

Watermain and road improvements

THORNHILL | NEWSLETTER #3 | APRIL 2024

Dear resident,

As part of the 2023 Road Resurfacing and Rehabilitation project, the City of Vaughan is replacing watermains and enhancing the road surfacing on the following roads in the Thornhill area:

- Felicia Court
- Jonathan Gate
- Joshua Court
- Karen Street
- Lansbury Court
- Rockford Court
- Winding Lane

Project update and timeline

Completed work includes replacing the mainline watermain and connecting residential service lines to all properties.

The next phase of work, which includes curb replacement, road surface removal and asphalt replacement, is scheduled to begin in May 2024 and be completed this summer. These improvements will support stormwater drainage and ensure industry standards are met.

Construction impacts

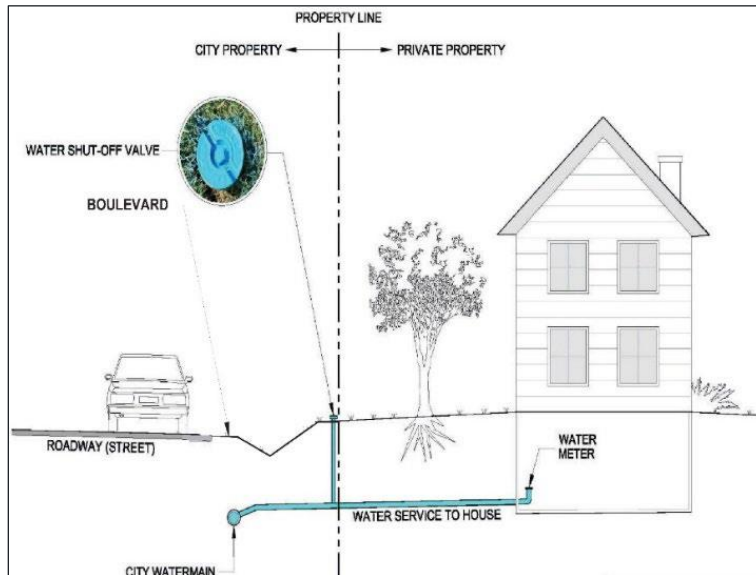

The impacted roads will remain open to vehicular and pedestrian traffic throughout construction. Temporary lane restrictions will be required to allow construction activities to proceed safely and efficiently.

A restoration plan is in place for areas utilized as material storage locations. Restoration activity will take place once the work is completed.

For your information

If your property is adjacent to the roadway, consider removing or relocating any landscaping objects and features that encroach into the City boulevard, as per the Encroachment By-law 034-2017. Privately owned underground systems within City-owned boulevards may be impacted during construction – any damage will not be considered at fault by the contractor if within City boulevard property limits.
