

CITY OF VAUGHAN

EXTRACT FROM COUNCIL MEETING MINUTES OF JUNE 24, 2014

Item 7, Report No. 7, of the Finance, Administration and Audit Committee, which was adopted without amendment by the Council of the City of Vaughan on June 24, 2014.

7

ENDING MARCH 31, 2014 – CONSOLIDATED QUARTERLY REPORT

The Finance, Administration and Audit Committee recommends:

- 1) That the recommendation contained in the following report of the Commissioner of Finance & City Treasurer and the Director of Financial Services, dated May 26, 2014, be approved; and
- 2) That the presentation by the Manager of Capital & Reserve Planning and the Acting Manager of Operating Budget, and C4, presentation material entitled "*Ending March 31, 2014 – Consolidated Quarterly Report*" dated May 26, 2014, be received.

Recommendation

The Commissioner of Finance & City Treasurer and the Director of Financial Services recommend:

1. That the 2014 Consolidated First Quarter Variance Report be received; and
2. That the funding source for capital project PO-6744-13 be amended to Capital from Taxation as illustrated in the Funding Source Amendment section of this report.

Economic Impact

The quarterly variance report monitors actual spending performance to the City's calendarized financial plan. There is no economic impact as budgets and projects have been previously approved by Council. Amending the funding source to Capital from Taxation for project PO-6744-13 Meeting House Cemetery – Memorial Wall will not have an economic impact as this can be accommodated within the funds returned as a result of closed capital projects in the first quarter .

Communication Plan

Not applicable

Purpose

To report on 2014 first quarter financial results, as of March 31st, 2014, including an update on grant activity. New to the process is the provision of high profile capital project summaries included as attachment 4.

Background – Analysis and Options

The attached first quarter variance report compares actual operating and capital results for the period ending March 31st, 2014, relative to approved budgets. It is important to note, the combined unfavourable variance is not directly indicative of the City's final year-end position; it simply compares the City's actual financial position to the approved budget at a point in time. At this stage in the process it is too early to determine the final City's position, as a number of events such as a shifting of trends, timing differences, or unforeseen activities in the latter part of the year could easily improve or erode the current position. For example, the receipt of funding through the Provincial Ice Storm Assistance Program could have a material impact on the 2014 results.

CITY OF VAUGHAN

EXTRACT FROM COUNCIL MEETING MINUTES OF JUNE 24, 2014

Item 7, Finance Report No. 7 – Page 2

The actual balances presented include all necessary entries and accruals. However, it should be noted, the full amortization of tangible capital assets and post retirement employee benefits are excluded and presented differently from the City's financial statements.

The quarterly results for City Operations, Water and Wastewater Operations, and Capital are presented together in one consolidated report. This action is intended to provide stakeholders with a more fulsome and complete view of the City's financial results. The item will provide a brief executive summary followed by summaries for City Operations, Water and Wastewater Operations, and Capital. Additional detail will be provided as attachments.

First Quarter Overview

Overall, the City's net financial performance is unfavourable.

The City has come in \$3.6M unfavourable to budget in City of Vaughan Operations. Typically, the first quarter of operations shows a favourable variance to budget as the level of spending is usually restrained until Budget approval, which occurred on Feb. 18th, 2014. However, the impact of the long and cold winter and continuing efforts related to the December 2013 ice storm resulted in additional financial pressure and significantly contributed \$8.2M to the overall unfavourable position. The current budget shortfall is larger than the Winterization Reserve balance (\$4.4M) and it may not be possible to fully mitigate the impact of the past winter and ice storm. Staff are hopeful that Ontario Disaster Relief funding and positive performance for the remainder of the year will minimize these impacts. More detailed report on Winter Control and the Ice Storm will be presented separately. Further details regarding the quarterly results are provided later in the report and in Attachment #2.

The City's combined Water and Wastewater operations resulted in a combined \$2.0M favourable variance due to stronger sales revenues from higher than expected growth and consumption in the first quarter. Other favourable contributing factors are lower expenses for maintenance repairs, contractor labour and materials due to lower demand. Additional cost savings were derived from general administration discretionary expenses and salaries due to timing.

The overall capital position was on target. The majority of closed projects were completed on or below budget. As stated above, the first quarter winter activities are expected to negatively impact the Winterization Reserve, with the current reserve balance of \$4.4 M being insufficient to mitigate the \$8.2 M unfavourable position.

Table 1 below summarizes and illustrates the City's financial results, which is followed by a brief summary for each area.

Item 7, Finance Report No. 7 – Page 4

City Operating Budget Results

The annual Operating Budget for the City is \$254.0M, of which \$95.5M in revenues and \$74.6M in expenditures were budgeted for the first quarter of the year. At the end of the first quarter, the City experienced a \$3.6M net unfavourable variance. This unfavourable variance is comprised of a \$1.9M unfavourable expenditure variance and a \$1.7 M unfavourable revenue variance. The main areas that contributed to the negative \$3.6M variance are summarized below;

City Revenue Variance Overview

Actual revenues were \$93.8M as of March 31, 2014, and represent a \$1.7M unfavourable variance when compared to the year-to-date revenue budget of \$95.5M. This variance stems from the following:

- **Reserves & Other Transfers** - There were several factors that contributed to the \$1.7M variance below plan. These are:
 - \$1.5M of planned withdrawals that were not required for Engineering Services, Building Standards Service Continuity Reserve and DC Growth projects as a result of lower than expected department expenditures and higher revenue within Building Standards department.
 - \$280K in Administration Recovery from Capital as a result of a reversal of a 2013 year end accrual.
- **Corporate Revenue** – An unfavourable variance of \$0.4M is made up of smaller unfavourable variances in a number of Corporate Revenue accounts. Details on these variances are provided in Attachment #2.
- **User Fees/Services Charges** – Are relatively on target with a minor favourable variance of \$0.4M mostly within Building Standards, Cultural Services, and Licensing offset with unfavourable variances in Development Planning, By-law & Compliance and Development Transportation Engineering revenues. All these variances are explained in more detail in Attachment #2.

City Expenditure Variance Overview

Actual total expenditures were \$76.5M as of March 31, 2014, and represent a \$1.9M unfavourable variance to the year-to-date expenditure budget of \$74.6M. This variance stems from the following:

- **Corporate Expenses** – The largest component driving the City's unfavourable expenditure variance was in Reserve Contribution and Corporate Expenses which had an unfavourable variance of \$2.6M. The major components of this variance included:
 - **Ice Storm 2013** – There were unfavourable expenditures of \$2.1M related to the December 2013 Ice Storm clean-up. These amounts are all unbudgeted costs and are being tracked in a separate business unit as part of the provincial government requirements for partial reimbursement. The province has set a process for submissions and a decision on reimbursement amounts is expected later this summer.
 - **Anticipated Labour Savings** – Unfavourable variance of \$1.5M for budgeted labour savings due to vacant positions in departments. This is budgeted corporately with the actual savings being realized in the departments and the offset would be seen in the overall departmental expenditure amounts. The actual labour favorable variance in the departmental expenditures was \$2.1M or \$0.6M greater than plan. It is normal that the Q1 labour variance is high as most of the approved positions in the budget have not yet been hired.

CITY OF VAUGHAN

EXTRACT FROM COUNCIL MEETING MINUTES OF JUNE 24, 2014

Item 7, Finance Report No. 7 – Page 5

- **OMB and VMC projects** – These two projects have not yet been fully staffed resulting in a combined favourable variance to budget of \$0.9M. Recruitment is currently underway to fill these roles. Residual balances at year-end will be carried forward into future years.
- **Department Expenses** – The next largest component driving the City's unfavourable expenditure variance relates to total department expenses, which were over budget by \$1.7M. This position was generated by a \$5.5M combined unfavourable variance found in Public Works Winter and in Parks and Forestry Operations resulting from unusually harsh and persistent winter conditions, excluding the impacts of the Ice Storm. This variance was largely offset by favourable positions in most other departments related to:
 - A \$2.1M labour variance attributable to general turnover vacancies, new compliment vacancies in the recruitment process, and year-end payroll accrual reversals due to past year payment timing. A level of labour variance is anticipated and planned for corporately, though actual City performance was even greater than the \$1.5M Q1 planned corporate balance.
 - There were favourable variances in a variety of accounts totalling \$876K in General Maintenance, YRT Ticket Purchases, Radio Operations, Protective Clothing, Computer Hardware and Software, Professional Fees and Communications

Variance Summary:

For quick reference purposes, a summary of the variances by major category is provided below. A more detailed financial summary is provided as Attachment #1. Further explanations on specific variances are provided as Attachment #2.

Item 7, Finance Report No. 7 – Page 7

Water and Wastewater/Storm Operating Budget Results

Following are the financial operating results and analysis for both the water and wastewater/storm operations from January 2014 to March 2014. The variance analysis is a comparison of the year to date budget to the year to date actual results.

The water/wastewater system in York Region operates as a two-tier system. The Region of York is responsible for the supply of water and wastewater services and the lower tier municipalities are responsible for the water and wastewater distribution systems within the local municipality. The net revenues that are generated annually by the City of Vaughan from the operations of the water and wastewater/storm utilities fund costs associated with the purchase of water supply and wastewater services from the Region of York, as well as the City's administration, financing costs, system operational and maintenance costs and most importantly funding to build the reserves for future infrastructure renewal.

Water Operations

Year to date (YTD) actual water revenues for the period ending March 31, 2014 are favourable by \$620K which is comprised of residential \$601K, commercial revenue of \$76K offset by slightly unfavourable miscellaneous water revenue \$57K.

The favourable residential billings are due to higher than budgeted average consumption levels per household and new account activations. Actual consumption is trending at 10 cubic meters per household more than budget and 50 new accounts came in higher than budgeted or 28%.

Commercial average consumption activity is trending higher than budget at 5% whereas new account activity remains unchanged for this first quarter.

Water purchases are unfavourable by \$113K partly due to higher demand (\$43K) and slightly unfavourable non-revenue water (NRW) consumption of \$71K.

The Gross Margin indicates the net funding available to the City after the Region of York has been paid for the water supply and is favourable by \$507K due to higher sales revenue.

Other revenues consist primarily of installation and service fees and are slightly unfavourable by \$33K, actual activity is based on demand offset by favourable sundry and interest revenue at \$15K.

Water expenses are favourable by \$349K which is the result of favourable maintenance and installations expenditures of \$188K and favourable general administration of \$159K. The favourable variances are largely due to fewer customer service requests due to contractor labour and materials, lower than expected for repair activity. General administration expenses are favourable due to the timing of discretionary spending such as professional fees.

As a result of the above, the quarterly water lifecycle contribution of \$1.7M is favourable by \$837K.

