

CITY OF VAUGHAN

EXTRACT FROM COUNCIL MEETING MINUTES OF SEPTEMBER 25, 2012

Item 10, Report No. 33, of the Committee of the Whole, which was adopted without amendment by the Council of the City of Vaughan on September 25, 2012.

10

**ALL-WAY STOP CONTROL REVIEW
CONFEDERATION PARKWAY AND FLORAL PARKWAY
WARD 4**

The Committee of the Whole recommends approval of the recommendation contained in the following report of the Commissioner of Engineering and Public Works, dated September 4, 2012:

Recommendation

The Commissioner of Engineering and Public Works recommends that:

Council enact a By-law to install an all-way stop control at the intersection of Confederation Parkway and Floral Parkway.

Contribution to Sustainability

Not Applicable.

Economic Impact

The capital costs associated with the installation of the all-way stop signs is estimated to be \$500.00, and has been included in the approved 2012 Operating Budget. The on-going costs to maintain the signs and pavement markings (stop bars), is estimated to be \$150.00 per annum, and will be incorporated in future year Operating Budgets.

Communications Plan

Engineering Services staff will advise area residents and the owner of #55 Confederation Parkway, of the outcome of Council's decision in this matter.

Purpose

To review the feasibility of implementing an all-way stop control at the intersection of Confederation Parkway and Floral Parkway, in response to a request received from an area resident.

Background - Analysis and Options

Staff carried out a review of the traffic activity at the intersection of Confederation Parkway and Floral Parkway.

Confederation Parkway is a minor collector roadway with a 23.0 metre right-of-way and an 11.5 metre pavement width. Floral Parkway is a local roadway with a 17.5 metre right-of-way and an 8.0 metre pavement width. The intersection of Confederation Parkway and Floral Parkway is a four-leg intersection with the existing stop controls on Floral Parkway. It is noted that access to #55 Confederation Parkway is located on the south leg of this intersection. Presently, this access is not stop controlled. The area is shown in Attachment No.1.

CITY OF VAUGHAN

EXTRACT FROM COUNCIL MEETING MINUTES OF SEPTEMBER 25, 2012

Item 10, CW Report No. 33 – Page 2

Staff conducted a turning movement count on May 1, 2012 at this intersection. The study was conducted during the peak traffic periods of 7:00 a.m. to 9:00 a.m. and 4:00 p.m. to 6:00 p.m. Staff also reviewed accident records for 2011 and sight lines at the approaches to the intersection. The data collected was compared to the Provincial Warrant for All-way Stop Control with the following results:

• Warrant 1 – Minimum Vehicular Volumes	Warranted	269%
• Warrant 2 – Accident Hazard	Warranted	0%
• Warrant 3 – Sight Restriction	Warranted	0%

All-way stop controls are recommended when one of the above warrants are satisfied to 100% or more. As shown above, existing traffic volumes exceed Warrant #1 requirements. There have been no recorded vehicle collisions at this intersection in 2011. To date, this is the latest collision data available from York Regional Police. There are no sight restrictions at this intersection. As the information above indicates, this intersection meets the minimum requirements of the Provincial Warrant for All-way Stop Control.

Staff have contacted the resident who supports the proposed all-way stop control. The proposed all-way stop would also benefit both vehicular and pedestrian movements in the area.

Relationship to Vaughan Vision 2020/Strategic Plan

In consideration of the strategic priorities related to Vaughan Vision 2020, the recommended all-way stop will improve traffic flow for both drivers and pedestrians at the intersection, thus enhancing community design.

Regional Implications

Not Applicable.

Conclusion

It is recommended that an all-way stop control be installed at the intersection of Confederation Parkway and Floral Parkway/ ArcelorMittal Company Access, as the minimum requirement of the Provincial Warrant for All-Way Stop Control is met.
