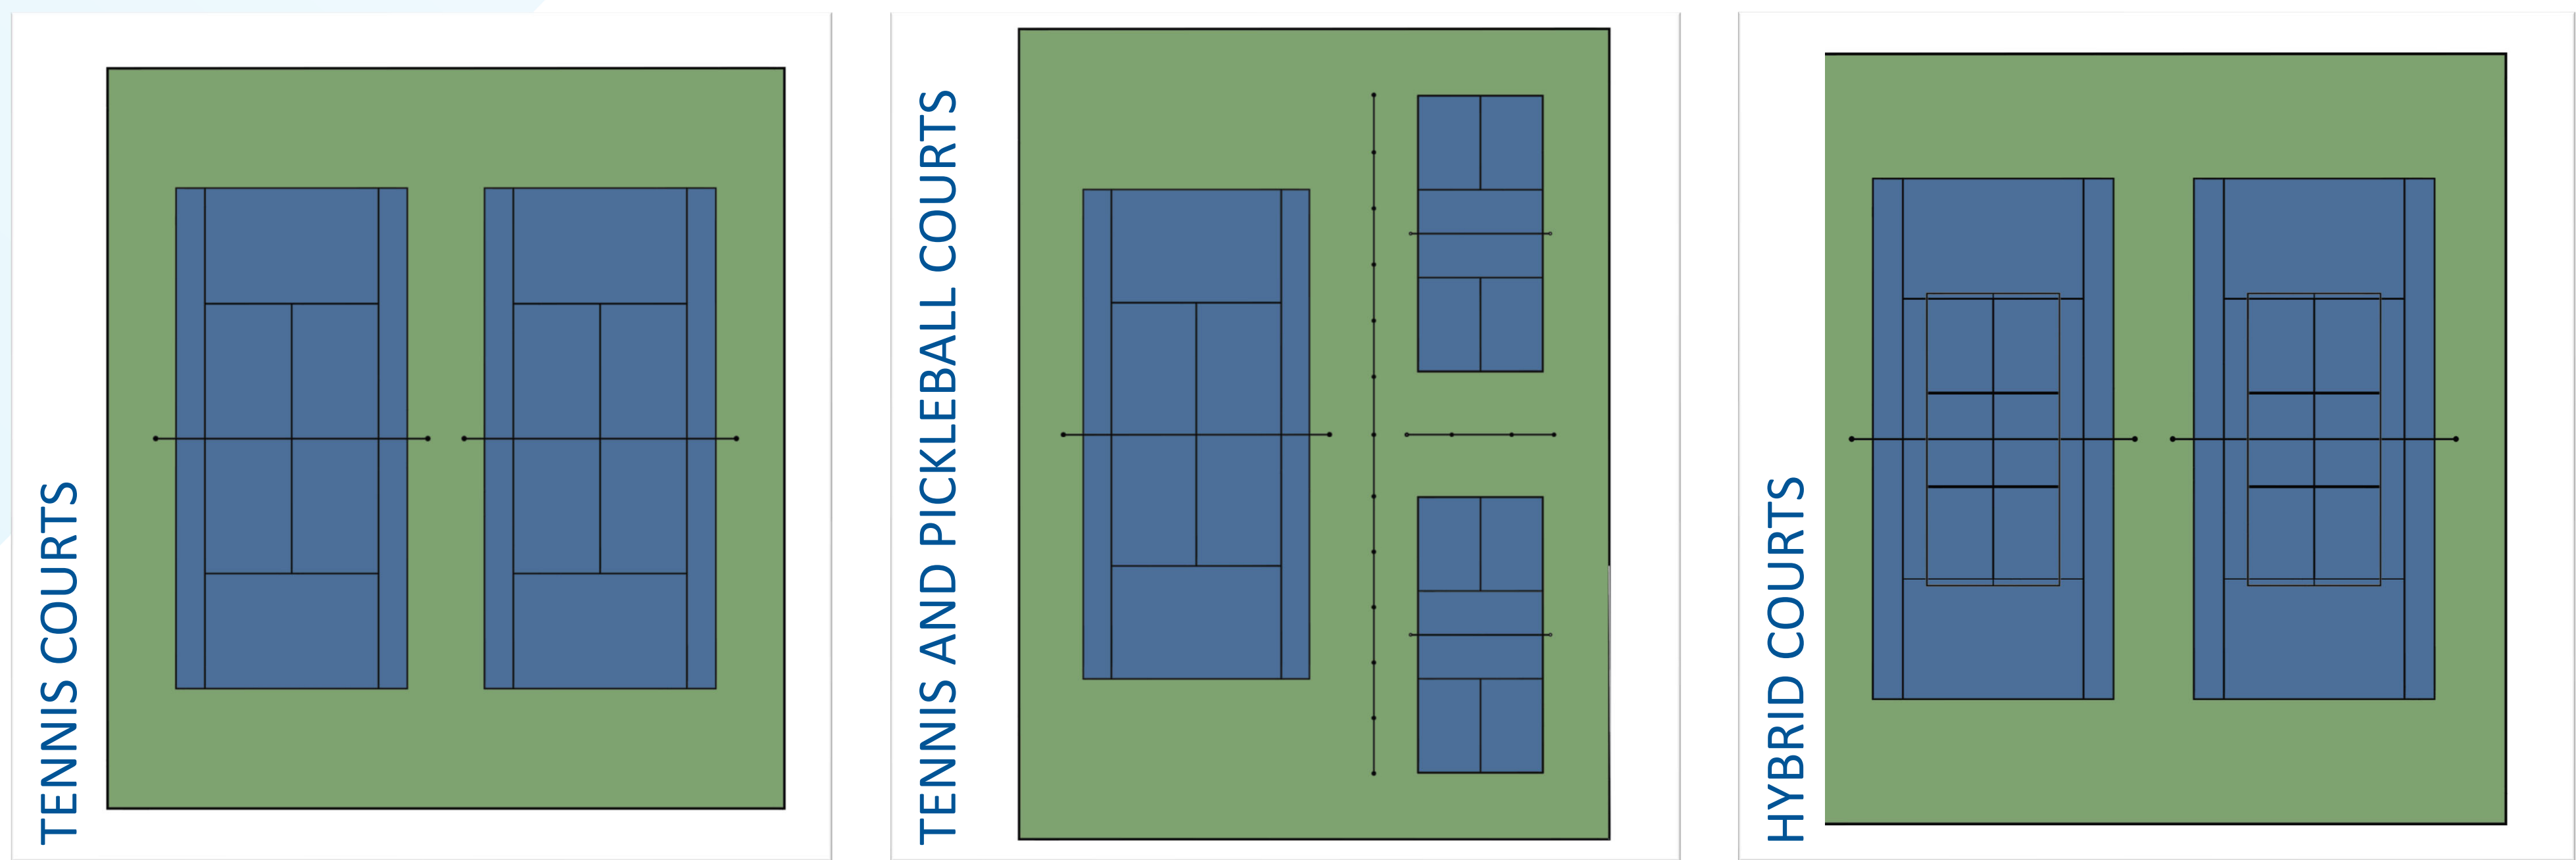

Q9: Is there anything else you would like us to consider when designing the gathering space?

Place a STICKY NOTE ■ below to share your feedback.

Racquet sport court design

The **Active Together Master Plan** and **Tennis and Pickleball Strategy** identified a need for racquet sports courts to serve the local community. Depending on the level of demand and the community’s preferences, the City could design the courts for tennis only or for both tennis and pickleball. An overview of the racquet sport court design options is provided below:

Double tennis: Two dedicated tennis courts.

Single tennis and double pickleball: One dedicated tennis court and two dedicated pickleball courts.

Hybrid courts: Two tennis courts, both with a pickleball line overlay.

Q10: What is your preferred layout for the racquet sport court?

Place a DOT ● below to let us know your preferred layout.

Double tennis (no pickleball)	Single tennis and double pickleball	Hybrid courts (double tennis with pickleball overlay)

Wheeled sports zone design

The **Active Together Master Plan** also identified a need for a wheeled sports zone (e.g. skateboarding, bike, scooter or inline skates) to serve the local community. This could be a traditional skate zone, otherwise known as a skate park, or it could be a pump track. An overview of both options is provided below:

A dedicated area for ramps, ledges and rails. Ramps enable users to gain height and perform tricks in the air, while ledges and rails facilitate grinding and sliding.

A looping circuit of smooth, raised rollers and berms made of asphalt that allow users to move through the course using a “pumping” motion of their arms and legs.

Q11: What is your preferred design for the wheeled sports zone?

Place a DOT ● below to let us know your preferred design.