	\$9,992,240	\$2,438,695	\$2,089,955	\$348,740
Net Water Operations	\$5,748,530	\$854,745	\$1,691,879	\$837,134
Budgeted Lifecycle Contribution	\$5,748,530	\$854,745	\$854,745	\$0
Additional Reserve Contribution	\$0	\$0	\$837,134	\$837,134
Surplus	\$0	\$0	\$0	\$0

Wastewater/Storm Operations

Wastewater billing is based on water consumption, therefore trending is very similar to water revenues. Wastewater YTD billings are favourable by \$787K for the period ending March 31, 2014 which is comprised of residential billings \$652K and commercial revenue of \$135K. Wastewater revenue is billed based on water consumption.

The unfavourable treatment variance of \$116K is a combination of unfavourable treatment charges due to higher sales and unfavourable non-revenue treatment charges. This relates directly to the non-revenue water variance.

The favourable gross margin of \$671K is the result of favourable sales less unfavourable treatment charges.

Other revenues consist of installation and service fees which are slightly unfavourable by \$37K. Actual activity is based on demand. Interest revenue is unfavourable by \$10K.

Expenses are favourable by \$540K primarily due to favourable maintenance and installation at \$220K, and storm operations favourable by \$165K attributed by lower than expected contractor labour and materials related to repairs, inspections, flushing and pond management. General administration is favourable by \$155K due to timing of discretionary spending, salaries and debenture payments. All other expenses are on budget.

CITY OF VAUGHAN

EXTRACT FROM COUNCIL MEETING MINUTES OF JUNE 24, 2014

Item 7, Finance Report No. 7 – Page 9

As a result of the above, the quarterly wastewater/storm lifecycle contribution of \$2.0M is favourable by \$1.2M.

Capital Budget Results

Overall, the Capital Budget performance is favourable, with the majority of projects coming in under assigned budget. This section is intended to provide an update on quarterly activity for the following:

- Funding Source Amendment: PO-6744-13
- Open Capital Project Spend Performance
- High Profile Capital Projects (NEW)
- Closed Capital Projects Budget vs. Actual
- Reserve and Reserve Fund positions
- Grant Activity

Funding Source Amendment

Capital Project PO-6744-13 Meeting House Cemetery – Memorial Wall was approved for \$26,800 as part of the 2013 Capital Budget process for the renovation and repair of the memorial wall at Meeting House Cemetery. During the budget process staff had received information from the

CITY OF VAUGHAN

EXTRACT FROM COUNCIL MEETING MINUTES OF JUNE 24, 2014

Item 7, Finance Report No. 7 – Page 10

Ministry of Consumer Services that the project qualified as a project that could be funded from the Cemetery Trust as it relates to the care and maintenance of the cemetery. When completing the Year End Trust Return staff were informed that only the portion of funds equivalent to the interest earned on the Trust could be used for care and maintenance.

During 2013, capital expenditures of \$25,441 were incurred related to capital project PO-6744-13. The annual interest of \$5,538 earned on Trust Bank Account during 2013 was transferred to fund the capital project, leaving \$19,903 as the unfinanced amount. Hence, it is requested that Capital from Taxation be used to fund the remaining balance of \$19,903; the available funds are as a result of closed capital projects with the same funding source.

Open Capital Project Spend Report (Attachment #3)

Staff reviewed the Open Capital Project Spend Report and general highlights are provided below.

- As of Quarter 1-2014, 637 projects with a budgeted value of \$609M are open.

EXTRACT FROM COUNCIL MEETING MINUTES OF JUNE 24, 2014

Item 7, Finance Report No. 7 – Page 11

- 4 projects are anticipated to close in the upcoming quarter.
- 6 projects are waiting for invoices from external parties. The closure of these projects is anticipated for when the final invoices are received and processed.
- 6 invoices are waiting for invoices from the region. The closure of these projects is anticipated for when the final invoices are received and processed.

A complete list of capital projects that are substantially complete and nearing completion is provided as Attachment 5.

- Unfavourable variances from budget include:
 - Relocate Fire Station 7-3 Land Acquisition (FR-3514-12) currently indicates a budget overage of \$108,164. Costs associated with taxes and external services required for the purchase of the lands were not accounted for in the original budget. Staff have recently presented a report to Council to address this shortfall and a budget amendment is anticipated for Q2-14.
 - Public Works – Roads Vehicle (FL-5296-13) has been closed with an overage of \$574 (2% of total budget of \$31,600). This overage is due to the outfitting required to make the vehicle functional for the Road division. Prior to the Capital Project and Financial Administration and Reporting Policy the practice was to allow overages up to the lower of 10% or \$10,000. This balance can be accommodated from closed project residual funds returned to the Vehicle Reserve.
 - Rimwood Park – Tennis Court Replacement (PK-6341-12) has been closed with an overage of \$2,830 (4% of total budget of \$67,000). This overage is due to the addition of sub drains and additional base preparation work before the asphalt surfacing could be installed. Prior to the Capital Project and Financial Administration and Reporting Policy the practice was to allow overages up to the lower of 10% or \$10,000. This balance can be accommodated from closed project residual funds returned to the Parks Infrastructure Reserve.
 - Requests in accordance with Section 8A of Policy 05.4.02 Capital Project Financial Administration and Reporting:
 - The following projects were reported on in 2013 Fourth Quarter Variance Report. The closure of these projects is anticipated for Q2-14,:
 - DT-7011-07 OPA 620 East West Collector EA
 - PK-6545-13 Accessible Swings – 4 parks
 - FL-5208-12 Roads-New Vehicle

Individual Capital Project Detail - In addition to the above, budget to actual financial status and comments for currently approved and open capital projects are provided in Attachment 3. It is important to note this information is compiled at a point in time and the reader is cautioned on the following:

- A completed capital project will remain active or open until all invoices are paid and funding is complete. Projects are not closed until approved by the department. As a result, projects that are substantially funded will reside on the Open Capital Project Spend Report. It is important to note this report represents projects from current and prior budget years and total balances are the combined value.
- Projects that are debenture financed, as approved by Council, are not closed until debenture financing is acquired through the Region of York. Furthermore, project financing is not typically requested until the project is substantially complete, which is

CITY OF VAUGHAN

EXTRACT FROM COUNCIL MEETING MINUTES OF JUNE 24, 2014

Item 7, Finance Report No. 7 – Page 12

contingent on a timeframe to determine outstanding invoices and settlement issues. In the case of Engineering Projects, this may take up to several years.

- Capital work is continuously underway and current information will vary from this report.

High Profile Capital Projects

In December of 2013 Council approved the *Capital Project Financial Administration and Reporting Policy*. This policy is intended to provide a consistent and consolidated approach to capital project financial administration and reporting.

Section 10.2 High Profile Capital Project Reporting states that as part of the quarterly report, each identified high profile capital project will require an additional status report with comprehensive details submitted by the appropriate department.

High Profile Projects are selected based on one of the following criteria:

- A total capital project budget value equal to or greater than \$5 million
- A contingency level of 20% or more
- Identified as a high visibility or sensitive project by SMT or Council

The Senior Management Team (SMT) was provided with a list of projects that met the first two criteria. After a careful review of the projects, those projects that only met the criteria of having a contingency equal to or greater than 20% were not included as the project budgets ranged between \$13,000 and \$500,000 adding very limited value and does not reflect the spirit of the policy.

As a result of SMT's review the following projects were selected for reporting and status reports are provided as Attachment #4:

Project Title	Total	>\$5M	=>20%
Lead Department: Building & Facilities			
Civic Centre Resource Library - Construction	12,857,400	X	
Civic Centre - Demolition, Parking and Storm Drainage	23,040,100	X	
North Thornhill Branch Library (Block 10)	4,220,550		
Station 7-3 Relocation	9,537,975	X	
Lead Department: City Manager			
Vaughan Hospital Precinct Development	80,000,000	X	
Lead Department: Development Transportation Engineering			
Black Creek Renewal	47,289,313	X	X
Vaughan Metropolitan Centre NE Storm Water Management Pond	6,912,666	X	X
Millway Avenue Widening & Realignment	6,769,800	X	
Lead Department: Engineering			
Corporate Asset Management	2,635,720		
Lead Department: Parks Development			
Maple Valley Plan	21,807,323	X	

Budgeting & Financial Planning Staff worked with the identified Lead Departments to complete the reports for Q1-14 reporting. The Lead Department for a project may change dependant on the stage of the project. As with any new process, changes are expected as experience is gained and the process evolves.

Capital projects closed during the 1st Quarter

Staff together with City departments reviewed all active capital projects listed as of March 31st, 2014 to determine which capital projects could be consolidated and/or closed. Overall, 53 capital

CITY OF VAUGHAN

EXTRACT FROM COUNCIL MEETING MINUTES OF JUNE 24, 2014

Item 7, Finance Report No. 7 – Page 13

projects totalling a budget of \$31.8M were closed in the 1st quarter of 2014. Total actual project costs came in at 96% of budget, freeing up \$1.4M in the original funding sources for future project consideration. The drivers behind the \$1.4M are as follows:

Department	Budget	Actual	Variance	% Spend	# Closed
Buildings & Facilities	3,422,748	3,119,880	302,868	91%	14
Development Planning	185,400	174,543	10,857	94%	1
Engineering Services	51,500	-	51,500	0%	1
Fire & Rescue Services	4,741,545	4,571,134	170,411	96%	5
Fleet Management	1,056,400	902,476	153,924	85%	20
Parks Development	2,929,650	2,918,323	11,328	100%	5
Public Works	710,000	265,941	444,059	37%	5
Real Estate	18,735,512	18,517,881	217,632	99%	2
Q1 Closed Projects	31,832,755	30,470,178	1,362,579	96%	53

- Engineering Services – The culvert removal on Peelar Road will be completed in conjunction with the future Black Creek remedial works; as such, the capital project for this work was closed.
- Fleet Management – Awards for equipment purchased were lower than the project budgets. Staff will review how these items are budgeted by researching market pricing of equipment prior to completing the upcoming 2015 budget process.
- Public Works – The lowest bidders to complete the Storm Pond Sediment removal were all significantly below the approved budget.

A complete list of closed capital projects is provided as Attachment 6.

Continuity Schedule of Reserves and Reserve Funds

A continuity schedule of reserves and reserve funds as at March 31, 2014 is provided as Attachment 7. This schedule provides information on the individual and aggregate reserve balances. It also provides information on outstanding financial commitments and payment estimates required in future periods to fund approved projects. Forecasting commitments is intended to provide a proactive view of the reserve position and should not be interpreted as the year-end position due to the fact that commitments are not incorporated into financial statements until the actual expenses have incurred.

Reserve positions before commitments are all in a positive position, with the exception of development charge management studies and fire and Uplands reserve. Adding commitments to the schedule reveals that 9 reserves are in a future negative position. Below is a brief description for positioning of these 9 reserves:

Sale of Public Lands – Future obligations are currently greater than the balance on hand. Dedicated surplus land is authorized for sale to cover this obligation but is pending.

