Subject: RE: Keele Street Development Coming Forward

Dear Marilyn;

First off thank you for the notifications, however due to an unexpected funeral viewing I am unable to attend the meeting in person this evening.

I would however like to voice my concerns via this brief email. While I understand the applicants pursuit of free enterprise opportunities, as a resident of 28 years in the same location, I am concerned with the deteriorating quality of life caused by the traffic, noise and gridlock that occurs daily on Keele Street. These applications will simply add to the existing issues, and while the applicants may state that these items are outside the scope of their application, then I ask who is representing the residents of the community?

I also urge Council to consider and adopt the recommendations by Urban Strategies, presented at the June 16, 2015 Public Hearing as they were very well received by the local residents who attended that session.

Regards,

Frank Polera
