

Watermain, Streetscaping and Road Improvements

Kleinburg Village | Newsletter #1 | August 2021

What improvements are being made?

The City of Vaughan is undertaking important municipal infrastructure improvements in your area, including watermain replacement, road reconstruction work and streetscaping improvements. These enhancements support the City's continued commitment to ensuring long-term sustainability of municipal infrastructure.

This project is currently in the Design Phase. Construction is expected to begin in spring 2023.

Design and Construction Scope

Design and construction will include underground infrastructure improvements, road reconstruction as well as the addition of parking lay-bys, cycling facilities, roadway and pedestrian lighting and surface enhancements with streetscaping and landscape features.

Locations:

Islington Avenue, from Highway 27 to Major Mackenzie Drive West
Nashville Road, from Highway 27 to Islington Avenue
Stegman's Mill Road, from Islington Avenue to Teston Road

Pre-Construction Field Work | Summer 2021

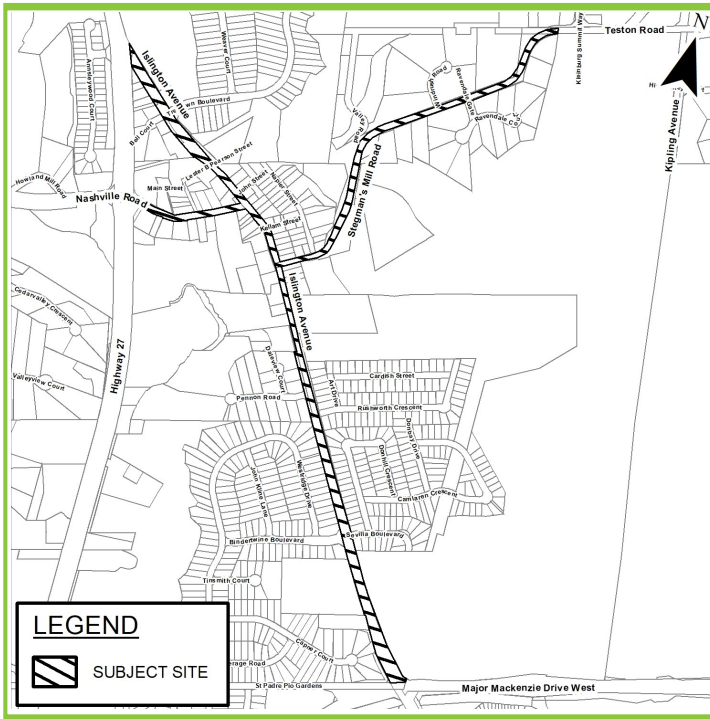

Over the next few weeks, City-retained engineering consultants will be commencing investigation activities including topographic and/or legal surveys, geotechnical boreholes and other field investigation works. The various underground utilities (i.e. gas, telephone and hydro) will be identified by coloured paint markings. All roads will remain open to traffic while the field investigation work is being carried out, under the direction of the Infrastructure Delivery department.

Join the Conversation

The City will be hosting a virtual Public Information Session in early 2022, to inform local residents and stakeholders about the project, including proposed improvements, timelines and impacts on the community. Participants will also have an opportunity to view preliminary designs, provide input and have an opportunity to ask the project team questions.

Newsletter #2 will follow in advance of the Public Information Session and provide more details.