Uplands Capital Improvement – A commitment to replace the uplands chairlift was approved in 2011 by Council. As a result, the future position of this reserve will be negative and is planned to be replenished over time through Uplands revenue received.

Tax Rate Stabilization Reserve - Surplus revenues are not accounted for in this reserve. The current planned commitments are illustrating that this reserve will be in a negative position at yearend. This reserve will never be in a negative position as the draws from the reserve will reflect the funds on hand.

CITY OF VAUGHAN

EXTRACT FROM COUNCIL MEETING MINUTES OF JUNE 24, 2014

Item 7, Finance Report No. 7 – Page 14

CWDC Fire – A Council commitment to move forward with fire station 7-10 will temporarily place this reserve into a negative position, which will be replenished through future growth based development charges. This position may impact the timing of future projects.

CWDC Management Studies – Due to timing of events, this reserve is permitted to be in a deficit position. Growth related studies are incurred in advance of growth and recovered through subsequent development charges.

Special Charges and Area Development Charges (Developer Build Reserves) – These reserves relate to projects generally built by developers. Essentially, the developer has agreed to develop a structure, which will be funded by the City once funds are collected and available. Although, the continuity schedule illustrates a negative position after commitments, these reserves will never be in a deficit cash position as payments will only occur when funds are on hand. Reserves with a negative balance after commitments in this category are as follows:

- D15 PD#5 Woodbridge Water
- D18 PD#6 Maj., Mac Water
- D19 PD#6 E. Rutherford Water
- D25 Zenway/Fogal Sub-Trunk

Grants Update

The following report provides an overview of the grant portfolio's 2014 First Quarter results with respect to:

- Annual Government Grant Programs
- Community Infrastructure Investment Fund (CIIF) update
- New Opportunities

Annual Grants Program Submissions Status regarding: Awarded, Pending Award Notification or Declined)

Grant activity in the first quarter was related to twenty-four (24) programs equating to approximately \$7.5 Million dollars. Specific award status and details are as follows:

- 11 submissions have received funding (\$591,821)
- 11 submissions are pending notification of award (\$4.8M)
- 2 submissions requests were declined

The table below summarizes this activity:

2014 GRANT PROGRAM ACTIVITY			
Q1 SUBMISSIONS AWARDED/FUND RECEIVED			
PROGRAM	TOTAL PROJ. COST	AWARD	USE OF FUNDS
Municipal Infrastructure Investment Fund*	144,680.00	144,680.00	Utilization of remaining funds for PK-6265-14 Senior Soccer Field Lighting

Final project reports as required by the signed contracts are required to be submitted to the Federal Government by June 2014.

New Opportunities

New Building Canada Fund (NBCF):

New Federal Infrastructure funding program that came into effect on April 1, of this year. NBCF is comprised of four separate programs:

CITY OF VAUGHAN

EXTRACT FROM COUNCIL MEETING MINUTES OF JUNE 24, 2014

Item 7, Finance Report No. 7 – Page 17

- National Infrastructure Component (NIC): \$4 Billion over 10 years and targets projects of a national significance
- Provincial-Territorial Infrastructure Component (PTIC): \$10 Billion over 10 years to assist municipalities and administered by each Province. Specific program details will be released once the Federal government and Province of Ontario have signed the agreement
- Gas Tax: program will be indexed at 2% per year commencing with the 2016 census and the eligible categories has increased to 17
- PPP Canada: Phase six (6) is now open for applications

Details regarding the application process are not yet available and may be further delayed pending Provincial Election results. Staff continues to monitor the provincial website (www.gov.on.ca/en/infrastructure/bcf.asp).

More information regarding the NBCF can be found in Attachment 8.

Edible Trees Program:

Offers assistance to groups to plant fruit and nut trees/shrubs to meet such criteria as protects and preserves the environment and providing access to healthy food.

Species at Risk:

The Species at Risk Stewardship Fund was established in 2007 to encourage people to start getting involved or continue their commitment to protection and recovery through stewardship activities.

Relationship to Vaughan Vision 2020 / Strategic Plan

The report is consistent with the priorities set by Council and the necessary resources have been allocated and approved.

Regional Implications

None

Conclusion

Based on the 2014 first quarter results, the overall City position is unfavourable \$3.6M. This unfavourable result is attributable to the severe winter and the December 2013 ice Storm costs which were completely out of the City's control. Details on the reimbursement of ice storm expenses from the Provincial Government are not yet known and could potentially have a significant positive impact on the final 2014 City's financial position. At this stage it is too early to determine the final City's position, as a number of events such as a shifting of trends, timing differences, or unforeseen activities in the latter part of the year could easily improve or erode the current position. Staff will continue to provide quarterly updates advising of changes in the City's financial landscape.

Q1-14 Consolidated Variance
Report

13

VAUGHAN

ENDING MARCH 31, 2014 – CONSOLIDATED QUARTERLY REPORT**Recommendation**

The Commissioner of Finance & City Treasurer and the Director of Financial Services recommend:

1. That the 2014 Consolidated First Quarter Variance Report be received; and
2. That the funding source for capital project PO-6744-13 be amended to Capital from Taxation as illustrated in the Funding Source Amendment section of this report.

Economic Impact

The quarterly variance report monitors actual spending performance to the City's calendarized financial plan. There is no economic impact as budgets and projects have been previously approved by Council. Amending the funding source to Capital from Taxation for project PO-6744-13 Meeting House Cemetery – Memorial Wall will not have an economic impact as this can be accommodated within the funds returned as a result of closed capital projects in the first quarter .

Communication Plan

Not applicable

Purpose

To report on 2014 first quarter financial results, as of March 31st, 2014, including an update on grant activity. New to the process is the provision of high profile capital project summaries included as attachment 4.

Background – Analysis and Options

The attached first quarter variance report compares actual operating and capital results for the period ending March 31st, 2014, relative to approved budgets. It is important to note, the combined unfavourable variance is not directly indicative of the City's final year-end position; it simply compares the City's actual financial position to the approved budget at a point in time. At this stage in the process it is too early to determine the final City's position, as a number of events such as a shifting of trends, timing differences, or unforeseen activities in the latter part of the year could easily improve or erode the current position. For example, the receipt of funding through the Provincial Ice Storm Assistance Program could have a material impact on the 2014 results.

The actual balances presented include all necessary entries and accruals. However, it should be noted, the full amortization of tangible capital assets and post retirement employee benefits are excluded and presented differently from the City's financial statements.

The quarterly results for City Operations, Water and Wastewater Operations, and Capital are presented together in one consolidated report. This action is intended to provide stakeholders with a more fulsome and complete view of the City's financial results. The item will provide a brief executive summary followed by summaries for City Operations, Water and Wastewater Operations, and Capital. Additional detail will be provided as attachments.

First Quarter Overview

Overall, the City's net financial performance is unfavourable.

The City has come in \$3.6M unfavourable to budget in City of Vaughan Operations. Typically, the first quarter of operations shows a favourable variance to budget as the level of spending is

usually restrained until Budget approval, which occurred on Feb. 18th, 2014. However, the impact of the long and cold winter and continuing efforts related to the December 2013 ice storm resulted in additional financial pressure and significantly contributed \$8.2M to the overall unfavourable position. The current budget shortfall is larger than the Winterization Reserve balance (\$4.4M) and it may not be possible to fully mitigate the impact of the past winter and ice storm. Staff are hopeful that Ontario Disaster Relief funding and positive performance for the remainder of the year will minimize these impacts. More detailed report on Winter Control and the Ice Storm will be presented separately. Further details regarding the quarterly results are provided later in the report and in Attachment #2.

The City's combined Water and Wastewater operations resulted in a combined \$2.0M favourable variance due to stronger sales revenues from higher than expected growth and consumption in the first quarter. Other favourable contributing factors are lower expenses for maintenance repairs, contractor labour and materials due to lower demand. Additional cost savings were derived from general administration discretionary expenses and salaries due to timing.

The overall capital position was on target. The majority of closed projects were completed on or below budget. As stated above, the first quarter winter activities are expected to negatively impact the Winterization Reserve, with the current reserve balance of \$4.4 M being insufficient to mitigate the \$8.2 M unfavourable position.

Table 1 below summarizes and illustrates the City's financial results, which is followed by a brief summary for each area.

Table 1 - Summary of the City's Q1 2014 Financial Results

<i>Operations</i> (In millions)				
	<i>City</i>	<i>Water</i>	<i>Wastewater/ Storm</i>	<i>Total</i>

Note: A) Above available budget balance includes in-year budget amendments

B) Y/E 2013 audit accrual reversals illustrated separately to focus on actual unspent values

C) Combined Active Adjusted Variance equals the Variance on Attachment 3, and combined Closed Adjusted Variance equals the Variance on Attachment 6

General Note: Capital project timing can span multiple years. The above chart aims to illustrate this occurrence and presents activity related to prior budgets separately.

City Operating Budget Results

The annual Operating Budget for the City is \$254.0M, of which \$95.5M in revenues and \$74.6M in expenditures were budgeted for the first quarter of the year. At the end of the first quarter, the City experienced a \$3.6M net unfavourable variance. This unfavourable variance is comprised of a \$1.9M unfavourable expenditure variance and a \$1.7 M unfavourable revenue variance. The main areas that contributed to the negative \$3.6M variance are summarized below;

City Revenue Variance Overview

Actual revenues were \$93.8M as of March 31, 2014, and represent a \$1.7M unfavourable variance when compared to the year-to-date revenue budget of \$95.5M. This variance stems from the following:

- **Reserves & Other Transfers** - There were several factors that contributed to the \$1.7M variance below plan. These are:
 - \$1.5M of planned withdrawals that were not required for Engineering Services, Building Standards Service Continuity Reserve and DC Growth projects as a result of lower than expected department expenditures and higher revenue within Building Standards department.
 - \$280K in Administration Recovery from Capital as a result of a reversal of a 2013 year end accrual.
- **Corporate Revenue** – An unfavourable variance of \$0.4M is made up of smaller unfavourable variances in a number of Corporate Revenue accounts. Details on these variances are provided in Attachment #2.
- **User Fees/Services Charges** – Are relatively on target with a minor favourable variance of \$0.4M mostly within Building Standards, Cultural Services, and Licensing offset with unfavourable variances in Development Planning, By-law & Compliance and Development Transportation Engineering revenues. All these variances are explained in more detail in Attachment #2.