Skate zone	Pump track
------------	------------

Q12: Is there anything else you would like the City to consider when designing the wheeled sports zone?

Place a STICKY NOTE below to share your feedback.

Additional amenities

If budget and space permits, the City may be able to include an additional amenity in the design for Purpleville Park. The following options are being considered; however, other suggestions are also welcome.

Q13: Which of the following additional amenity options would you prefer?

Rank the options below from 1 to 3, with 1 being your most desired option and 3 being your least desired option. Place a DOT ● accordingly:

Outdoor fitness circuit - a series of exercise stations with equipment for strength, cardio and flexibility training.

1	2	3
---	---	---

Half-sized basketball court - an asphalt court with one hoop for casual play.

1	2	3
---	---	---

Beach volleyball court - a sand court with a central net for competitive or casual play.

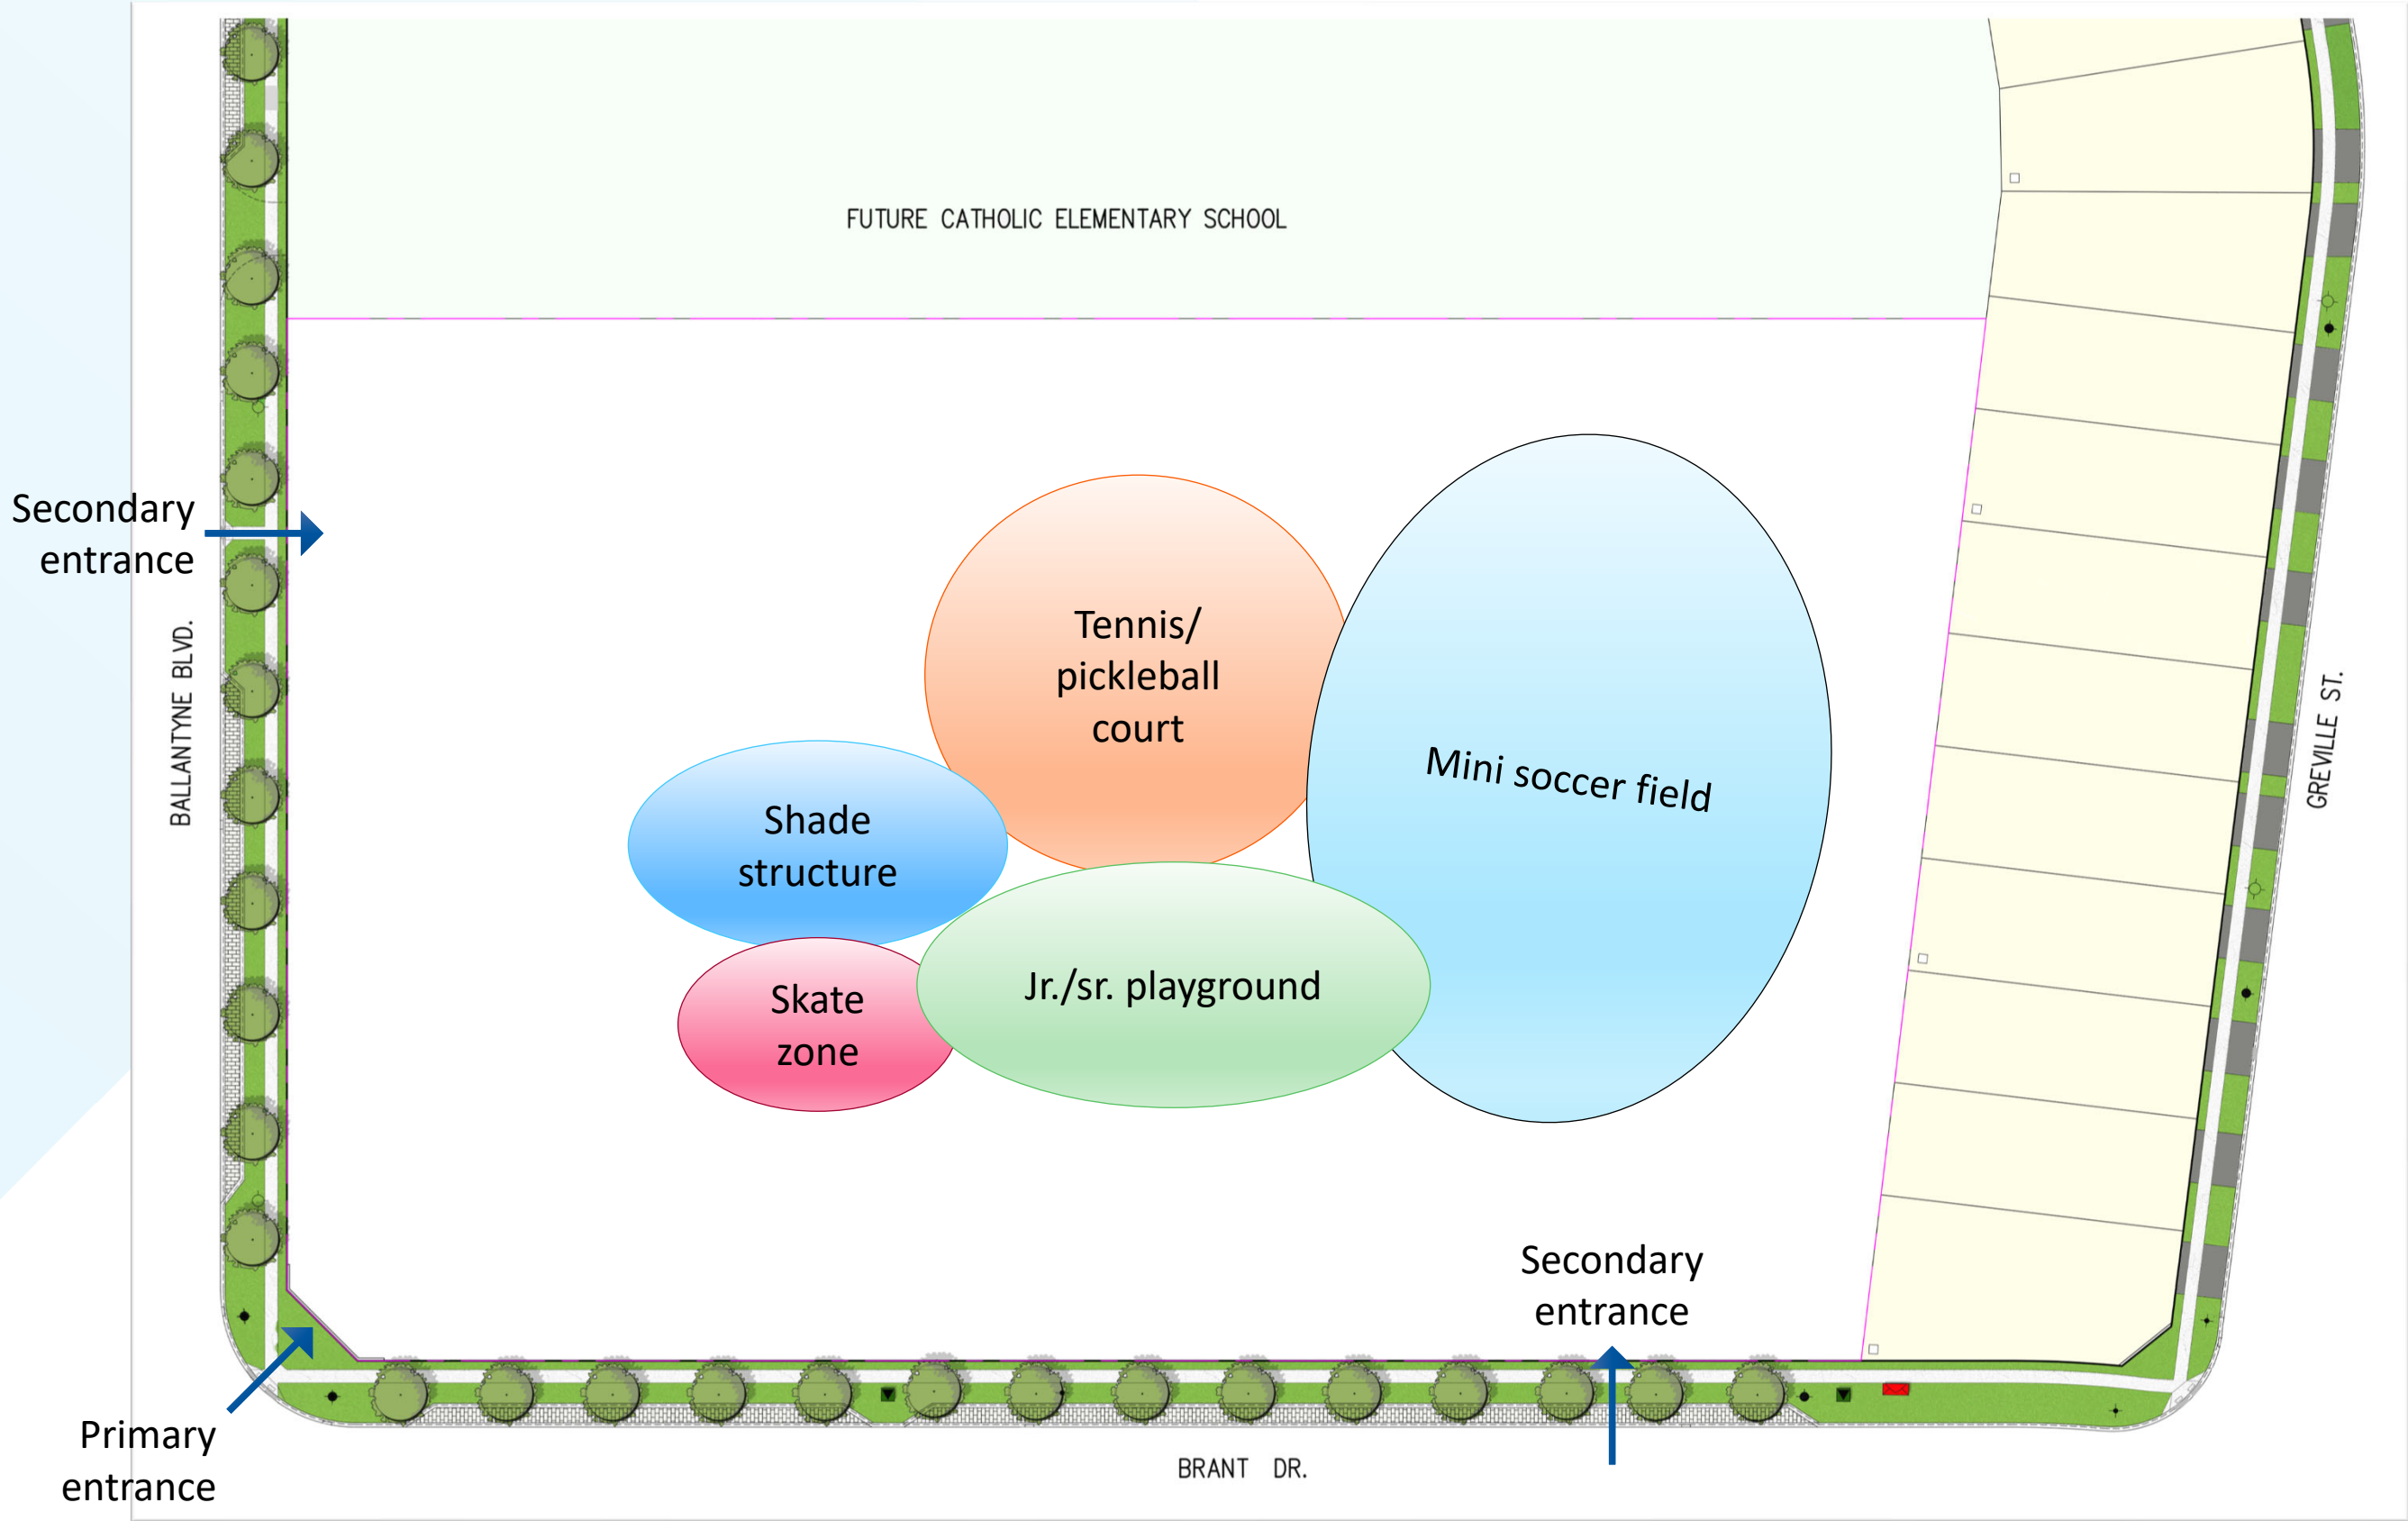

1	2	3
---	---	---

Q14: Are there any other amenities you would suggest for Purpleville Park?

