ITEM -	1

To Whom it may Concern

We the residents of the area are directly affected with this proposed plan and would like to oppose any such effort by the city to approve such a risky facility near our residences. As a matter of fact, this gas bar is too close to the residential area, and our back yards are directly intersecting the land proposed. This is in contrary to the vision of city of Vaughan proposed in its document on "Vaughan Vision 2020" in which one of the Strategic Objective under Service Excellence Goal is to Enhance and Ensure Community Safety, Health and Wellness. How can we expect a healthy living when our children, stay at home moms and elderly family members will be inhaling gasoline vapors day and night? Who will be responsible for their suffering? Including the noise and sound pollution. Can we call this type of dwelling a healthy neighborhood? Please come forward and raise your voice and support your community to oppose this car wash and gas bar in our backyards. We need you and we need your voice to protest the city of Vaughan on January 15th at 7:00 pm at City Hall. Please come forward for a good cause and a healthy living for us and for your future generations.

File number: Z.12.029

Thank you.
Sincerely,

Rinki

Resident at Jane & Teston