City Expenditure Variance Overview

Actual total expenditures were \$76.5M as of March 31, 2014, and represent a \$1.9M unfavourable variance to the year-to-date expenditure budget of \$74.6M. This variance stems from the following:

- **Corporate Expenses** – The largest component driving the City's unfavourable expenditure variance was in Reserve Contribution and Corporate Expenses which had an unfavourable variance of \$2.6M. The major components of this variance included:
 - **Ice Storm 2013** – There were unfavourable expenditures of \$2.1M related to the December 2013 Ice Storm clean-up. These amounts are all unbudgeted costs and are being tracked in a separate business unit as part of the provincial government requirements for partial reimbursement. The province has set a process for submissions and a decision on reimbursement amounts is expected later this summer.
 - **Anticipated Labour Savings** – Unfavourable variance of \$1.5M for budgeted labour savings due to vacant positions in departments. This is budgeted corporately with the actual savings being realized in the departments and the offset would be seen in the overall departmental expenditure amounts. The actual labour favorable variance in the departmental expenditures was \$2.1M or \$0.6M greater than plan. It is normal that the Q1 labour variance is high as most of the approved positions in the budget have not yet been hired.
 - **OMB and VMC projects** – These two projects have not yet been fully staffed resulting in a combined favourable variance to budget of \$0.9M. Recruitment is currently underway to fill these roles. Residual balances at year-end will be carried forward into future years.
- **Department Expenses** – The next largest component driving the City's unfavourable expenditure variance relates to total department expenses, which were over budget by \$1.7M. This position was generated by a \$5.5M combined unfavourable variance found in Public Works Winter and in Parks and Forestry Operations resulting from unusually harsh and persistent winter conditions, excluding the impacts of the Ice Storm. This variance was largely offset by favourable positions in most other departments related to:
 - A \$2.1M labour variance attributable to general turnover vacancies, new compliment vacancies in the recruitment process, and year-end payroll accrual reversals due to past year payment timing. A level of labour variance is anticipated and planned for corporately, though actual City performance was even greater than the \$1.5M Q1 planned corporate balance.
 - There were favourable variances in a variety of accounts totalling \$876K in General Maintenance, YRT Ticket Purchases, Radio Operations, Protective Clothing, Computer Hardware and Software, Professional Fees and Communications

Variance Summary:

For quick reference purposes, a summary of the variances by major category is provided below. A more detailed financial summary is provided as Attachment #1. Further explanations on specific variances are provided as Attachment #2.

Water and Wastewater/Storm Operating Budget Results

Following are the financial operating results and analysis for both the water and wastewater/storm operations from January 2014 to March 2014. The variance analysis is a comparison of the year to date budget to the year to date actual results.

The water/wastewater system in York Region operates as a two-tier system. The Region of York is responsible for the supply of water and wastewater services and the lower tier municipalities are responsible for the water and wastewater distribution systems within the local municipality. The net revenues that are generated annually by the City of Vaughan from the operations of the water and wastewater/storm utilities fund costs associated with the purchase of water supply and wastewater services from the Region of York, as well as the City's administration, financing costs, system operational and maintenance costs and most importantly funding to build the reserves for future infrastructure renewal.

Water Operations

Year to date (YTD) actual water revenues for the period ending March 31, 2014 are favourable by \$620K which is comprised of residential \$601K, commercial revenue of \$76K offset by slightly unfavourable miscellaneous water revenue \$57K.

The favourable residential billings are due to higher than budgeted average consumption levels per household and new account activations. Actual consumption is trending at 10 cubic meters per household more than budget and 50 new accounts came in higher than budgeted or 28%.

Commercial average consumption activity is trending higher than budget at 5% whereas new account activity remains unchanged for this first quarter.

Water purchases are unfavourable by \$113K partly due to higher demand (\$43K) and slightly unfavourable non-revenue water (NRW) consumption of \$71K.

The Gross Margin indicates the net funding available to the City after the Region of York has been paid for the water supply and is favourable by \$507K due to higher sales revenue.

Other revenues consist primarily of installation and service fees and are slightly unfavourable by \$33K, actual activity is based on demand offset by favourable sundry and interest revenue at \$15K.

Water expenses are favourable by \$349K which is the result of favourable maintenance and installations expenditures of \$188K and favourable general administration of \$159K. The favourable variances are largely due to fewer customer service requests due to contractor labour and materials, lower than expected for repair activity. General administration expenses are favourable due to the timing of discretionary spending such as professional fees.

As a result of the above, the quarterly water lifecycle contribution of \$1.7M is favourable by \$837K.

City of Vaughan
Statement of Operations
Water Division
For the period ending March 31, 2014

	2014 Budget	2014 YTD Budget	2014 YTD Actual	2014 Variance

Budgeted Lifecycle Contribution	\$5,748,530	\$854,745	\$854,745	\$0
Additional Reserve Contribution	\$0	\$0	\$837,134	\$837,134
Surplus	\$0	\$0	\$0	\$0

Wastewater/Storm Operations

Wastewater billing is based on water consumption, therefore trending is very similar to water revenues. Wastewater YTD billings are favourable by \$787K for the period ending March 31, 2014 which is comprised of residential billings \$652K and commercial revenue of \$135K. Wastewater revenue is billed based on water consumption.

The unfavourable treatment variance of \$116K is a combination of unfavourable treatment charges due to higher sales and unfavourable non-revenue treatment charges. This relates directly to the non-revenue water variance.

The favourable gross margin of \$671K is the result of favourable sales less unfavourable treatment charges.

Other revenues consist of installation and service fees which are slightly unfavourable by \$37K. Actual activity is based on demand. Interest revenue is unfavourable by \$10K.

Expenses are favourable by \$540K primarily due to favourable maintenance and installation at \$220K, and storm operations favourable by \$165K attributed by lower than expected contractor labour and materials related to repairs, inspections, flushing and pond management. General administration is favourable by \$155K due to timing of discretionary spending, salaries and debenture payments. All other expenses are on budget.

As a result of the above, the quarterly wastewater/storm lifecycle contribution of \$2.0M is favourable by \$1.2M.

**City of Vaughan
Statement of Operations

Capital Budget Results

Overall, the Capital Budget performance is favourable, with the majority of projects coming in under assigned budget. This section is intended to provide an update on quarterly activity for the following:

- Funding Source Amendment: PO-6744-13
- Open Capital Project Spend Performance
- High Profile Capital Projects (NEW)
- Closed Capital Projects Budget vs. Actual
- Reserve and Reserve Fund positions
- Grant Activity

Funding Source Amendment

Capital Project PO-6744-13 Meeting House Cemetery – Memorial Wall was approved for \$26,800 as part of the 2013 Capital Budget process for the renovation and repair of the memorial wall at Meeting House Cemetery. During the budget process staff had received information from the Ministry of Consumer Services that the project qualified as a project that could be funded from the Cemetery Trust as it relates to the care and maintenance of the cemetery. When completing the Year End Trust Return staff were informed that only the portion of funds equivalent to the interest earned on the Trust could be used for care and maintenance.

During 2013, capital expenditures of \$25,441 were incurred related to capital project PO-6744-13. The annual interest of \$5,538 earned on Trust Bank Account during 2013 was transferred to fund

the capital project, leaving \$19,903 as the unfinanced amount. Hence, it is requested that Capital from Taxation be used to fund the remaining balance of \$19,903; the available funds are as a result of closed capital projects with the same funding source.

Open Capital Project Spend Report (Attachment #3)

Staff reviewed the Open Capital Project Spend Report and general highlights are provided below.

- As of Quarter 1-2014, 637 projects with a budgeted value of \$609M are open.

Q4-13 Close	#	Budget
	494	589,407,615
2014 Projects:		
Net new	196	28,029,418
Additions to existing Projects (23)		23,673,331
Closed Projects	(53)	(31,832,755)
Q1-14 Close	637	609,277,609

- The above open projects were approved as follows:

Year	Projects		Budget		Unspent Funds	
	#	%	\$	%	\$	% of Budget
2014	196	31%	28,029,418	5%	28,029,418	100%
2013	144	23%	64,474,236	11%	51,712,990	80%
2009-2012	229	36%	251,510,493	41%	108,169,978	43%
2006-2008	47	7%	68,052,493	11%	16,504,150	24%
2005 and older	21	3%	197,210,969	32%	9,697,967	5%
Grand Total	637	100%	609,277,609	100%	214,114,503	35%

- As of Mar 31, 2014, 65% of the available budgets were spent
- Capital projects substantially complete and nearing closing

Region / External Invoice	Department	Estimated Project Completion	# Projects	Total Budget	Total Actual	Total Variance
	Buildings & Facilities	Q2-14	3	4,832,281	4,461,176	371,105
	Parks Development	Q1-14	1	41,200	39,279	1,921

Regional Invoice	Engineering Services	Q1-14	2	381,100	254,101	126,999
	Engineering Services	Q4-14	4	2,756,736	1,046,307	1,710,429
Regional Invoice Total			6	3,137,836	1,300,408	1,837,428
Grand Total			16	9,565,067	6,727,902	2,837,165

- 4 projects are anticipated to close in the upcoming quarter.
- 6 projects are waiting for invoices from external parties. The closure of these projects is anticipated for when the final invoices are received and processed.
- 6 invoices are waiting for invoices from the region. The closure of these projects is anticipated for when the final invoices are received and processed.

A complete list of capital projects that are substantially complete and nearing completion is provided as Attachment 5.

- Unfavourable variances from budget include:

- Relocate Fire Station 7-3 Land Acquisition (FR-3514-12) currently indicates a budget overage of \$108,164. Costs associated with taxes and external services required for the purchase of the lands were not accounted for in the original budget. Staff have recently presented a report to Council to address this shortfall and a budget amendment is anticipated for Q2-14.
- Public Works – Roads Vehicle (FL-5296-13) has been closed with an overage of \$574 (2% of total budget of \$31,600). This overage is due to the outfitting required to make the vehicle functional for the Road division. Prior to the Capital Project and Financial Administration and Reporting Policy the practice was to allow overages up to the lower of 10% or \$10,000. This balance can be accommodated from closed project residual funds returned to the Vehicle Reserve.
- Rimwood Park – Tennis Court Replacement (PK-6341-12) has been closed with an overage of \$2,830 (4% of total budget of \$67,000). This overage is due to the addition of sub drains and additional base preparation work before the asphalt surfacing could be installed. Prior to the Capital Project and Financial Administration and Reporting Policy the practice was to allow overages up to the lower of 10% or \$10,000. This balance can be accommodated from closed project residual funds returned to the Parks Infrastructure Reserve.
- Requests in accordance with Section 8A of Policy 05.4.02 Capital Project Financial Administration and Reporting:
 - The following projects were reported on in 2013 Fourth Quarter Variance Report. The closure of these projects is anticipated for Q2-14,:
 - DT-7011-07 OPA 620 East West Collector EA
 - PK-6545-13 Accessible Swings – 4 parks
 - FL-5208-12 Roads-New Vehicle

Individual Capital Project Detail - In addition to the above, budget to actual financial status and comments for currently approved and open capital projects are provided in Attachment 3. It is important to note this information is compiled at a point in time and the reader is cautioned on the following:

- A completed capital project will remain active or open until all invoices are paid and funding is complete. Projects are not closed until approved by the department. As a result, projects that are substantially funded will reside on the Open Capital Project Spend Report. It is important to note this report represents projects from current and prior budget years and total balances are the combined value.
- Projects that are debenture financed, as approved by Council, are not closed until debenture financing is acquired through the Region of York. Furthermore, project financing is not typically requested until the project is substantially complete, which is contingent on a timeframe to determine outstanding invoices and settlement issues. In the case of Engineering Projects, this may take up to several years.
- Capital work is continuously underway and current information will vary from this report.