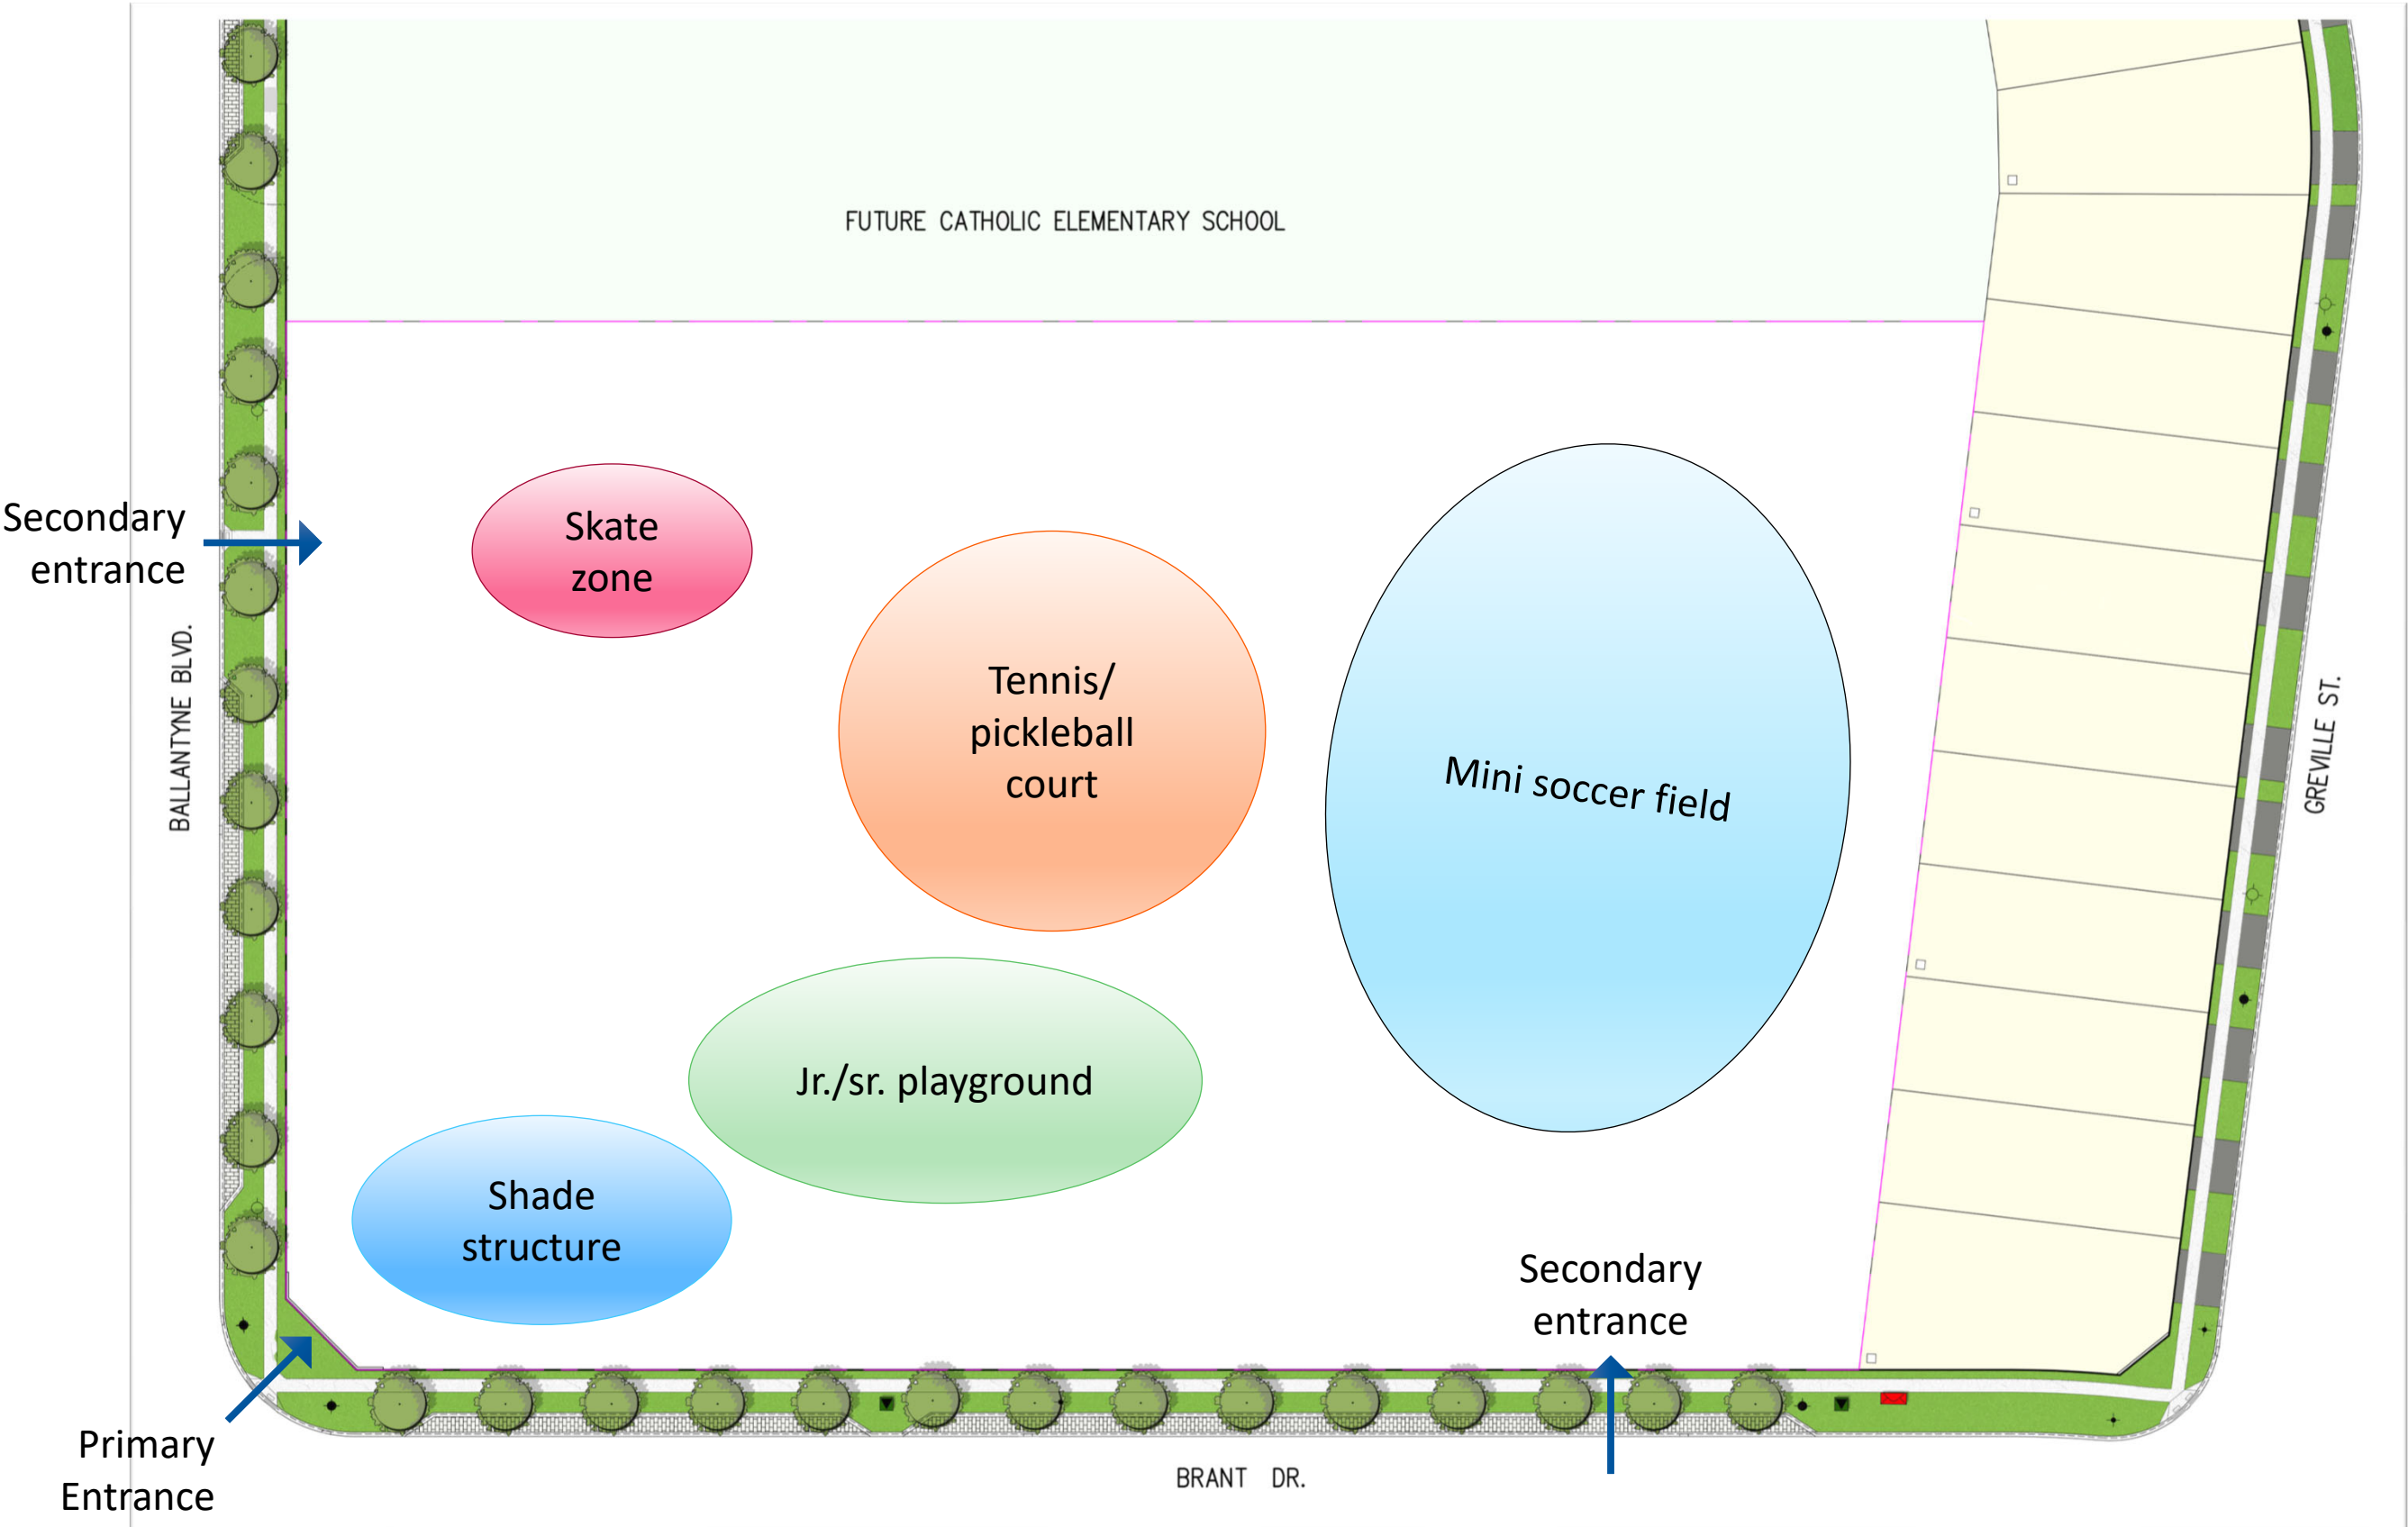

Place a STICKY NOTE below to share your feedback.

Overall park layout

There is an opportunity to cluster the various park features together or spread them apart. In both layout options, the mini soccer field would be located on the east side of the park, the racquet sports court would be centrally located and the shade structure would be located next to the playground to allow parents to supervise children. An overview of each layout option is provided below:

Clustered
The clustered layout creates a vibrant community hub at the park that promotes socialization. It's especially convenient for families, as it may enable parents to supervise multiple children at once, giving them a sense of safety and security. However, the proximity of different park features could also lead to increased noise, overcrowding and competition for space.

Distributed
The distributed layout encourages exploration and movement throughout the park and provides more opportunities for smaller, quieter gatherings. Natural or open areas can serve as buffers between different spaces, reducing crowding and noise. However, it may be less convenient for families or groups wanting to use multiple amenities at once.

Q15: Which layout option do you prefer?

Place a DOT ● below to let us know your preferred layout.

Clustered	Distributed	No preference

Overall park layout

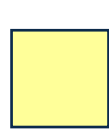

Q16: Please specify the layout you chose and elaborate on what you like about this option.

Place a STICKY NOTE  below to share your feedback.

Other considerations

Q17: Is there anything else you would like the City to consider for Purpleville Park?

Place a STICKY NOTE  below to share your feedback.

Thank you!

**Thank you for participating in the
Purpleville Park Public Open
House!**

Know someone who was unable to attend? Encourage them to participate in the online survey available until Wednesday, Dec. 10.

Updates will be posted to vaughan.ca/parks as the project progresses.

Marc Varone, Project Manager,
Facilities and Parks Delivery
