

CITY OF VAUGHAN

EXTRACT FROM COUNCIL MEETING MINUTES OF DECEMBER 10, 2013

Item 5, Report No. 52, of the Committee of the Whole, which was adopted without amendment by the Council of the City of Vaughan on December 10, 2013.

5

**ALL-WAY STOP CONTROL REVIEW
SPINNAKER WAY AND RITIN LANE/VILLARBOIT CRESCENT
WARD 4**

The Committee of the Whole recommends approval of the recommendation contained in the following report of the Commissioner of Engineering and Public Works and the Director of Engineering Services, dated November 26, 2013:

Recommendation

The Commissioner of Engineering and Public Works and the Director of Engineering Services recommends:

1. That Council enact a By-law to install an all-way stop control at the intersection of Spinnaker Way and Ritin Lane/Villarboit Crescent.

Contribution to Sustainability

Not Applicable.

Economic Impact

The capital costs associated with the installation of the all-way stop signs is estimated to be \$500.00, and has been included in the approved 2013 Operating Budget. The on-going costs to maintain the signs and pavement markings (stop bars), is estimated to be \$150.00 per annum, and will be incorporated in future year Operating Budgets.

Communications Plan

Staff will advise area businesses of the outcome of Council's decision in this matter.

Purpose

To review the feasibility of implementing an all-way stop control at the intersection of Spinnaker Way and Ritin Lane/Villarboit Crescent.

Background - Analysis and Options

Staff carried out a review of the traffic activity at the intersection of Spinnaker Way and Villarboit Crescent/Ritin Lane.

Spinnaker Way and Ritin Lane/Villarboit Crescent are both industrial minor collector roadways with a 23.0 metre right-of-way and an 11.5 metre pavement width. The intersection of Spinnaker Way and Villarboit Crescent/Ritin Lane is a four-leg intersection with the existing stop controls on Villarboit Crescent/Ritin Lane. The area is shown in Attachment No.1.

Staff conducted a turning movement count on October 22, 2013 at this intersection. The study was conducted during the peak traffic periods of 7:00 a.m. to 9:00 a.m. and 4:00 p.m. to 6:00 p.m. Staff also reviewed the accident records for 2012 and sight lines at the approaches to the intersection. The data collected was compared to the Provincial Warrant for All-way Stop Control with the following results:

CITY OF VAUGHAN

EXTRACT FROM COUNCIL MEETING MINUTES OF DECEMBER 10, 2013

Item 5, CW Report No. 52 – Page 2

| | | |
|--|-----------|------|
| •Warrant 1 – Minimum Vehicular Volumes | Warranted | 123% |
| •Warrant 2 – Accident Hazard | Warranted | 0% |
| •Warrant 3 – Sight Restriction | Warranted | 0% |

All-way stop controls are recommended when one of the above warrants are satisfied to 100% or more. As shown above, existing traffic volumes exceed Warrant #1 requirements. There were zero recorded vehicle collisions at this intersection in the year 2012. To date, this is the latest collision data available from York Regional Police. There are no sight restrictions at this intersection. As the information above indicates, this intersection meets the minimum requirements of the Provincial Warrant for All-way Stop Control.

The proposed all-way stop would also benefit both vehicular and pedestrian movements in the area.

Relationship to Vaughan Vision 2020/Strategic Plan

In consideration of the strategic priorities related to Vaughan Vision 2020, the recommended all-way stop will improve traffic flow for both drivers and pedestrians at the intersection, thus promoting community safety, health & wellness.

Regional Implications

Not Applicable.

Conclusion

It is recommended that an all-way stop control be installed at the intersection of Spinnaker Way and Ritin Lane/Villarboit Crescent as the minimum requirement of the Provincial Warrant for All-way Stop Control is met.