High Profile Capital Projects

In December of 2013 Council approved the *Capital Project Financial Administration and Reporting Policy*. This policy is intended to provide a consistent and consolidated approach to capital project financial administration and reporting.

Section 10.2 High Profile Capital Project Reporting states that as part of the quarterly report, each identified high profile capital project will require an additional status report with comprehensive details submitted by the appropriate department.

High Profile Projects are selected based on one of the following criteria:

- A total capital project budget value equal to or greater than \$5 million

- A contingency level of 20% or more
- Identified as a high visibility or sensitive project by SMT or Council

The Senior Management Team (SMT) was provided with a list of projects that met the first two criteria. After a careful review of the projects, those projects that only met the criteria of having a contingency equal to or greater than 20% were not included as the project budgets ranged between \$13,000 and \$500,000 adding very limited value and does not reflect the spirit of the policy.

As a result of SMT's review the following projects were selected for reporting and status reports are provided as Attachment #4:

Project Title	Total	>\$5M	=>20%
Lead Department: Building & Facilities			
Civic Centre Resource Library - Construction	12,857,400	X	
Civic Centre - Demolition, Parking and Storm Drainage	23,040,100	X	
North Thornhill Branch Library (Block 10)	4,220,550		
Station 7-3 Relocation	9,537,975	X	
Lead Department: City Manager			
Vaughan Hospital Precinct Development	80,000,000	X	
Lead Department: Development Transportation Engineering			
Black Creek Renewal	47,289,313	X	X
Vaughan Metropolitan Centre NE Storm Water Management Pond	6,912,666	X	X
Millway Avenue Widening & Realignment	6,769,800	X	
Lead Department: Engineering			
Corporate Asset Management	2,635,720		
Lead Department: Parks Development			
Maple Valley Plan	21,807,323	X	

Budgeting & Financial Planning Staff worked with the identified Lead Departments to complete the reports for Q1-14 reporting. The Lead Department for a project may change dependant on the stage of the project. As with any new process, changes are expected as experience is gained and the process evolves.

Capital projects closed during the 1st Quarter

Staff together with City departments reviewed all active capital projects listed as of March 31st, 2014 to determine which capital projects could be consolidated and/or closed. Overall, 53 capital projects totalling a budget of \$31.8M were closed in the 1st quarter of 2014. Total actual project costs came in at 96% of budget, freeing up \$1.4M in the original funding sources for future project consideration. The drivers behind the \$1.4M are as follows:

Department	Budget	Actual	Variance	% Spend	# Closed
Buildings & Facilities	3,422,748	3,119,880	302,868	91%	14
Development Planning	185,400	174,543	10,857	94%	1
Engineering Services	51,500	-	51,500	0%	1
Fire & Rescue Services	4,741,545	4,571,134	170,411	96%	5
Fleet Management	1,056,400	902,476	153,924	85%	20
Parks Development	2,929,650	2,918,323	11,328	100%	5
Public Works	710,000	265,941	444,059	37%	5
Real Estate	18,735,512	18,517,881	217,632	99%	2
Q1 Closed Projects	31,832,755	30,470,178	1,362,579	96%	53

- Engineering Services – The culvert removal on Peeler Road will be completed in conjunction with the future Black Creek remedial works; as such, the capital project for this work was closed.
- Fleet Management – Awards for equipment purchased were lower than the project budgets. Staff will review how these items are budgeted by researching market pricing of equipment prior to completing the upcoming 2015 budget process.

- Public Works – The lowest bidders to complete the Storm Pond Sediment removal were all significantly below the approved budget.

A complete list of closed capital projects is provided as Attachment 6.

Continuity Schedule of Reserves and Reserve Funds

A continuity schedule of reserves and reserve funds as at March 31, 2014 is provided as Attachment 7. This schedule provides information on the individual and aggregate reserve balances. It also provides information on outstanding financial commitments and payment estimates required in future periods to fund approved projects. Forecasting commitments is intended to provide a proactive view of the reserve position and should not be interpreted as the year-end position due to the fact that commitments are not incorporated into financial statements until the actual expenses have incurred.

Reserve positions before commitments are all in a positive position, with the exception of development charge management studies and fire and Uplands reserve. Adding commitments to the schedule reveals that 9 reserves are in a future negative position. Below is a brief description for positioning of these 9 reserves:

Sale of Public Lands – Future obligations are currently greater than the balance on hand. Dedicated surplus land is authorized for sale to cover this obligation but is pending.

Uplands Capital Improvement – A commitment to replace the uplands chairlift was approved in 2011 by Council. As a result, the future position of this reserve will be negative and is planned to be replenished over time through Uplands revenue received.

Tax Rate Stabilization Reserve - Surplus revenues are not accounted for in this reserve. The current planned commitments are illustrating that this reserve will be in a negative position at yearend. This reserve will never be in a negative position as the draws from the reserve will reflect the funds on hand.

CWDC Fire – A Council commitment to move forward with fire station 7-10 will temporarily place this reserve into a negative position, which will be replenished through future growth based development charges. This position may impact the timing of future projects.

CWDC Management Studies – Due to timing of events, this reserve is permitted to be in a deficit position. Growth related studies are incurred in advance of growth and recovered through subsequent development charges.

Special Charges and Area Development Charges (Developer Build Reserves) – These reserves relate to projects generally built by developers. Essentially, the developer has agreed to develop a structure, which will be funded by the City once funds are collected and available. Although, the continuity schedule illustrates a negative position after commitments, these reserves will never be in a deficit cash position as payments will only occur when funds are on hand. Reserves with a negative balance after commitments in this category are as follows:

Grants Update

The following report provides an overview of the grant portfolio's 2014 First Quarter results with respect to:

- Annual Government Grant Programs
- Community Infrastructure Investment Fund (CIIF) update
- New Opportunities

Annual Grants Program Submissions Status regarding: Awarded, Pending Award Notification or Declined)

Grant activity in the first quarter was related to twenty-four (24) programs equating to approximately \$7.5 Million dollars. Specific award status and details are as follows:

- 11 submissions have received funding (\$591,821)
- 11 submissions are pending notification of award (\$4.8M)
- 2 submissions requests were declined

The table below summarizes this activity:

2014 GRANT PROGRAM ACTIVITY			
Q1 SUBMISSIONS AWARDED/FUND RECEIVED			
PROGRAM	TOTAL PROJ. COST	AWARD	USE OF FUNDS
Municipal Infrastructure Investment Fund*	144,680.00	144,680.00	Utilization of remaining funds for PK-6265-14 Senior Soccer Field Lighting
Swim to Survive 2014	15,588.00	15,588.00	Notified of award approval
Ministry of Energy	33,747.00	24,815.00	Community Energy Plan Consultant
2014 Canada Summer Jobs (Library)	5,000.00	2,500.00	2 Summer Students
VBEC Relocation	82,577.00	25,535.00	Move from Beaverbrook House to Ec. Dev. In Civic Centre
Starter Company	222,676.00	95,000.00	Over two years
Mun. Partnership Program	400,000.00	87,000.00	William Granger Greenway
York Region Ped & Bike Partnership Program	90,000.00	90,000.00	Bike Lanes portion of project of DT-7056-11
York Reg. Ped & Bike Partnership Prog	244,110.00	52,203.00	Ped. & Bike Network Implementation Program
FCM Green Municipal Fund	45,000.00	22,500.00	Hire Consultant to develop the GHG Plan (notification in 2014)
Save on Energy Funding	32,000.00	32,000.00	Energy Audit
TOTAL	1,315,378.00	591,821.00	
Q1 SUBMISSION PENDING AWARD NOTIFICATION			
PROGRAM	TOTAL PROJ. COST	REQUEST	USE OF FUNDS
Celebrate Canada (2014 Application)	15,000.00	5,000.00	Canada Day Event
ICCI	55,000.00	27,500.00	Foreign Consultant Offices in Italy and Israel
COSTI Recreation Dept.	43,400.00	10,000.00	Request for 62 placements (Recreation)
Canada Summer Jobs	309,502.00	109,141.00	Request for 69 placements (Rec & PW)

Q1 SUBMISSION PENDING AWARD NOTIFICATION						
Program	Cost Estimate	Amount Received	Rationale			
Job Start (various departments)	59,780.00	5,600.00	Request for 8 placements			
Job Start (Recreation)	43,400.00	10,000.00	Request for 62 placements (Recreation)			
Invest in Ontario Act Fund	2,011,406.00	861,900.00	Award=\$8,686,674; spent 31/12/13=6,675,268. 2014 Committed=861,900; Unspent balance: \$2,011,406			
2013 Federal Gas Tax	3,663,607.00	3,663,607.00	Audit Complete. (New agreement pending)			
VBEC Business Plan	90,000.00	90,000.00	Annual Plan for Ministry of Economic Development and Innovation			
Eco Connexions	5,000.00	5,000.00	Tree planting/landscaping rehabilitation project			
Ontario Sports and Recreation Fund	29,580.00	11,068.00	Recreation Leadership Training Program			
TOTAL	6,325,675.00	4,798,816.00				
2013 Q4 NOT AWARDED						
PROGRAM	TOTAL PROJ. COST	RATIONAL				
Places to Grow	25,000.00	Program revenue depleted before end date				
2013 New Horizons for Seniors	24,809.00	Limited funding in a highly competitive program				
TOTAL	49,809.00					

* Municipal Infrastructure Investment Fund - This will result in returning \$144,800 to Capital from Taxation as this is the project's funding source. A report at a later date will be brought forward to Council with a recommendation on redirecting the funds to another capital project.

Sector and Term Specific Grant Programs

Community Improvement Investment Fund (CIIF)

The following table indicates the amount spent to March 31, 2014 and currently in the claim and reporting process as required by the program.

