

NOTICE OF STUDY COMPLETION

**Municipal Class Environmental Assessment Study
Huntington Road from Langstaff Road to McGillivray Road (Part A) and
from Major Mackenzie Drive to Nashville Road (Part B)**

The City of Vaughan has completed the Municipal Class Environmental Assessment (EA) Study for the Huntington Road improvements to accommodate population and employment growth in western Vaughan. The proposed road improvements are required to be completed by 2021 and are consistent with objectives outlined in the Vaughan Transportation Master Plan – A New Path (July 2013).

STUDY PROCESS

The EA study has been conducted in accordance with the planning and design process for Schedule 'C' projects, as outlined in the Municipal Class Environmental Assessment (October 2000, as amended in 2007, 2011 & 2015).

The EA study identified a recommended preliminary design that includes:

- **For Part A (from Langstaff Road to McGillivray Road):** widening to four lanes, urbanization of the roadway with a multi-use trail on the east side from Langstaff Road to McGillivray Road, and a sidewalk on the west side between Langstaff Road and Rutherford Road.
- **For Part B (from Major Mackenzie Drive to Nashville Road):** urbanization of the roadway and a multi-use trail on the east side.

Public Information Centres (PIC) were held on November 25, 2014 and June 29, 2016. The PICs provided the public and interested stakeholders the opportunity to meet with the Project Team and comment on the study.

ENVIRONMENTAL STUDY REPORT

The Environmental Study Report (ESR) will be placed on public record for a 30-day review period in accordance with the Municipal Class Environmental Assessment process, **from November 9, 2017 to December 10, 2017**. The ESR documents the planning and decision-making process, as well as consultation, that was undertaken throughout the study. The ESR is available for review at the following locations:
