Member's Resolution

Submitted by Councillor Alan Shefman.

Whereas, the City of Vaughan's proposed budget is currently before the Finance and Administration Committee, and

Whereas, Staff have provided a detailed budget that meets the 3 per cent or less tax increase requirement and the addition of a possible significant capital expenditure for this project is not feasible at this time, and

Whereas, the development of cycling facilities in the City is identified as a Council priority – "Continue to develop transit, cycling and pedestrian options to get around the City" and

Whereas, in July 2014, a detailed feasibility study – **Clark Avenue West Bikeability for Proposed Raised Track** – was conducted for the City. The study provides a variety of recommendations for the installation of a raised track cycling facility from Yonge Street to Dufferin Street, and

Whereas, a roadway revitalization project is scheduled for at least part of Clark Avenue for the 2018 budget year, and

Whereas, the Cycling and Pedestrian Task Force is currently considering a variety of recommendations including connectivity as a priority for cycling facilities in the City and that this cycle route will provide a key link into the Bartley Smith Pathway system located just west of Dufferin Street.

Therefore, be it resolved that;

Staff bring forward a cycling facility on the entire length of Clark Avenue for consideration for funding as part of the 2018 budget for Council consideration.