COMMUNITY IMPROVEMENT INVESTMENT FUND AWARDED PROJECTS				
	COST ESTIMATE	CIIF @33.3%	CLAIMED TO MAR 31	STATUS
Ainsley Grove Library (AODA Standards @ Front Counter)	100,000.00	33,333.33	3,316.00	In Progress
Dufferin District Park: Tennis Court Rehabilitation	139,300.00	46,433.33	1,705.00	In Progress
Dufferin Clark C.C. Relocate Seniors Room To The Ground Floor	50,600.00	16,866.00	15,158.00	Complete
Dufferin Clark C.C. Seniors Accessible Washrooms	51,500.00	17,166.00	13,783.00	Complete
Mackenzie Glen Park Replace Splash Pad Surfacing	61,800.00	20,600.00	16,338.00	In Progress
Mackenzie Glen Play Ground Rehabilitation	201,500.00	67,166.67	705.00	Complete
McClure Meadows Park-Splash Pad	25,800.00	8,600.00	1,445.00	Complete
Maple Lion Park Splash Pad	25,800.00	8,600.00	6,064.00	Complete
Father Ermanno CC: Out Door Rink	113,300.00	37,766.00	11,933.00	Complete

COMMUNITY IMPROVEMENT INVESTMENT FUND AWARDED PROJECTS				
Garnet A. Williams CC - Floor Replacement	36,100.00	12,033.33	10,878.00	Complete
Glen Shield Park-Playground Replacement & Safety Surfacing	248,000.00	82,666.67	43,060.00	In Progress
Vaughan Crest Park Bocce Court Re-development	137,000.00	45,666.70	29,831.00	Complete
York Hill Park-Tennis Court Replacement	56,700.00	18,900.00	25.00	In Progress
Maple Baseball Diamond Fencing Replacement	32,000.00	10,666.67	4,593.00	Complete
Sonoma Heights Park - Fencing Extension	30,900.00	10,300.00	6,347.00	Complete
TOTAL AMOUNT ALL PROJECTS	1,310,300.00	436,764.70	165,181.00	

Final project reports as required by the signed contracts are required to be submitted to the Federal Government by June 2014.

New Opportunities

New Building Canada Fund (NBCF):

New Federal Infrastructure funding program that came into effect on April 1, of this year. NBCF is comprised of four separate programs:

- National Infrastructure Component (NIC): \$4 Billion over 10 years and targets projects of a national significance
- Provincial-Territorial Infrastructure Component (PTIC): \$10 Billion over 10 years to assist municipalities and administered by each Province. Specific program details will be released once the Federal government and Province of Ontario have signed the agreement
- Gas Tax: program will be indexed at 2% per year commencing with the 2016 census and the eligible categories has increased to 17
- PPP Canada: Phase six (6) is now open for applications

Details regarding the application process are not yet available and may be further delayed pending Provincial Election results. Staff continues to monitor the provincial website (www.gov.on.ca/en/infrastructure/bcf.asp).

More information regarding the NBCF can be found in Attachment 8.

Edible Trees Program:

Offers assistance to groups to plant fruit and nut trees/shrubs to meet such criteria as protects and preserves the environment and providing access to healthy food.

Species at Risk:

The Species at Risk Stewardship Fund was established in 2007 to encourage people to start getting involved or continue their commitment to protection and recovery through stewardship activities.

Relationship to Vaughan Vision 2020 / Strategic Plan

The report is consistent with the priorities set by Council and the necessary resources have been allocated and approved.

Regional Implications

None

Conclusion

Based on the 2014 first quarter results, the overall City position is unfavourable \$3.6M. This unfavourable result is attributable to the severe winter and the December 2013 ice Storm costs which were completely out of the City's control. Details on the reimbursement of ice storm expenses from the Provincial Government are not yet known and could potentially have a significant positive impact on the final 2014 City's financial position. At this stage it is too early to determine the final City's position, as a number of events such as a shifting of trends, timing differences, or unforeseen activities in the latter part of the year could easily improve or erode the current position. Staff will continue to provide quarterly updates advising of changes in the City's financial landscape.

City Operating – Q1 Specific Variance Explanations

Specific Variance Explanations:

Listed below are explanations for significant revenue and expenditure variances. As per prior practice, department explanations are required for all unfavourable variances and any favourable variances in excess of \$100,000. Explanations for corporate revenue and expenditure variances are also included, following the major department variance explanations.

Note: In general, revenues are based on assumptions regarding many factors i.e. economy, timing etc. Some areas are difficult to predict with a high level of accuracy and a particular period can be significantly influenced by a large application or revenue timing (e.g. Building Standards, Development Planning etc.).

Commissioner of Legal and Administrative Services

Commissioner of Legal and Administrative Services

Expenditure variance – \$41,239 or 36.4% unfavourable

The unfavourable variance was mostly due to unplanned labour costs. This variance will continue the rest of the year.

City Clerk's Office (CCO) - Administration

Expenditure Variance – \$34,374 or 3.1% unfavourable

Unfavourable variance was a result of higher than expected increase in postal rates offset by favourable variance in rental lease equipment due to the renewal of the Print Shop copier lease agreement.

CCO – Licensing

Revenue variance - \$167,278 or 29.3% favourable

The favourable variance was mainly due to higher than expected revenue earned from Driving School, Eating Establishments, Public Garage, Personal Services, Adult Entertainment, Taxi and Tow Truck Licensing. The variance is expected to reduce by Q2.

By-law & Compliance

Revenue variance - \$92,142 or 15.3% unfavourable

The unfavourable variance was a result of lower than expected parking fines revenue and delay in receiving Animal Services recoveries from other municipalities of approximately \$30K. This should be corrected in the second quarter.

Expenditure variance - \$194,045 or 13.8% favourable

The favourable variance was a result of temporary vacancies in the department and timing of spending in Animal Services.

Commissioner of Community Services

Recreation

Expenditure variance - \$355,669 or 7.8% favourable

Labour Variance:

Overall favourable labour variance of \$148K was a result of savings in full time labour costs (\$214K); of which \$66K was partially offset by contract replacements. The remaining favourable

City Operating – Q1 Specific Variance Explanations

variance (\$148K) was partially offset by overages in part time costs of \$45K.

Other Expenses:

Favourable variance in Contractor & Contractor Materials of \$50K is due to invoice timing delays for the Spring programming session. This should correct itself by Q2.

Favourable variance in Small Tools & Equipment of \$23K is largely due to a delay in purchasing fitness equipment. The purchase will likely take place by Q3 and the invoicing should be received by Q4.

Cultural Services

Revenue variance - \$179,289 or 98.3% favourable

The department's revenue variance was favourable by \$179K, of which \$121K is attributable to greater than expected sponsorship revenues generated from events including Canada Day (\$44K favorable), Concerts in the Park (\$32K favorable), and Winterfest (\$45K favorable).

The remainder of the favourable variance was attributable to higher than expected program revenue generated at City Playhouse Theatre (\$54K).

Expenditure variance - \$8,733 or 2.0% unfavourable

The department's unfavourable variance in expenses is largely attributable to overages in Contractor & Contractor Materials (\$40K) for Winterfest, which is fully offset by increased revenues generated by sponsorships for that event.

Favourable variance in Grouped Expenses of \$16K is largely due to lower fees incurred from hosting fewer shows at the City Playhouse Theatre; offset by the increase in program revenue noted above.

Favourable variance in Computer Software of \$5K is due to a delay in computer purchases, which should occur later in the year.

Buildings and Facilities

Expenditure variance - \$354,665 or 7.8% favourable

The favourable expenditure variance was primarily a result of:

- Labour savings of \$48K as a result of 4 vacancies within non-union staff positions, 2 of which have been filled in Q1. There are also vacancies within union positions that are offset with increased Overtime and FT Contract positions.
- General Maintenance of \$233K within the Trade Shop business unit, Vellore Village, Al Pall, Maple, Father Ermanno, Dufferin Clark, Father Ermanno Outdoor Rink, Benjamin Vaughan Arena complex, Garnett as a result of insufficient resources to undertake these projects: one vacant position of Architectural Technologist as well as the vacant position of Manager of Facilities, both vacant as of July 2013, and a vacant position of Manager of Building (since late January 2014). With the hiring of the Manager of Facilities at the end of Q1, 2014, more work will be undertaken in Q2-4.
- Favourable variances were also experienced in Cleaning of \$45K and Garbage disposal of \$39K due to payment timing.
- There was also a favourable variance of \$36K in Rental – Buildings due to the accrual reversal for the 2013 Market Lane lease agreement, and a favourable variance in Small Tools of \$30K due to a 2013 invoice accrual reversal. These will be corrected in Q2.

The above favourable variances are partially offset by an unfavourable variance in:

City Operating – Q1 Specific Variance Explanations

- Utilities of \$114K due to an ongoing increase in the costs of hydro and natural gas and increased consumption during colder than normal winter.

Fleet Management

Expenditure variance - \$133,167 or 19.6% favourable

The favourable operating variance is comprised of \$44K in labour due to vacancies (Manager of Fleet and the PT Driver and Compliance Trainer); and a favourable variance of \$89K in planned maintenance that has not yet occurred.

Parks & Forestry Operations

Revenue variance - \$6,818 or 39.7% unfavourable

The unfavourable variance was mostly due to lower than expected Park Tree and Bench dedication purchases, and reduced Private property tree permits.

Expenditure variance - \$799,309 or 28.1% unfavourable

The unfavourable variance was comprised mainly of unfavourable variances in Contractor and Materials (\$756K) for parking lot snow removal and salting costs. This was as a result of a significant number of snow and salting events, and an increased usage of salt on facility parking lots due to the extreme and persistent cold weather. Costs associated with the ongoing clean-up from the December 2013 Ice Storm are not included in these amounts and are being tracked separately as a Corporate Expense. A standalone Item regarding the Ice Storm will provide further detail on ice-storm realized and forecasted costs.

There were also unfavourable variances in Overtime (\$316K) and Part time (\$35K) due to the number and severity of snow events. Overtime and Part time was unfavourable due in part to coverage of full time vacancies as well. These were offset by the favourable variance of \$263K in FT due to the delayed hiring for 3 FT vacancies.

There was an unfavourable variance of \$32K in Fuel due to increased sidewalk snow clearing operations.

These unfavourable were partially offset by favourable variances in:

- Materials (\$43K) due to a delay in purchasing of materials for the spring/summer season
- Equipment Lease rental (\$42K) due to an accrual reversal and delayed invoice processing.

Commissioner of Planning

Development Planning

Revenue Variance - \$115,044 or 10.3% unfavourable

The unfavourable revenue variance is due to lower than expected volumes site plan applications, (\$26K), official plan applications (\$69K), and zoning by-law applications (\$75K). This unfavourable variance is offset slightly by a favourable variance in subdivision applications (\$53K). In 2013, planning application revenues were much higher than anticipated. This trend is expected to continue in 2014, but did not materialize for quarter 1.

