

OTHER TYPE OF FENCES

Fences made of other types of materials not outlined in the by-law may be permitted. Applicants must provide detailed drawings of the proposed fence outlining:

1. The height of all fences and gates (keeping in mind that nothing below 1.2m in height will be approved); and
2. The types of material(s) to be used and measurements of each piece; and
3. any measurements in regard to spacing between fence and gates components.

Additional information may be required.

Consideration of fences proposed to be constructed of other types of materials will be based on the following criteria;

1. That any fence/gates meet all applicable design standards as set forth by the province or any other regulating body; and
2. That the fence and gates meet all the requirements of the City of Vaughan Fence By-law (and any other City of Vaughan by-law), as amended, or its successor by-law.

**For any questions on requirements, please contact Supervisor of Property Standards,
By-Law & Compliance, Licensing & Permit Services**