Expenditure variance - \$155,198 or 16.7% favourable

The majority of the favourable variance is related to the labour accounts with 5 vacant positions. Three of the positions were approved as part of the 2014 budget process and are expected to be filled by quarter 2. The remaining vacancies are related to 2 maternity leaves and 1 sick leave with one maternity leave coming to an end in quarter 2. The remainder of the variance is

City Operating – Q1 Specific Variance Explanations

found throughout several other accounts such as professional fees, sundry and computer hardware etc.

Policy Planning

Revenue Variance - \$39,269 or 100.0% unfavourable

The unfavourable revenue variance of \$39,269 is due to a delayed receipt of funding to offset the labour expenses of a full time contract position for Sub-Watershed Studies for the New Communities Area. As the employee has yet to be hired, the transfer is not yet required and this revenue variance is therefore offset with a favourable expenditure variance as shown below. The position is expected to be filled in quarter 3.

Expenditure variance - \$110,884 or 28.4% favourable

The favorable variance of \$96K in labour is due to the vacancy of one full time position and one contract position. As discussed above, the Contract position variance is offset by an unfavourable variance in the revenue meant to fund the position. There is no net impact. The full time position (Director of Policy Planning) is being left vacant pending the outcome of an operational review of the Planning Commission which is scheduled to begin later in the year and the full time contract position is anticipated to be filled in the third quarter. The remainder of the variance is in professional fees, training and development, and seminars and workshops due to below planned spending in these categories.

Building Standards

Revenue Variance - \$276,210 or 19.7% favourable

The favourable revenue variance is related in part to higher than expected volumes of licences, permits, and fines (\$294K), title restrictions (\$11K), and sign fees (\$5K). These variances were offset slightly by lower than expected volumes of plumbing permit fees (\$32K).

Expenditure variance - \$324,162 or 19.0% favourable

The favourable variance is found predominantly in the labour accounts (\$266K) and is related to 11 vacancies within the department. One vacancy has been filled for the second quarter and it is anticipated that the remaining vacancies will be filled in the third and fourth quarter. Vacancies will be filled more slowly than is typical due to a departmental restructuring that is taking place alongside the rest of the Planning Commission. The remainder of the variance can be found in several other accounts such as computer software, membership dues and fees, training and development, etc. This remaining variance is predominantly due to the staff vacancies which are reducing anticipated expenses in other areas as well.

Commissioner of Strategic and Corporate Services

Information and Technology Management

Expenditure variance - \$221,055 or 10.7% favourable

The favourable variance was primarily due to the \$96K variance in labour costs largely attributable to 2 full time vacancies and 3 new 2014 approved ARR positions which have not been filled in Q1. These positions are expected to be filled in the second quarter.

There was also a favourable variance of \$58K in Communications due to delayed vendor billing which will reverse itself in Q2. The favourable variance of \$44K in Service Contracts was due to the delayed SharePoint upgrade project; RFP is currently underway. The combined favourable variance of \$57K in computer software and hardware is reflective of project timing issues and is expected to be corrected later in the year.

City Operating – Q1 Specific Variance Explanations

These favourable variances were partially offset by the unfavourable variance of \$71K in professional fees due to earlier than budgeted timing of invoices for Bell Canada support services, which is expected to correct itself later in the year. The remainder were small variances in various other accounts.

Commissioner of Engineering and Public Works

Development and Transportation Engineering

Revenue variance - \$52,229 or 60.8% unfavourable

The unfavourable variance of \$46K in revenue from recoverable expenses line was primarily a result of the vacant TTC/YRT Construction Liaison Inspector contract position. This unfavourable revenue variance was offset by associated favourable expenses. The remainder of the variance was mainly due to lower than anticipated lot grading permit submissions.

Expenditure variance - \$366,553 or 28.9% favourable

The favourable variance of \$352K in labour accounts was primarily a result of 4 full time vacancies and 5 new 2014 approved ARR positions which have not yet been filled, plus two contract vacancies within the department. Recruitment is ongoing for 6 permanent full time positions and 2 contract positions. Three positions will remain vacant pending the Commission functional review as part of the Public Service Renewal Initiative.

The favourable variance of \$11K in contractor and contractor materials line was due to less work carried out by the City on behalf of the developer due to non-compliance of the terms of the sub-division agreement. The remainder of the variance consisted of minor variances in other accounts.

Engineering Services

Revenue variance - \$9,108 or 32.9% unfavourable

The unfavourable variance was a result of less than estimated revenue generated from Road Occupancy Permits and Municipal Consents.

Expenditure variance - \$192,222 or 20.4% favourable

The favourable labour variance of \$171K resulted primarily from four staff vacancies within the department. These positions will remain vacant pending the Commission functional review as part of the Public Service Renewal Initiative.

There was a favourable variance of \$14K in professional fees line as there were no expenses incurred in Q1. It is expected that the balance will be utilized in the remainder of 2014. The remainder were small variances in various other accounts.

Public Works

Revenue variance - \$20,607 or 10.1% unfavourable

The unfavourable variance was in Waste Division primarily as a result of 2013 accrual reversal that was higher than budgeted. This means that the City received more revenues in the first quarter for Waste diversion efforts than expected.

Expenditure variance - \$4,671,520 or 47.7% unfavourable

Most of the variance was in Winter Division due to severe weather conditions, followed by Roads and Waste Divisions. A detailed explanation for each division is provided below.

City Operating – Q1 Specific Variance Explanations

Winter

There was an unfavourable variance of \$5.0M in Winter Division as a result of severe weather conditions experienced during the first quarter of 2014. The winter of 2013-2014 has been documented by Environment Canada as one of the coldest winter seasons in 20 years. The cold weather, combined with frequent snowfall events, resulted in significantly higher costs for winter maintenance activities. The unfavourable variance of \$2.8M in contractor & contract materials line was primarily a result of higher than normal costs for snow removal operations (\$2.4M), as well as additional expenses incurred for ploughing (\$245K) and windrow activities (\$219K).

Extended periods of extremely cold temperatures reduce effectiveness of de-icing materials, resulting in significantly higher salt usage to achieve desired road and sidewalk conditions. The unfavourable variance of \$1.9M in materials and supplies was due to higher salt purchases required to keep up with demand. There was also an unfavourable variance of \$220K in labour accounts related primarily to overtime (\$91K) and additional Roads staff hours (\$83K) due to severity and number of winter events. The remainder were small variances in other accounts.

The above costs do not include costs related to the December 2013 Ice Storm cleanup. The Ice Storm costs are tracked and reported separately and are included as part of Corporate Expense. As well, a separate Item will be presented dedicated to the Ice Storm event.

Roads

The favourable expenditure variance of \$242K in Roads Division resulted primarily from \$346K favourable variance in labour accounts due mainly to staff re-assignment to Winter activities, one temporary vacancy and 3 new 2014 approved ARR positions which have not yet been filled, and timing differences in Works Labour Distribution.

These favourable variances were partially offset by unfavourable variances of \$62K in contractor & contract materials line mainly due to more maintenance activities required for streetlights & traffic signals, and \$49K unfavourable variance in hydro due to an ongoing increase in the costs of hydro. The remainder were minor variances in various other accounts.

Waste

The unfavourable revenue variance of \$19K was primarily as a result of 2013 accrual reversal that was higher than budgeted. This means that the City received more revenues in the first quarter for Waste diversion efforts than expected.

Vaughan Public Libraries

Revenue variance - \$9,275 or 12.5% unfavourable

The unfavourable expenditure variance was primarily a result of Fines and Penalties revenues that continue to decline due to the efforts of staff to advise customers of return deadlines

Expenditure variance - \$183,387 or 4.0% favourable

The favourable variance occurred primarily in the labour accounts (\$207K) based on the reversal of the 2013 payroll accrual entry for P/T staff that was not included in the budget, and due to a number of temporary library vacancies.

Other favourable operating expense variances include general maintenance due to delayed work, scheduled for Q2 and utilities-gas. Timing differences between actual and budget primarily account for the negative variance recorded in periodicals - subscriptions, periodicals - databases and computer hardware costs.

City Operating – Q1 Specific Variance Explanations

Reserves and Other Transfers

Revenue variance - \$1,740,986 or 42.5% below plan

The variance was primarily due to planned reserve withdrawals that did not occur due to lower than planned departmental expenses. This unfavourable variance in reserve revenue was offset by favourable expense variances in the various departments as discussed above. The reserve withdrawals that were lower than planned included:

- Building Standards Reserve (\$974K) – Expenditure variance of \$324K mainly due to vacant positions, indirect cost allocations, and favourable revenue variance of \$276K combine to result in a lower draw from the reserve than forecasted.
- Engineering Reserve (\$440K) – Reserve revenue lower than budgeted directly related to lower than budgeted departmental expenses due to staff vacancies.
- Administrative Recovery from Capital (\$280K) – This variance is from a reversal of the 2013 year-end accrual and will be offset throughout the year as capital project invoices are paid.
- DC Growth Projects (\$60K) – Variance related to expenditure variances due to delays in filling contract positions related to the Vaughan Metropolitan Centre (VMC).

Corporate Revenues

General Corporate Revenues

Revenue variance - \$367,824 or 12.0% unfavourable

The variance was due to unfavourable variances in:

- Mayor's Gala/Golf Classic (\$94K) – This is solely a timing issue and will be offset by the equivalent expense by the end of the year.
- OMB Hearings, Professional Fees & Resources (\$92K) – Revenue from year-end reserve to fund OMB Hearings has not been received as budgeted as the corresponding expense has not yet occurred. There is no net impact on the Q1 results.
- Fines and Penalties (\$86K) –This is due to the timing and size of the supplemental billings and is expected to even out over the year.
- Investment income (\$52K). This was due to the renewal of maturing investments are being reinvested at lower rates due to poor global economic activity and due to the fact that the economic recovery has been slower and started later than forecasted.
- Tax Certificates and Documents (\$33K) – Lower than expected revenue due to lower volume of tax certificates.

Corporate Expenditures

Corporate and Reserve Contributions Expenditures

Expenditure variance - \$2,620,419 or 34.1% unfavourable

The largest component of the unfavourable various was due to costs associated with the December 2013 Ice Storm (\$2.1M). These amounts are all unbudgeted costs and are being tracked in a separate business unit as part of the provincial government requirements for reimbursement for a portion of these costs. A decision on reimbursement amount is expected later this summer.

City Operating – Q1 Specific Variance Explanations

The next largest component of the unfavourable variance (\$1.5M) was in anticipated labour savings. This was planned in order to offset staffing vacancies realized within departments, but unknown at the time of budget preparation. This variance will continue to increase throughout the year and naturally offset the actual salary savings realized within the departments as discussed in the various departmental variance explanations above. Actual favourable labour variance in the departmental expenditures was \$2.1M at the end of Q1.

Offsetting this large unfavourable variance are favourable variances in OMB Hearings (Professional Fees and Resources) (\$492K) and VMC Development & Implementation (\$375K). These projects have not yet hired all the planned staffing and external expertise and therefore there is the favourable expense variance. The OMB Hearings (Professional Fees and Resources) variance is partially offset by the corresponding revenues as discussed in the Corporate Revenue section above. Expenditures for these two projects will be offset through special dividend from VHI. It is anticipated that any end of year variances related to the timing of these projects will be carried forward to future years.

The remainder of the variance included unfavorable variances in Tax Adjustments (\$189K), and favourable adjustments in Election (\$182K), Mayor's Gala/Golf Classic (\$108K) and professional Fees (\$32K).

Long Term Debt

Expenditure variance - \$2,496,542 or 79.3% favourable

Long term debt expense was favourable due to the timing of debenture payments. It is expected that this will be aligned with budget by the end of Q2.

Attachment 3 - Open Capital Project Spend Report - March 31, 2014

Included DT-7058-11; current work underway

Performance Highlights	
Progress to Date	Approved Changes to Design made during Period
City staff team continues to work with the facilitated consulting team and key stakeholders to achieve consensus on an overall channel alignment. City, TRCA, York Region, landowners and consultants are working on refining a proposed concept design for the Black Creek channel improvements.	No changes to the budget, however a shift from the original scope of work and schedule has been adjusted to provide additional working sessions and individual one-on-one meetings with landowners/consultants.

Major Issues Encountered	Risk-Management Status
The outcome of the facilitation process will inform the ongoing VMC OMB mediation process.	The results of the OMB mediation may impact the schedule and scope of work.

Project Timeline		Plans for Next Period
It is anticipated the timing and outcome of the OMB mediation process will allow us to take the next steps in finalizing the Black Creek Renewal Class EA Study. Schedule of the Study is subject to the OMB mediation process and timing.		Refining and integrated channel concept/preliminary design to be brought into the next OMB mediation session

Performance Highlights	
Progress to Date	Approved Changes to Design made during Period
The design and reconstruction of Millway from Highway 7 to Portage Pkwy will be completed in conjunction with the TYSSE and YRT Bus Terminal projects. The widening and reconstruction of Millway between Highway 7 and Applemill has been incorporated into the TYSSE project. In June 2011, Council authorized the expenditure of approximately \$486,500 for this work. In addition, Council at its meeting on December 10, 2013 authorized the acquisition of the necessary land to facilitate the widening of the right-of-way to its ultimate width of 31 metres. Staff is working with YRRTC to incorporate the construction of the balance of Millway to Portage Pkwy into the YRT Bus Terminal project.	No changes to date.

Major Issues Encountered	Risk-Management Status
Ongoing coordination required between the City, TYSSE, and YRRTC projects and active developments in the area is required to ensure the design and construction of Millway & Applemill is seamless and Millway is fully reconstructed before the subway is operational in Fall 2016.	The major risk is Millway is schedule creep due to construction related delays. On-going coordination between the parties will manage this risk.

Project Timeline	Plans for Next Period
The reconstruction of Millway Avenue between Hwy 7 and Portage Pkwy is to be completed before the subway is operational in 2016.	Design and construction coordination between parties is on-going. Incorporate the design and construction in the YRT Bus Station design/build RFP - Summer 2014. Tender and award for Millway construction-Spring 2015.

Assumes a 50% Cost-sharing agreement for construction of Tenders 1 & 2

Assumes 50% Cost-sharing of construction costs for Tenders 1 & 2

Performance Highlights	
Progress to Date	Approved Changes to Plan made during Period
Land was purchased in 2009. The Vaughan Hospital Precinct Plan is well underway. Cost-sharing and Ground Lease agreements are in negotiation. Work is beginning on the detailed design of the servicing of the Precinct Lands.	

Major Issues Encountered	Risk-Management Status
	Discussions continue with Mackenzie Health and the Ministry on the Cost-sharing and Ground Lease agreements. An RFP is anticipated for a Project Control & Risk Mitigation Consultant and Construction Contract Administration Consultant to manage the servicing phase of the project. Vaughan and Mackenzie Health are jointly managing risks of proceeding with construction in advance of Provincial funding commitment.

Project Timeline	Plans for Next Period
As illustrated above	Awards are anticipated for the Landscape Architect, Project Control & Risk Management Consultant and Construction Contract Administration Consultant. An RFP for the Phase 1 construction of the project is expected to be issued.

Performance Highlights	
Progress to Date	Approved Changes to Design made during Period
The VMC Municipal Servicing Master Plan Class EA identifies the technical design parameters for the SWMP improvements. The proposed pond improvements will be an integral part of the overall urban design vision and Black Creek Channel configuration. City VMC Team is considering a design competition for this pond to integrate all VMC Secondary Plan components including park, urban design and engineering requirements. The design competition will be initiated when the interface between the channel and SWMP is better defined. In addition, consideration is being given to retaining an engineering consultant to prepare a more detailed cost estimate for the SWMP work to inform the development of the related financial strategy.	No change made during this period.

Major Issues Encountered	Risk-Management Status
The physical relationship between the Black Creek channel and the NE SWM Pond must be established prior to initiating this project.	Given the complexity of this project, defining the scope of this project will be challenging. This is being managed through on-going dialoge with stakeholders and the establishment of an internal multi-dicipline team to manage the various elements of this project.

Project Timeline	Plans for Next Period
The design phase of the SWMP improvements will be initiated in Q4-2014 when the relationship between the channel and SWMP is better defined through the current Black Creek Channel EA.	The physical relationship between the Black Creek Channel and SWMP will be defined. A RFP for Design Competition process will be drafted. An engineering consultant will be retained to prepare a more detailed cost estimate for the SWMP Works in order to inform the financial strategy associated with the Black Creek improvements and future capital budgets.

New Building Canada Fund (NBCF)

The 2007 Building Canada Fund (BCF) expired on March 31, 2014 and was replaced with the New Building Canada Fund (NBCF) on April 1, 2014. The New Building Canada Fund is a Federal government initiative designed to fund national, regional and local infrastructure projects. NBCF builds on the original program by providing funding over a duration of ten years (2014-2024) through the implementation of two new funding streams (National Infrastructure Component & Provincial-Territorial Infrastructure Component) as well as the renewal/expansion of the existing Gas Tax and Public Private Partnership Canada programs.

Details regarding the application process are not yet available and may be further delayed pending Provincial Election results. Staff continues to monitor the provincial website (www.gov.on.ca/en/infrastructure/bcf.asp).

NBCF program details are as follows:

National Infrastructure Component (NIC) *NEW*

NIC will provide a ten year \$4 Billion Federal investment to support projects of national significance with broad public benefits and contribute to long term economic growth. Potential projects, jointly identified by the Provinces and Federal government, will undergo an eligibility review prior to submitting a Business Case to Infrastructure Canada. Projects with minimum total eligible costs of \$100 million will undergo a two stage P3 (Public Private Partnership) screening administered by PPP Canada. Opportunities for municipalities under this funding component appear limited due to the minimum value requirements.

Provincial-Territorial Infrastructure Component (PTIC) *NEW*

The PTIC will contribute a \$10 Billion Federal investment to Provinces and Territories, over ten years, utilizing the same funding formula as the past program: \$250 Million Base Amount + Per Capita Funding. Ontario's ten (10) year total allocation equates to approximately \$2.7 Billion calculated as follows:

Ontario's Ten Year PTIC Funding		
Base Funding	Per Capita Distribution	Total Funding
\$250,000,000	\$2,470,342,980	\$2,720,342,980

The Province will receive the funds on an annual basis at \$25 Million per year + Per Capita Funding and administer the program through the Ministry of Infrastructure. This cost share program provides for 1/3rd contributions from Federal, Provincial and Municipal partners to support medium to large scale initiatives that encourage job creation/economic growth, clean environment and stronger communities. Funding to municipalities will be provided for initiatives relating to "construction renewal, rehabilitation or material enhancement of infrastructure for public use" and must pertain to one (1) of the Eligible Categories of Investment (some are also Gas Tax applicable categories) as noted below:

PTIC ELIGIBLE INVESTMENT CATEGORIES	
*Highways & Major Roads	*Disaster Mitigation
*Public Transit	*Local & Regional airports
*Drinking Water	*Short Line rail
*Wastewater	*Short Sea shipping
*Solid Waste management	Green Energy
*Connectivity & Broadband	Innovation (post-secondary infrastructure)
*Brownfield redevelopment	Northern Infrastructure

*Categories that are also applicable to Gas Tax

The NBCF divides the \$10 Billion PTIC share between two (2) sub-component funding programs:

i. National and Regional Projects (PTIC-NRC): \$9 Billion

- Approximately \$2.4 Billion of the Ontario allocation for medium to large projects
- Open to municipalities with populations greater than 100,000 such as the City of Vaughan

- Municipal 1/3 contributions projects with the potential that some projects may stack Federal funding to a maximum of 50%

ii. Small Communities Fund: \$1 Billion

- Approximately \$270 Million of the Ontario allocation
- Open to municipalities with populations of 100,000 or less

As noted above, the Ontario Ministry of Infrastructure will be responsible for administrating the program and will disseminate information regarding the program details and application process. However, to date these *details have not yet been forthcoming, and may be postponed pending result of Provincial election. Staff will continue monitoring the situation closely.*

Gas Tax

Gas Tax is a federally legislated infrastructure program that provides funding to municipalities for specific local priorities. Funding is calculated on a per-capita basis and provided in two increments per year. The City of Vaughan currently receives approximately \$7 Million per year which is anticipated to remain the same until publication of the 2016 Census population data. Under the NBCF *Gas Tax will be indexed at 2% per annum commencing in 2016* and be applicable to additional Investment Categories as noted below:

GAS TAX ELIGIBLE CATEGORIES OF INVESTMENT		
Existing	New	*New (also PTIC applicable)
Local Roads & Bridges	Culture	*Highways
Public Transit	Tourism	*Local & regional airports
Wastewater	Sport	*Short-Line rail
Drinking water	Recreation	*Disaster Mitigation
Solid Waste Management		*Broadband & Connectivity
Community Energy Systems		*Brownfield redevelopment

To date *details regarding these new categories have not yet been forthcoming, but are expected in the near future. Staff will continue monitoring the situation closely.*

PPP Canada: Public Private Partnerships or P3s

P3 projects are delivered by government in partnership with the private sector. Typically, the private sector incurs a major share of the project's financing and construction risk and assumes maintenance once completed. Under the NBCF, all projects with minimum total eligible costs of \$100 million will be required to undergo a two stage P3 Screening administered by PPP Canada. Stage one (1) is the Suitability Assessment (SA). If the project is deemed suitable it will move to Stage two (2) - Procurement Option Analysis (POA) which requires the applicant to compare the project cost via traditional procurement delivery to the P3 delivery model. Should the analysis determine that cost savings will be realized through a public private partnership, Federal funding will be contingent on delivering the project as a P3.
